Deconstructing Autism Through the Lens of the Polyvagal Theory: A foreword to <i>Understanding Autism</i> edited by Drs. Papanephytou and Das	xxiii
Personal parent experience	xxx
1. Prologue	1
<i>Neophytos L. Papanephytou</i>	
Section A	
Biological perspective	
2. A perinatal strategy to prevent autism: Essential fatty acids, BDNF, vitamin A, and growth hormone in the prevention and its management	
<i>Undurti N. Das</i>	
Introduction	5
AA and DHA in autism	5
A wearable bioreactor to deliver AA/DHA/BDNF/GH/vitamin A to the brain	6
Intracerebroventricular delivery of AA/DHA, BDNF, vitamin A, and GH for autism	8
References	9
3. Role of vitamin D in modulating gut microbiota, and certain etiological mechanisms of autism spectrum disorder	
<i>Afaf El-Ansary, Khaled Saad, Ramesa Shafi Bhat, Amina Al-Haidan, and Laila Al-Ayadhi</i>	
Introduction	11
Microbiome in health and disease	12
Gut-brain axis (GBA) and autism spectrum disorder	13
The association of vitamin D and GM	14
Role of vitamin D in the maintenance of the intestinal barrier	14
Role of vitamin D in the composition of GM	15

Vitamin D and brain health	15
Vitamin D and control of brain neurotropic factors	16
Role of vitamin D in oxidative stress	16
Neuroprotective effects of vitamin D against glutamate excitotoxicity	17
Effectiveness of vitamin D therapy in neurological disorders and ASD	20
Conclusion	21
Acknowledgments	21
Author contributions	21
Funding	21
Conflicts of interest	21
References	21

Section B

Social perspective

4. Sensory processing, autonomic regulation, and socio-emotional development in autism	
<i>Isabelle Mueller and Ed Tronick</i>	
Introduction	29
Development of ANS and sensory integration	31
Preterm birth as a risk factor for autism, sensory processing disorders, and autonomic dysregulation	33
The role of sensory processing in social interactions	35
Summary	36
References	36

Section C

Assessment

5. Assessment of parenting capacity for parents with autism spectrum disorder	
<i>Kirsten Byrnes and Carol A. Friedman</i>	
Introduction	43
Fundamental legal standards and managing biases	44
ASD, CI, and some of the possible impacts on parenting	47
Conducting of the assessment of parenting capacity	49
Clinical interviews to assess parenting capacity in those diagnosed with ASD and CI	50
Beyond the clinical interview	53
The neuropsychological considerations	55
The neuropsychological parenting assessment	57
Conclusion	64
References	64

6.	Development and feasibility of theory-based nutrition education interventions for adolescents with autism spectrum disorder	
	<i>Acadia W. Buro, Heewon L. Gray, and Russell S. Kirby</i>	
	Overview of the need for nutrition education interventions in adolescents with ASD	71
	Increased risk of obesity	71
	Unhealthy eating habits	72
	Gap in the research	73
	Theoretical foundations	73
	Social cognitive theory	73
	Application of SCT to recent interventions	74
	Recommended framework	79
	Feasibility of implementing interventions in diverse settings	79
	Online	79
	School	81
	Outcome measures and evaluations	81
	Feasibility and acceptability	81
	Psychosocial determinants of dietary intake	82
	Dietary and physical activity behaviors	83
	Anthropometric measures	83
	Future directions in research and practice	83
	Research	83
	Practice	84
	References	84
7.	Challenging clinical presentations in Autism Spectrum Disorders and Intellectual Disability: The case for specialist intensive community interventions as an alternative to institutional care	
	<i>Catherine Sholl and Marinos Kyriakopoulos</i>	
	Introduction	91
	Management considerations for ASD and ID, and coexisting conditions	93
	Treatment and care models in mental health and neurodevelopmental disorders	94
	The pros and cons of inpatient and residential care for people with ASD and ID	95
	The case for intensive community support in ASD and ID	96
	AID-IIT in practice	98
	AID-IIT assessment process	99
	AID-IIT interventions	101
	Caseload and early outcomes of AID-IIT	102
	Conclusions and future directions	104
	References	104

8. A holistic model and treatment of severe autism

Michelle Colletti

Arousal	109
Physiological dysregulation	110
Functional connectivity and autism	111
The life-world of autism	112
Transmembrane currents: Communication through coherence	115
Psychophysiological coherence	117
Nonlinear dynamical systems theory of development	118
Imitation as intervention	120
The mirroring mechanism	122
Synchrony as intervention	124
Case studies	126
Conclusion	128
References	130

9. Home-based support for young autistic children: Overview of a program codesigned with researchers, child therapists, and caregivers

Theodora Papatheodorou and Amy Prescott

Introduction	135
Autism in very young children	136
Sensorimotor and affective reciprocity	137
Early caregiving experiences and brain development	139
First Steps: An early autism family support program	140
Program development	141
The interdisciplinary nature of the program	142
Initial child and family assessment	143
Home visits	144
Concluding phase	144
First Steps implementation: Case study of Anna	145
Anna's portrait	146
Parent and family portrait	148
Home visits: Support for Anna and her parents	149
Concluding phase: End-of-programme report	152
Lessons learned	153
Parents' experience	153
The experience of the therapists	153
Concluding comments	154
Acknowledgments	154
Funding	155
References	155

Section D

Technological advancements**10. Let's play with social robots!—Improving social skills in autistic children through game activities'**

*Anna-Maria Velentza, Sofia Pliasa, Fani Biziou,
and Nikolaos Fachantidis*

Socially Assistive Robots	161
What is it and why are we talking about them?	161
Daisy robot	163
A robot to support kids in the autism spectrum	163
ARRoW	164
But how to use a robot like that?	164
Experimental design	166
Has it been tested?	166
Conclusion	170
References	170

Section E

Journey with autism**11. Engendering quality of life: Ecological realities in developmental relational trans-disciplinary pediatric practice in a neurodiverse world**

*Ruby Moye Salazar, Stacy Sue Rosello, and
Mary Ann O'Connell*

Human connections: Lifespan developmental integration	175
Therapeutic perspectives of ecological systems within transdisciplinary practice	176
Contributions from mental health: The power of relationships	177
The family as the first system and conduit to other systems	178
Bioecological model and influences	179
What children and families need	180
An OT view of interconnected ecological systems	184
Defining ecological systems in families	185
Interconnected body systems: Intrapersonal parts of the whole in development	185
Dynamic neurobiological profiles: Human connections within the microsystem	187
Strength-based operationalization of systems in an ecological milieu: Order, resilience and family life balance	189
A speech-language pathologist's understanding of ecosystems and communication	193
Communication, language, and speech development	194
A final message: The developmental, individual differences, relationship-based model	201

Human connections, systems and an integrated transdisciplinary approach	203
References	203
12. Caring for the caregiver of those living with autism-spectrum disorders: Minimizing burden and optimizing well-being	
<i>Leanne Katz Levin and Yanivis Machado-Gonzalez</i>	
Introduction	209
The child living with ASD: An overview	210
Potential manifestations of ASD	211
Childhood ASD and parent's stress	212
Objective and subjective burden of ASD in parents	213
The role of the healthcare provider in caring for the caregiver	216
Coping methods for managing stress	220
Mental health interventions for managing stress	220
Social support	221
Individual psychotherapy, couples counseling	230
Family impact	231
Other relevant interventions	231
Self-compassion and self-care	232
Conclusion	235
References	236
13. Special Olympic movement as new opportunities for socialization of children with mental disabilities, including ASD	
<i>Olga G. Safonicheva and Marina A. Ovchinnikova</i>	
Introduction	245
Steps in the Special Olympics formation	245
Eligibility for participation in Special Olympics	247
Special Olympics in Russia	247
Organization of sports and recreational work in a special correctional boarding school No.81	250
Educational work	250
Extracurricular activities	252
Interdisciplinary Pilot project	254
Research materials	255
Unified competitions in January–February 2023	260
Conclusions	262
References	262

14. The hidden meanings of repetitive behaviors: A window into the child's inner world from a multidisciplinary perspective	
<i>Yana Peleg, Yael Bruck Binya, and Gilbert M. Foley</i>	
Repetition in typical development and daily life	266
Causal contributions and layers of functional meanings	268
Sensory processing and regulation	268
Complex information processing	270
Regulation of anxiety	272
Traumatic reenactment	273
A form of mastery and control	275
Desensitization and habituation of the traumatizing stimuli	275
A replacement for feelings of fear and helplessness with an illusion of omnipotence	275
A means of altering mood and states of consciousness	276
Executive function, cognitive organization planning, and adaptation	277
Functions of repetitive behaviors and interests	278
Treatment model and paradigm	279
Case vignette	282
Conclusion	287
References	287
15. Individuated but not separated: A hypothetical understanding of anxiety in autism and DIR/psychodynamic intervention paradigm	
<i>Gilbert M. Foley and Tal Baz</i>	
Attachment-separation-individuation in typical development	294
Autism and attachment	297
Autism and comorbid anxiety	298
Divergent patterns in progression of attachment-separation-individuation	300
Description of the treatment paradigm: Intersection of psychodynamic and developmental, individual-difference, and relationship approaches	302
A therapeutic case study	305
Adam's history	306
Treatment plan	308
Treatment impasse	308
Vignettes from treatment	309
References	318

16. Nurture social skills in autism in a postpandemic era	
<i>Luísa Soares</i>	
Introduction	323
The clinical case of <i>baby Joseph</i>	324
Relevant aspects to be highlighted in his family history toward a comprehensive analysis	325
This person has a whole range of skills and strengths...	326
Emotional and behavior self-regulation skills with children in autistic spectrum disorder (ASD)	327
Each child with ASD is a unique individual	329
References	332
17. Justice for all? The overrepresentation of those with autism spectrum disorder in the criminal justice system	
<i>Kirsten Byrnes and Korab Idrizi</i>	
Introduction	335
Interactions with the law enforcement	336
The stigma of violence regarding ASD population	337
Criminal behavior	339
Comorbid risk factors for criminal behavior	341
Perceptions of individuals with ASD in law enforcement or criminal justice interactions	342
Possible systems interventions	344
References	346
18. Autism and metamorphic temporalities	
<i>Majia Nadesan</i>	
Objective time and autism	353
Subjective time and autism	355
Intersubjective time	358
Metamorphic temporalities	361
References	362
19. Opportunities to support the caregivers of children and young adults with ASD as they transition into the workforce and university	
<i>Allyson Kristofik and Katandria Johnson</i>	
Introduction	365
US pilot curriculum at Tarrant County college	366
Barriers to success and caregiver strain	367
Opportunities and caregiver support	368
Caregiver outreach	369
References	370

20. Using desensitize program to reduce phobias and specific fears in children with autism

Chafica Mansour Gharbieh

Introduction	373
Statement of the problem	374
Purpose of this study	374
Related studies	374
Desensitize program	375
Research procedures and measures	376
Reliability, validity, and ethical considerations	376
Pre- and posttreatment	377
Methods	380
Participants	381
Triangulation	381
Gradual exposure to taking the medicine	382
Summary of results	384
Discussion	389
Implications	389
Conclusions	389
References	390

21. When the construction of meaning does not have an overall collective dimension: The nature of linguistic anomalies in autism

Paola Pennisi

Embodied cognition and meaning making	393
Case study number 1	396
Case study number 2	397
Body coordination and meaning making	399
Brain anomalies for the construction of meaning making	400
To learn language "from outside the body"?	401
Manipulating one's body around space or manipulating objects in space?	404
References	408

22. Crime and punishment: The role of social, emotional, and cognitive deficits in a case of child pornography possession

Kirsten Byrnes

Considerations of the influence of ASD in Kevin's possession of child pornography	413
Public perceptions of those in possession of child pornography	418

Judicial discretion in child pornography cases	419
Conclusion	420
References	420
23. Enhancing coping and resilience in bullied youth with autism spectrum disorder (ASD)	
<i>Kie Fujii, Korab Idrizi, Carol A. Friedman, and Kirsten Byrnes</i>	
Autism spectrum disorder and bullying	423
Risk factors of bullying	424
Verbal and relational bullying and ASD	425
Physical bullying and ASD	426
Cyberbullying and ASD	427
School setting, autism severity, and bullying	428
Potential causes of school refusal, comorbidities, and bullying	430
Sibling bullying	431
Parental stress mediates bullying outcomes	432
Consequences of bullying in the general population	433
ASD in relation to gun violence	434
Effects of bullying on the ASD population	435
Treatment in the aftermath of bullying in individuals with ASD	436
Antibullying interventions	437
Expectations for the future	438
Disclaimers	439
References	439
24. Aquatactile neuromodulation and its impact on the development and correction of motor functions in children with ASD	
<i>Irina N. Rakhmanina, Tatyana Yu. Ovsyannikova, Olga G. Fatkhi, and Olga G. Safonicheva</i>	
Introduction	445
Goals	446
Materials and methods	447
Results and discussion	451
Conclusions	455
References	455
