

<i>Lukáš Vacek, Chi-Wang Shu, Václav Kučera: Discontinuous Galerkin method with Godunov-like numerical fluxes for traffic flows on networks.</i>	
Part I: L^2 stability	311
<i>Lukáš Vacek, Chi-Wang Shu, Václav Kučera: Discontinuous Galerkin method with Godunov-like numerical fluxes for traffic flows on networks. Part II: Maximum principle</i>	341
<i>Zoran Tomljanović: H_∞ analysis of cooperative multi-agent systems by adaptive interpolation</i>	367
<i>Qiong Wu, Changjia Wang: Existence of regular time-periodic solutions for a class of non-Newtonian double-diffusive convection system</i>	387
<i>Kwangil Kim, Kwanhung Ri, Wonho Han: WENO-Z scheme with new nonlinear weights for Hamilton-Jacobi equations and adaptive approximation</i>	413
<i>Elmostafa Bendib, Mustapha Khiddi: Infinitely many solutions for Kirchhoff-type equations involving critical growth in Orlicz-Sobolev with negative energies ...</i>	441
