

LIST OF TABLES

Table 1	Asteroids – largest	114
Table 2	Atmospheres – Venus, Mars and Earth.	116
Table 3	Atmospheres – giant planets and Sun	117
Table 4	Aurora – emission lines	118
Table 5	Comets – Great	133
Table 6	Comets – short period	134
Table 7	Comets – structure	135
Table 8	Constellations	138
Table 9	Corona – emission lines	141
Table 10	Corona – holes and loops	141
Table 11	Cosmic microwave background radiation	144
Table 12	Cosmic rays – flux at the top of the atmosphere.	145
Table 13	Crab Nebula	147
Table 14	Earth	156
Table 15	Earth – abundant elements.	156
Table 16	Emission nebulae	160
Table 17	Escape velocity – Sun and planets.	163
Table 18	Fraunhofer absorption lines in sunlight.	169
Table 19	Galaxies – bright	172
Table 20	Galilean satellites.	175
Table 21	Greenhouse gases – produced by human activity	183
Table 22	Halley's Comet	186
Table 23	Hydrogen lines.	194
Table 24	Interstellar molecules	200
Table 25	Jupiter	205
Table 26	Local Group	214
Table 27	Magnetic fields – planets	219
Table 28	Main-sequence stars	222
Table 29	Mars	224
Table 30	Mars – satellites	225

Table 31	Mars – oppositions.	225
Table 32	Mercury	227
Table 33	Messier objects.	229
Table 34	Meteor showers.	233
Table 35	Meteor showers – comets	234
Table 36	Milky Way Galaxy	236
Table 37	Moon	238
Table 38	NASA and ESA – space missions	242
Table 39	Neptune	247
Table 40	Nobel Prize winners.	250
Table 41	Planets – orbits.	264
Table 42	Planets – physical properties.	265
Table 43	Planetary nebulae	267
Table 44	Radioactive isotopes	278
Table 45	Rings – Saturn	283
Table 46	Satellites – large.	286
Table 47	Saturn.	287
Table 48	Solar eclipses – total	295
Table 49	Solar wind	299
Table 50	Stars – brightest.	305
Table 51	Stars – nearest	307
Table 52	Stellar classification	309
Table 53	Sun	313
Table 54	Sun – elements.	315
Table 55	Supernovae – historical	318
Table 56	Supernova 1987A.	319
Table 57	Telescopes – biggest optical	325
Table 58	Uranus	335
Table 59	Venus	338
