

<b>About the Author</b> .....	6
<b>Acknowledgments</b> .....	7
<b>Introduction</b> .....	8
<b>1 Theoretical foundations of artificial intelligence</b> .....	10
1.1 From Turing's test to the Chinese room .....	11
1.2 AI architecture .....	13
1.3 Definition and characteristics of artificial intelligence .....	15
<b>2 Historical development and penetration of AI into media and marketing</b> .....	20
2.1 Early forms and first interactions .....	21
2.2 The digital revolution and the birth of personalisation .....	23
2.3 AlexNet and the dawn of deep learning .....	25
<b>3 Current applications of AI in the media and marketing segment</b> .....	28
3.1 Automation and content generation .....	29
3.2 Hyperpersonalisation and predictive analytics .....	30
3.3 Artificial media and the problem of deepfakes .....	32
<b>4 Analysis of the perception of artificial intelligence in the Slovak environment</b> .....	34
4.1 Demographic profile of respondents and research methodology .....	35
4.2 General knowledge and frequency of AI use .....	36
4.3 Perception of quality, trustworthiness and authenticity .....	37
4.4 Concerns, perceived threats and transparency requirements .....	39
4.5 Impact on consumer behaviour and information seeking .....	41
4.6 Demographic and psychographic factors influencing the perception of AI .....	43
<b>5 The role of media and marketing communication in shaping artificial intelligence</b> .....	45
5.1 Media framing .....	46
5.2 Marketing communication and hype cycle .....	48
5.3 Culture as a shaping force .....	49
5.4 Synthesis of insights and perceived reality .....	50
<b>6 New professions, skills and models of cooperation in the era of artificial intelligence</b> .....	51
6.1 Change in traditional roles .....	52
6.2 New archetypes of professional workers .....	54
6.3 New models of creative and strategic processes .....	55
6.4 Cognitive biases in practice .....	57

6.5 A new social contract in the creative industry.....	58
<b>7 Summary and strategic implications and models for responsible AI implementation.....</b>	<b>60</b>
7.1 From perception to communication strategy.....	61
7.2 The human-in-the-loop model.....	62
7.3 Building trust through AI content labelling.....	63
7.4 Skills and organisational transformation.....	64
7.5 From a technological tool to a socio-technical system.....	65
<b>8 Ethical and regulatory challenges.....</b>	<b>66</b>
8.1 When AI unintentionally discriminates.....	67
8.2 The black box problem and the need for explainability (XAI).....	68
8.3 Practical limits and challenges of explainability.....	70
8.4 Legal framework.....	71
8.5 Copyright in the era of generative AI.....	73
8.6 Environmental impact and sustainability.....	75
<b>Conclusions.....</b>	<b>76</b>
<b>Literature.....</b>	<b>78</b>
