

Contents

Introduction	1
-------------------------------	---

Chapter 1 Descriptive and Functional Anatomy

A. Descriptive Anatomy	3
I. Vertebral Body	3
1. Cervical Segment	3
2. Dorsal Segment	4
3. Lumbar Segment	4
II. Articular Pillars	4
1. Cervical Segment	4
2. Dorsal Segment	5
3. Lumbar Segment	6
III. Bony Bridges: Pedicles and Laminae	6
IV. Accessory Processes	7
1. Transverse	7
2. Spinous	7
V. Intervertebral Means of Union	7
1. Vertebral Bodies	7
2. Posterior Arches	7
B. Functional Anatomy	7
I. Static Role	8
II. Dynamic Role	8
III. Neuroprotective Role	8

Chapter 2 Trauma of the Cervical Spine

A. Radiologic Investigation Techniques	11
I. Conventional Roentgenograms	11
1. Cervico-occipital Joint	11
2. Middle and Lower Cervical Spine	12
II. Tomographic Investigation	14
B. Correlations Between Incidence and Radiographic Image	15

C. Guide for Interpretation	16
I. Cervico-occipital Joint	17
II. Mobile Cervical Segment from C3 to C7	18
1. Alignment of the Vertebrae	18
2. Distances Between the Vertebrae	19
D. Basic Radiosemiology of Cervical Lesions	19
I. Upper Cervical Segment C0 to C2	19
1. Lesions of the Atlas Vertebra	19
2. Lesions of the Axis Vertebra	24
II. Median and Lower Cervical Segment (C3 to C7)	33
1. Corporeal Lesions	33
2. Lesions of the Posterior Arch	36
3. Sprains and Luxations	41

Chapter 3 Traumas of the Thoracic and Lumbar Spine

A. Radiologic Investigation Techniques	51
I. Conventional Roentgenograms	51
1. Thoracic Spine	51
2. Lumbar Spine	51
II. Tomographic Investigation	51
B. Elementary Radiosemiology	52
I. Body Lesions	52
1. Fractures	52
2. Vertebral Compression	57
II. Lesions of the Posterior Arch	59
1. Isolated Lesions	59
2. Associated with Body Lesions	59
III. Luxations and Sprains	60
1. Isolated Lesions	60
2. Associated with Body Lesions	64
IV. Soft Parts	64

Chapter 4 Comprehensive Study

A. Lesional Diagnosis	65
I. Rupture in the Continuity	65
II. Displacements and Listhesis	65
III. Vasculonervous Complications	67
1. Nervous Complications	67
2. Vascular Complications	69

Contents	XIII
B. Dynamic Functional Diagnosis	69
I. Bony Instability	70
II. Discoligamentous Instability	70
C. Genesis of Lesions	72
Chapter 5 Classification	
A. Lesions Caused by Distraction Forces	75
I. In Flexion	75
1. Discoligamentous Lesions	75
2. Bony Lesions (Seat-Belt Fracture)	75
II. In Extension	77
1. Discoligamentous Lesions	77
2. Bony Lesions	77
B. Lesions Caused by Compression	77
I. In Flexion	79
1. Partial or Anterior Wedge Compression	79
2. Global Compression	79
3. Body Fractures	79
4. Tear-Drop Fracture Type I	79
II. In Extension	82
1. Fracture of the Spinous Processes and Laminae	82
2. Fracture of the Articular Pillars	82
3. Fracture of the Pedicles	82
C. Lesions Caused by Rotation	83
I. Cervical Segment	83
II. Lumbar Segment	85
D. Lesions Caused by Shearing Movements	85
Conclusions	87
References	89
Subject Index	93
