Preface.....xi

Authors xiii

List of Major GIS Datasets and Program Files.....xv

1. Why Hospital Service Areas?..... 1

1.1 Hospital Service Area (HSA) as a Functional Region..... 1

1.2 Value of HSAs 2

1.3 Study Area and Data 4

1.4 Overview of Remaining Chapters..... 7

2. Estimating Distance and Travel Time Matrices in GIS..... 11

2.1 Measures of Distance and Travel Time..... 11

2.2 Computing Distance and Drive Time Matrices in ArcGIS Pro 13

2.2.1 Computing Euclidean and Geodesic Distance Matrices in ArcGIS Pro 14

2.2.2 Computing a Drive Time Matrix in ArcGIS Pro 15

2.3 Estimating a Transit Travel Time Matrix in ArcGIS Pro 19

2.4 Estimating Drive Time and Transit Time Matrices by Google Maps API..... 25

2.5 Estimating a Large Drive Time Matrix by a Differential Sampling Approach..... 32

2.5.1 Estimating Preliminary Inter-zonal Times 33

2.5.2 Calibrating Inter-zonal Times on Randomly Sampled OD Pairs by Google Maps API..... 34

2.5.3 Appending Intra-zonal Times..... 35

2.6 Summary..... 37

3. Analysis of Spatial Behavior of Health Care Utilization in Distance Decay..... 39

3.1 Distance Decay Functions 40

3.2 Value of Analyzing Distance Decay Effects in Health Care Studies 41

3.3 Deriving the Distance Decay Functions by the Spatial Interaction Model..... 44

3.3.1 Estimating the Spatial Interaction Model..... 44

3.3.2 Distance Decay Effects across Geographic Areas in Florida..... 47

3.4	Deriving the Distance Decay Functions by a Complementary Cumulative Distribution Curve	53
3.4.1	Estimating the Complementary Cumulative Distribution Function	53
3.4.2	Distance Decay Effects Across Population Groups in Florida	54
3.5	Summary	59
4.	Delineating Hospital Service Areas by the Dartmouth Method.....	61
4.1	History and Applications of Dartmouth HSAs and HRRs.....	61
4.2	The Dartmouth Method for Defining HSAs and HRRs.....	63
4.2.1	Defining HSAs by the Refined Dartmouth Method.....	63
4.2.2	Defining HRRs by the Refined Dartmouth Method	67
4.3	Automating the Refined Dartmouth Method for HSA & HRR Delineations	69
4.4	Delineating HSAs and HRRs in Florida by the Refined Dartmouth Method.....	77
4.4.1	Delineating HSAs and HRRs in Florida by the Automated Toolkit	77
4.4.2	Calculating Indices for 1993 Dartmouth HSAs and HRRs in Florida by the Toolkit	82
4.4.3	Evaluating HSAs and HRRs by the Refined Dartmouth Method	85
4.5	Summary	90
5.	Delineating Hospital Service Areas by the Huff Model.....	93
5.1	The Proximal Area Method and Its Implementation in GIS	94
5.1.1	Defining Proximal Areas in Euclidean Distance in GIS.....	94
5.1.2	Defining Proximal Areas in Travel Time in GIS	97
5.2	The Huff Model and Extensions	101
5.2.1	From Reilly's Law to the Huff Model.....	101
5.2.2	Extensions to the Huff Model	103
5.3	Implementing the Huff Model for Delineating HSAs in ArcGIS Pro	104
5.4	Automated Delineation of HSAs by Integrating the Huff Model and Dartmouth Method	111
5.5	Summary	119
6.	Delineating Hospital Service Areas by Network Community Detection Methods.....	121
6.1	Community Detection Methods: From Louvain to Leiden	122
6.2	Spatially Constrained Louvain and Leiden Methods	125

6.3	Automated Delineation of HSAs and HRRs and a Case Study in Florida.....	129
6.3.1	Automating the ScLouvain and ScLeiden Methods in ArcGIS Pro.....	129
6.3.2	Delineating HSAs and HRRs in Florida by the ScLouvain and ScLeiden Methods.....	131
6.3.3	Computational Performances of the ScLouvain and ScLeiden Methods.....	136
6.4	Comparing HSAs and HRRs by ScLouvain, ScLeiden, and Refined Dartmouth Methods.....	139
6.5	Summary.....	150
7.	Delineating Cancer Service Areas in the Northeast Region of the USA.....	153
7.1	Study Area and Cancer Care Data	154
7.2	Interpolating Suppressed Service Volumes	155
7.3	Delineating CSAs by ScLouvain and ScLeiden in the Northeast Region	158
7.4	Variation of Distance Decay Behavior across CSAs in the Northeast Region.....	163
7.5	Summary.....	170
Appendix A: User Guide: Estimating a Large OD Drive Time Matrix		173
Appendix B: User Guide: How to Create Curved-Line and Straight-Line Network Flow Maps		187
References		197
Index.....		203
