

5 Numerical study on the influence of material heterogeneity on mode III crack propagation using a phase-field model

Alfat S., Eso R., Barata L. O. A., Rianse M. S.

21 A 3D lattice Boltzmann – phase-field model of three-phase contact line dynamics on curved boundaries

Benioug M.

49 Dynamic behaviour of rotating functionally graded Timoshenko beam via B-spline collocation method

Chichkhede S., Mahapatra D., Sanyal S., Bhowmick S.

69 Stiffness characteristics of railway buffers: Requirements, testing and proposal of a new computational model

Michálek T., Liberová S., Vágner J., Jaroš P., Šlapák J.

87 Surface fatigue microcracks in turbocompressor blades of a turboshaft engine

Pavlas J., Růžička M., Slavík S.
