Keeping Up

From 80th anniversary celebrations to fighting wildfire and legislative victory, IWP&DC keeps up with some of the latest news from across the US and Canada

18

Forming a strategic partnership

Co-locating digital infrastructure with hydropower facilities can be advantageous for both industries.

20

Bright sparks from the show floor

A snapshot of news, launches and innovations from a cross-section of exhibitors lighting up this year's Clean Currents show

Cyber security

29

Securing the flow

As cyber attacks on critical infrastructure rise, the water and power sector faces mounting risks from legacy systems, underinvestment and growing regulatory pressure

Underground construction

30

Digging for a greener future

Major schemes in Austria, China, and Germany are applying advanced underground construction techniques to deliver new hydropower and pumped storage capacity

32

Keeping cool, staying safe

Ventilation and safety management are key issues to be addressed when hydropower construction ventures underground

Wave & tidal power

34

More than a drop in the ocean

Marine energy potential

Dam safety

38

A sustained commitment

US dam safety demands sustained funding and policy.

42

Remote sensing, real impact

InSAR monitors surface deformations

Large dams

45

A marvel of engineering

The role of large dams.

46

Polihali Dam: engineering insights

Insights into design innovations and challenges
