

TABLE of CONTENTS

of

Part II

Introduction

PROJECT III (abbreviated version)

cis,trans-Asymmetry
axis-ring molecular aggregates
HD-asymmetry
conversion isomerism
sterically hindered ethers

PROJECT IV

Thiocarbamates, R-SCONH₂, from thiocyanates „Riemschneider’s Reaction“
Benzothiazole derivatives - dequaternizing nucleophilic substitution of benzothiazoliumsalts
Thiocyanates, thioethers, thiolic acids
Industrial activities of the author:
in Brazil: “Thiocarbamates, Carbamates” – “Sangue artificial”
in Japan: “Ulcustherapeutikum CELLRYL” - “EVANGILE” (Pola)

PROJECT V

Iodine substitution methods and other analytical and methodical papers
Plant technology I, II, and III
BSE crisis – Alternative solutions

PROJECT VI

Halocarbon-based contact insecticides synthetic compounds
PEST CONTROL based on natural compounds
New ways of PEST CONTROL

PROJECT VII

Reflections on the “Constitution and Action” and on the “Configuration and Action” within certain groups of low molecular substances.
The spatial structure and activity of representatives of groups: a) DDT: PROJ VII, b) HCH and DIENE: PROJ VIII, IX, XI, c) thalidomides, atebines, and barbituric acid analogues: PROJ VII
APPENDIX: Permeation studies

Looking back on Part I
