Preface.....	xix
Acknowledgements	xxi
Author.....	xxiii
1. Introduction.....	1
1.1 Is This the Book for You?	1
1.2 How to Use This Book.....	2
1.3 Why Bother with Statistics?.....	3
1.4 A Note for Lecturers and Teachers.....	6
References	8
2. How to Use Statistics	9
2.1 Hypotheses	9
2.2 The Null Hypothesis	10
2.3 Bad Hypotheses.....	11
2.4 Multiple Working Hypotheses.....	12
2.5 Unbiased Sampling.....	12
2.6 Probability: Is It Just Luck?	14
2.7 One or Two-Tail Testing	18
2.8 Effect Size	19
References	23
3. Different Kinds of Data	25
3.1 Kinds of Data	25
3.1.1 Nominal	25
3.1.2 Ordinal	25
3.1.3 Individual Measurements	28
3.2 Independent or Linked Data?.....	29
3.3 Assumptions.....	30
3.3.1 Checking for a 'Normal' or Gaussian Distribution	31
3.4 Choosing the Right Test.....	34
References	38
4. Tools of the Trade	41
4.1 Introduction.....	41
4.2 Arithmetic	41
4.3 Using a Calculator.....	43
4.4 Spreadsheets	43
4.4.1 Assigning Ranks in a Spreadsheet.....	47
4.5 SPSS.....	50
4.6 R Commander	50
4.7 Descriptive Statistics.....	52
4.7.1 Measures of the Middle: Mean, Median and Mode.....	52

4.7.2	Measures of Spread or Dispersion: Range, Variance and Standard Deviation.....	54
4.7.3	Confidence Limits around the Mean	54
4.7.4	Measures of the Shape of a Distribution: Skewness and Kurtosis	55
	References	57
5.	Single Sample Tests	59
5.1	Introduction	59
5.2	Binomial Test	60
5.2.1	When It Is Useful	60
5.2.2	What It Is Based On.....	60
5.2.3	How to Do It	61
5.2.3.1	Online Calculators	61
5.2.3.2	In a Spreadsheet	61
5.2.3.3	Companion Site Calculator	62
5.2.3.4	In SPSS	63
5.2.3.5	In R Commander	63
5.2.3.6	By Hand	63
5.2.4	Examples	63
5.2.4.1	Example: Yes or No Questionnaire Answers	63
5.2.4.2	Example: Is There a Gender Bias in My Sample?	64
5.2.4.3	Example: Have the Limestones Been Removed by Weathering?	64
5.2.4.4	Example: Are There Too Few Black Managers in English Football?.....	65
5.3	One-Sample Chi-Square (χ^2) Test.....	65
5.3.1	Introduction.....	65
5.3.2	When It Is Useful	65
5.3.3	What It Is Based On.....	66
5.3.4	How to Do It	66
5.3.4.1	Companion Site Calculator	67
5.3.4.2	In a Spreadsheet	67
5.3.4.3	In R Commander	68
5.3.4.4	In SPSS	68
5.3.5	Examples	69
5.3.5.1	Example: Beautiful Beaches.....	69
5.3.5.2	Example: Ethnic Groups.....	69
5.3.5.3	Example: Dolphin Sightings	69
5.4	Kolmogorov–Smirnov One-Sample Test	70
5.4.1	When It Is Useful	70
5.4.2	What It Is Based On.....	70
5.4.3	How to Do It	71
5.4.4	Examples	71
5.4.4.1	Example: Are Levels of Agreement Equal?	71
5.4.4.2	Example: Is My Sample Representative?.....	72
5.5	One Sample Runs Test for Randomness.....	73
5.5.1	When It Is Useful	73
5.5.2	What It Is Based On.....	73
5.5.3	How to Do It	74

5.5.3.1	Companion Site Calculators	74
5.5.3.2	In SPSS	74
5.5.3.3	In R Commander	75
5.5.4	Examples	75
5.5.4.1	Example: Nominal Data and Small Sample Sizes	75
5.5.4.2	Example: Large Sample of Individual Numbers	77
	References	79
6.	Two-Sample Tests for Counts in Two Categories	81
6.1	Introduction	81
6.2	Sign Test	81
6.2.1	When It Is Useful	81
6.2.2	What It Is Based On	82
6.2.3	How to Do It	82
6.2.4	Effect Size	82
6.2.5	Examples	83
6.2.5.1	Example: Checking Exam Improvement	83
6.2.5.2	Example: Crystal Healing	83
6.2.5.3	Example: Footpath Erosion	84
6.3	McNemar's Test for Significance of Changes	84
6.3.1	When It Is Useful	85
6.3.2	What It Is Based On	85
6.3.3	How to Do It	86
6.3.4	Effect Size	86
6.3.5	Small Samples	86
6.3.6	Correction for Continuity	87
6.3.7	How to Do It	87
6.3.7.1	Companion Site Calculator	87
6.3.7.2	Online Calculators	87
6.3.7.3	In R Commander	87
6.3.7.4	In SPSS	87
6.3.8	Examples	88
6.3.8.1	Example: Opinions on Fracking	88
6.3.8.2	Example: Land Management	89
6.3.8.3	Example: Golf Green Hydrophobicity (Bad Test)	89
6.4	Tests for Independent Samples Arranged as 2×2 Contingency Tables	91
6.5	Risk Ratio and Odds Ratio	93
6.5.1	Risk Ratio	93
6.5.2	Odds Ratio	93
6.6	Confidence Limits of the Odds Ratio and Risk Ratio	94
6.6.1	How to Do It	95
6.6.1.1	Companion Site Calculator	95
6.6.1.2	Using an Online Calculator	95
6.6.1.3	In R Commander	96
6.6.1.4	In SPSS	96
6.7	Sample Size Assumptions	96
6.7.1	Calculating Expected Values	96
6.8	Chi-Square Test for a 2×2 Contingency Table	98
6.8.1	When It Is Useful	98

6.8.2	What It Is Based On.....	99
6.8.3	Calculating Chi-Square.....	99
6.8.4	Continuity Correction (Yates's Correction).....	101
6.8.5	Effect Size: Cramer's V	101
6.9	Conducting the Chi-Square Test.....	102
6.9.1	Companion Site Calculator.....	102
6.9.2	Online Calculators.....	102
6.9.3	In R Commander.....	102
6.9.4	In SPSS.....	103
6.9.5	Examples.....	104
6.9.5.1	Example: Organic Produce.....	104
6.9.5.2	Example: Erratic Content.....	104
6.9.5.3	Example: Large Sample Parametric Approach.....	105
6.9.5.4	Example: Common Error with a Solution.....	106
6.10	Fisher's Exact Test.....	107
6.10.1	When It Is Useful.....	107
6.10.2	What It Is Based On.....	108
6.10.3	How to Do It.....	108
6.10.3.1	Real Statistics Resource Pack for Excel.....	108
6.10.3.2	Online Calculators.....	108
6.10.3.3	In R Commander.....	109
6.10.3.4	In SPSS.....	109
6.10.4	Examples.....	109
6.10.4.1	Example: Small Sample of Snails.....	109
6.10.4.2	Example: Start-Up Companies.....	110
	References.....	110
7.	Two-Sample Tests for Counts in Several Categories.....	111
7.1	Introduction.....	111
7.2	Two-Sample Chi-Square Test.....	112
7.2.1	When It Is Useful.....	112
7.2.2	What It Is Based On.....	113
7.2.3	Expected Frequencies.....	113
7.2.4	Sample Size Assumptions.....	117
7.2.5	Strength of the Relationship (Cramer's V).....	119
7.2.5.1	Calculating Cramer's V	120
7.2.5.2	Where Are the Differences?.....	120
7.2.6	How to Conduct a Two-Sample Chi-Square Test.....	122
7.2.6.1	Companion Site Calculators.....	122
7.2.6.2	Online Calculators.....	122
7.2.6.3	R Commander.....	122
7.2.6.4	In SPSS.....	123
7.2.7	Examples.....	123
7.2.7.1	Example: Garden Visitors.....	123
7.2.7.2	Example: Snails (Small Sample).....	124
7.2.7.3	Example: Misuse of Chi-Square.....	125
7.2.7.4	Example: Common Mistake and a Solution.....	126
7.3	Fisher's Exact Test for More Than Two Categories.....	127
7.3.1	When It Is Useful.....	127

7.3.2	How to Do It	128
7.3.2.1	In R Commander.....	128
7.3.2.2	In SPSS	129
7.3.3	Examples	129
7.3.3.1	Example: Snails (Small Sample)	129
7.3.3.2	Example: Small Questionnaire.....	129
7.3.3.3	Example: Failed Test and a Solution.....	130
7.4	Two-Sample Tests for Counts in Ordered Categories.....	132
7.5	Kolmogorov–Smirnov Two-Sample Test	132
7.5.1	When It Is Useful	133
7.5.2	How to Perform the Kolmogorov–Smirnov Two-Sample Test with Counts in Categories	134
7.5.2.1	Equal Sample Sizes	134
7.5.2.2	Unequal Sample Sizes.....	135
7.5.3	One-Tail Testing	136
7.5.4	Effect Size	138
7.5.5	How to Do It	139
7.5.5.1	Companion Site Calculators	139
7.5.5.2	Real Statistics Resource Pack.....	140
7.5.5.3	In SPSS	140
7.5.6	Examples	140
7.5.6.1	Example: Different Shaped Distributions.....	140
7.5.6.2	Example: Likert Scale, Small Samples.....	141
7.5.6.3	Example: Likert Scale, Large Samples.....	141
7.5.6.4	Example: Odd Case with a Bimodal Distribution.....	142
7.6	Scoring Categorical Data for Parametric Tests	143
7.6.1	How to Code Categorical Data	146
	References	147
8.	Two-Sample Tests for Individual Measurements.....	149
8.1	Introduction	149
8.2	Wilcoxon’s Matched-Pairs Signed-Ranks Test	150
8.2.1	When It Is Useful	150
8.2.2	What It Is Based On.....	150
8.2.3	Tied Ranks	152
8.2.4	Effect Size.....	152
8.2.5	How to Do It	153
8.2.5.1	In a Spreadsheet	153
8.2.5.2	Real Statistics Resource Pack.....	153
8.2.5.3	Companion Site Calculator	153
8.2.5.4	Online Calculators	154
8.2.5.5	In R Commander.....	154
8.2.5.6	In SPSS	155
8.2.6	Examples	155
8.2.6.1	Example: Attitudes to Recycling.....	155
8.2.6.2	Example: Grazing and Plant Diversity.....	155
8.3	Paired-Samples Student’s <i>t</i> -Test	159
8.3.1	When It Is Useful	159
8.3.2	Effect Size.....	159

8.3.3	How to Do It	159
8.3.3.1	In a Spreadsheet	159
8.3.3.2	Companion Site Calculator	159
8.3.3.3	In R Commander	160
8.3.3.4	In SPSS	160
8.3.3.5	Using a Calculator	160
8.3.3.6	Online Calculators	160
8.3.4	Examples	161
8.3.4.1	Example: Examination Marks	161
8.4	Two-Sample Tests for Independent Data with Individual Measurements	162
8.5	Mann–Whitney <i>U</i> -Test	164
8.5.1	When It Is Useful	164
8.5.2	What It Is Based On	165
8.5.3	Dealing with Tied Ranks	165
8.5.4	Effect Size	166
8.5.5	How to Do It	166
8.5.5.1	Online Calculators	166
8.5.5.2	Real Statistics Resource Pack	166
8.5.5.3	In a Spreadsheet	168
8.5.5.4	Companion Site Calculator	169
8.5.5.5	Using R Commander	169
8.5.5.6	In SPSS	170
8.5.6	Examples	170
8.5.6.1	Example: Exam Performance and Gender	170
8.5.6.2	Example: Biochar	170
8.5.6.3	Example: Schmidt Hammer and Glacial Moraines	171
8.6	Student's <i>t</i> -Test for Two Independent Samples	174
8.6.1	When It Is Useful	174
8.6.2	What It Is Based On	174
8.6.3	Effect Size	175
8.6.4	How to Do It	175
8.6.4.1	In a Spreadsheet	175
8.6.4.2	Online Calculators	176
8.6.4.3	Companion Site Calculator	176
8.6.4.4	In R Commander	177
8.6.4.5	In SPSS	177
8.6.5	Examples	178
8.6.5.1	Example: Male Underperformance	178
8.7	Two Independent Samples: Tests for Difference in Variability	181
8.8	The <i>F</i> -Test for Equality of Variance	181
8.8.1	When It Is Useful	181
8.8.2	What It Is Based On	182
8.8.3	How to Do It	182
8.8.3.1	In a Spreadsheet or Companion Site Calculator	182
8.8.3.2	In R Commander	182
8.8.3.3	In SPSS	183
8.8.3.4	Online Calculators	183
8.8.4	Examples	183
8.8.4.1	Example: Organic Strawberries	183

8.9	Non-Parametric Tests for Equality of Variance	184
8.10	Siegel–Tukey Test	184
8.10.1	When It Is Useful	184
8.10.2	What It Is Based On.....	184
8.10.3	How to Do It	185
8.10.3.1	Online Calculators and Spreadsheets	185
8.10.3.2	In R Commander.....	186
8.10.3.3	In SPSS	186
8.10.4	Examples	186
8.10.4.1	Example: Extremity of Opinion	186
8.10.5	‘Measuring from the Middle’ Approach.....	187
8.11	Kolmogorov–Smirnov Two-Sample Test for Continuous Data	187
8.11.1	When It Is Useful	187
8.11.2	How to Do It	188
8.11.2.1	Companion Site Calculator	189
8.11.2.2	In SPSS and R Commander	189
	References	190
9.	Comparing More Than Two Samples	191
9.1	Introduction.....	191
9.2	‘Family-Wise’ Error and the Bonferroni Correction	191
9.3	K-Sample Tests.....	194
9.3.1	Introduction.....	194
9.4	Complex Chi-Square.....	196
9.4.1	When It Is Useful	196
9.4.2	What It Is Based On.....	196
9.4.2.1	The Data are Counts, Not Percentages or Proportions.....	196
9.4.2.2	The Data Must Be Independent.....	196
9.4.2.3	Adequate Sample Size	197
9.4.3	Effect Size.....	197
9.4.4	How to Do It	197
9.4.4.1	In R Commander.....	198
9.4.4.2	In SPSS	198
9.4.4.3	Online Calculators	199
9.4.5	Examples	199
9.4.5.1	Example: Typical Act of Desperation	199
9.4.5.2	Example: Glacial Deposits.....	202
9.5	Fisher’s Exact Calculation for Small Samples	203
9.5.1	When It Is Useful	203
9.5.2	How to Do It	203
9.5.2.1	In SPSS	203
9.5.2.2	In R Commander.....	203
9.5.2.3	Online Calculators	203
9.5.3	Examples	203
9.5.3.1	Example: Snails.....	203
9.5.3.2	Example: Use of Space	204
9.6	Kruskal–Wallis <i>H</i> -Test.....	205
9.6.1	When It Is Useful	205
9.6.2	What It Is Based On.....	206

9.6.3	Obtaining a Probability Value	206
9.6.4	Effect Size	207
9.6.5	Post Hoc Tests	207
9.6.6	How to Do It	207
9.6.6.1	Real Statistics Resource Pack for Excel	207
9.6.6.2	Companion Site Calculator	208
9.6.6.3	Online Calculators	209
9.6.6.4	In R Commander	209
9.6.6.5	In SPSS	209
9.7	Dunn's Test (Post Hoc Tests for Kruskal–Wallis Test)	212
9.7.1	Effect Size	213
9.7.2	Examples	213
9.7.2.1	Example: Soil Compaction	213
9.7.2.2	Example: Tourist Spending	215
9.8	Jonckheere–Terpstra Trend Test	216
9.8.1	When It Is Useful	216
9.8.2	How It Works	217
9.8.3	One- and Two-Tail Testing, Post Hoc Tests and Effect Size	218
9.8.4	How to Do It	218
9.8.4.1	In SPSS	218
9.8.4.2	Companion Site Calculator	219
9.8.5	Examples	219
9.8.5.1	Example: Age Group Opinions	219
9.9	Friedman's Test	221
9.9.1	When It Is Useful	221
9.9.2	What It Is Based On	221
9.9.3	One- and Two-Tail Testing, Post Hoc Tests and Effect Size	222
9.9.4	How to Do It	222
9.9.4.1	Real Statistics Resource Pack for Excel	223
9.9.4.2	Companion Site Calculator	223
9.9.4.3	In SPSS	223
9.9.4.4	R Commander	224
9.9.5	Examples	224
9.9.5.1	Example: Exam Performance	224
9.9.5.2	Example: Icons of Nationalism	225
9.10	Page's Trend Test	228
9.10.1	When It Is Useful	228
9.10.2	What It Is Based On	228
9.10.3	One- and Two-Tail Testing, Post Hoc Tests and Effect Size	229
9.10.4	How to Do It	229
9.10.5	Examples	230
9.10.5.1	Example: Metal Pollution in a River	230
9.10.5.2	Example: Rental Prices with Distance from City Centre	231

10.	Correlation	235
10.1	Introduction	235
10.2	Assumptions of Correlation Analysis	237
10.2.1	Assumption 1: Data Are Continuous	238

10.2.2	Assumption 2: Most of the Data Are Near the Middle, or They Are Evenly Distributed	239
10.2.3	Assumption 3: The Relationship Forms a Straight Line Rather Than a Curve	240
10.2.4	Assumption 4: No Outliers or Extreme Values	240
10.2.5	Assumption 5: Sample Size Is Large Enough	242
10.3	Pearson's Correlation Coefficient.....	242
10.3.1	<i>R</i> -Squared, <i>r</i> -Values and the Effect Size.....	243
10.3.2	How to Do It	243
10.3.2.1	Companion Site Calculator	243
10.3.2.2	In a Spreadsheet	244
10.3.2.3	Real Statistics Resource Pack for Excel.....	245
10.3.2.4	Online Calculators	245
10.3.2.5	In <i>R</i> Commander.....	246
10.3.2.6	In SPSS	246
10.3.3	Examples	246
10.3.3.1	Example: Tree Growth and Summer Temperature	246
10.3.3.2	Example: Opinions on Global Issues.....	247
10.4	Point-Biserial Correlation.....	248
10.5	Spearman's Rank Correlation or Spearman's Rho	249
10.5.1	When It Is Useful	249
10.5.2	What It Is based On	249
10.5.3	How to Do It	249
10.5.4	Examples	249
10.5.4.1	Example: As Used for Pearson's Correlation.....	249
10.5.4.2	Example: Coastal Zone Vegetation	250
10.5.4.3	Example: Use of Space	251
10.5.4.4	Example: Using Rank Order Rather Than Numbers.....	252
10.5.4.5	Example: Grumpy Old Men.....	253
10.6	Tests for Comparing Two Correlation Coefficients.....	254
10.6.1	Independent Correlation Coefficients.....	254
10.6.1.1	How to Do It.....	254

12.4.6	Two-Tail Test, Equal Sample Sizes.....	303
12.5	Kolmogorov–Smirnov Two-Sample Test	304
12.5.1	Two-Tail Tests, Small Unequal Sizes $n = 5-20$	304
12.5.2	Two-Tail Tests, Small Unequal Sizes $n = 15-30$	304
12.5.3	One-Tail Tests, Small Unequal Sizes $n = 5-20$	305
12.5.4	One-Tail Tests, Small Unequal Sizes $n = 15-30$	305
12.5.5	Two-Tail Tests, Equal Sample Sizes	306
12.5.6	One-Tail Tests, Equal Sample Sizes	307
12.6	Wilcoxon’s Matched-Pairs Signed-Ranks Test	308
12.7	Student’s t -Tests	309
12.7.1	Two-Tail t -Tests	309
12.7.2	One-Tail t -Tests	310
12.8	Mann–Whitney U -Test	311
12.8.1	Small Samples of Equal Size: Sum or Ranks	311
12.8.2	Two-Tail Tests, Small Unequal Samples	312
12.8.3	One-Tail Tests, Small Unequal Samples.....	313

Preface

12.8.4	Two-Tail Tests, Equal Sample Sizes	314
12.8.5	One-Tail Tests, Equal Sample Sizes	315
12.9	F-Test for Equality of Variance	316
12.9.1	Two-Tail Tests, Equal Sample Sizes	316
12.9.2	One-Tail Tests, Equal Sample Sizes	317
12.10	Page's Trend-Test	318
12.10.1	Three to Six Categories	318
12.10.2	Seven to Ten Categories	319
12.11	Pearson's Correlation Coefficient (<i>r</i> -Value)	320
12.11.1	Two-Tail Probabilities	320
12.11.2	One-Tail Probabilities	321
12.12	Spearman's Rank Correlation Coefficient (Rho).....	322
12.12.1	Two-Tail Probabilities	322
12.12.2	One-Tail Probabilities	323
12.13	Durbin-Watson Test	324
12.13.1	One-Tail Critical Values $p = 0.05$	324
12.13.2	One-Tail Critical Values $p = 0.01$	325
12.14	Critical Values from the Standard Normal Distribution (Significance of z-Scores)	326
12.14.1	Single Test Critical Values.....	326
12.14.2	Applying a Bonferroni Correction for Multiple Testing	326
Index	327
