FOREWORD BY PETER H. RAVEN	xi
PREFACE	xiii
ACKNOWLEDGMENTS	xvii
BRYOPHYTES AND THE EVOLUTION OF LAND PLANTS	
Inferring phylogeny using genomic characters: a case study using land plant plastomes, <i>Dean G. Kelch, Amy Driskell, and Brent D. Mishler</i>	3
Molecular evolution of the chloroplast <i>trnL-F</i> region in land plants, <i>Dietmar Quandt, Kai Müller, Michael Stech, Jan-Peter Frahm, Wolfgang Frey, Khidir W. Hilu, and Thomas Borsch</i>	13
HORNWORT PHYLOGENY	
Phylogenetic relationships of the hornworts based on <i>rbcL</i> sequence data: novel relationships and new insights, <i>R. Joel Duff, Christine Cargill, Juan Carlos Villarreal, and Karen S. Renzaglia</i>	41
LIVERWORT PHYLOGENY	
A molecular phylogeny of leafy liverworts (Jungermannniidae: Marchantiophyta), <i>E. Christine Davis</i>	61
Phylogeny of liverworts — beyond a leaf and a thallus, <i>Xiaolan He-Nygrén, Inkeri Ahonen, Aino Juslén, David Glenny, and Sinikka Piippo</i>	87
A phylogeny of the simple thalloid liverworts (Jungermannniopsida, Metzgeriidae) as inferred from five chloroplast genes, <i>Laura L. Forrest and Barbara J. Crandall-Stotler</i>	119
Phylogenetic relationships between Lophoziaceae and Scapaniaceae based on chloroplast sequences, <i>Daniela B. Schill, David G. Long, Michael Moeller, and Jane Squirrell</i>	141
On phylogeny of Lophoziaceae and related families (Hepaticae, Jungermanniales) based on <i>trnL-trnF</i> intron-spacer sequences of chloroplast DNA, <i>Svetlana P. Yatsentyuk, Nadezhda A. Konstantinova, Michael S. Ignatov, Jaakko Hyvönen, and Aleksey V. Troitsky</i>	150
Molecular phylogeny of the liverwort order Porellales (Marchantiophyta, Jungermannniopsida), <i>Inkeri Ahonen</i>	168
Phylogeny of Lejeuneaceae: a cladistic analysis of chloroplast gene <i>rbcL</i> sequences and morphology with preliminary comments on the mitochondrial <i>nad4-2</i> spacer region, <i>Rosemary Wilson, S. Robbert Gradstein, Jochen Heinrichs, Henk Groth, Anna Luiza Ilkiu-Borges, and Florian A. Hartmann</i>	189

MOSS PHYLOGENY

- Systematics of Bryophyta (mosses): from molecules to a revised classification, *Bernard Goffinet and William R. Buck* 205
- Diversification of peatmosses: a phylogenetic approach, *A. Jonathan Shaw, Cymon J. Cox, and Iwona Melosik* 240
- Pogonatum* (Polytrichales, Bryophyta) revisited, *Satu Koskinen and Jaakko Hyvönen* 255
- Phylogenetic inferences in the Orthotrichoideae (Orthotrichaceae, Bryophyta) based on variation in four loci from all genomes, *Bernard Goffinet, A. Jonathan Shaw, Cymon J. Cox, Norman J. Wickett, and Sandra B. Boles* 270
- Systematic studies of non-hypnanaean pleurocarps: establishing a phylogenetic framework for investigating the origins of pleurocarpy, *Neil E. Bell and Angela E. Newton* 290
- A simple taxonomic treatment for a complicated evolutionary story: the genus *Hygroamblystegium* (Hypnales, Amblystegiaceae), *Alain Vanderpoorten* 320
- Phylogeny and evolution of epiphytism in the three moss families Meteoriaceae, Brachytheciaceae, and Lembophyllaceae, *Sanna Huttunen, Michael S. Ignatov, Kai Müller, and Dietmar Quandt* 328

PHYLOGEOGRAPHY

- Phylogeny and biogeography of *Plagiochila* (Plagiochilaceae) based on nuclear and chloroplast DNA sequences, *Henk Groth, Melanie Lindner, and Jochen Heinrichs* 365
- Mosses surviving on the edge: origins, genetic diversity, and mutation in Antarctica, *Mary L. Skotnicki, Anne Mackenzie, and Patricia M. Selkirk* 388
- Organellar inheritance in the allopolyploid liverwort species *Porella baueri* (Porellaceae): reconstructing historical events using DNA analysis data, *Kamila Jankowiak and Zofia Szwejkowska-Kulinska* 404
- Molecular relationships and biogeography of two Gondwanan *Campylopus* species, *C. pilifer* and *C. introflexus* (Dicranaceae), *Michael Stech and Joana Dohrmann* 415

TAXONOMIC INDEX
