

CHAPTER 1 APPROACH TO THE POISONED PATIENT

1.1	Overview	2
1.2	Resuscitation	4
1.3	Risk assessment	11
1.4	Supportive care and monitoring	13
1.5	Investigations	15
1.6	Gastrointestinal decontamination	18
1.7	Enhanced elimination	24
1.8	Antidotes	29
1.9	Disposition	30

CHAPTER 2 SPECIFIC CONSIDERATIONS

2.1	Coma	36
2.2	Hypotension	40
2.3	Seizures	42
2.4	Approach to delirium	45
2.5	Serotonin toxicity	50
2.6	Anticholinergic toxicity	55
2.7	Cholinergic toxicity	59
2.8	Neuroleptic malignant syndrome	62
2.9	Alcohol use disorder	67
2.10	Amphetamine use disorder	76
2.11	Opioid use disorder	78
2.12	Sedative-hypnotic use disorder	82
2.13	Solvent abuse	85
2.14	Body packers and stuffers	89
2.15	Osmolar gap	93
2.16	Acid-base disorders	96
2.17	The 12-lead ECG in toxicology	101
2.18	Approach to mushroom poisoning	109
2.19	Approach to plant poisoning	117
2.20	Poisoning during pregnancy and lactation	123
2.21	Poisoning in children	124
2.22	Poisoning in the elderly	130

CHAPTER 3 SPECIFIC TOXINS

3.1	Alcohol: Ethanol	136
3.2	Alcohol: Ethylene glycol	139
3.3	Alcohol: Isopropanol (isopropyl alcohol)	144
3.4	Alcohol: Methanol (methyl alcohol)	146
3.5	Alcohol: Other toxic alcohols	151
3.6	Amisulpride	155
3.7	Amphetamines and amphetamine-like substances	158
3.8	Angiotensin-converting enzyme inhibitors (ACEIs) and angiotensin II receptor blockers (ARBs)	163
3.9	Anticoagulant rodenticides	165
3.10	Anticonvulsants: Newer agents	168
3.11	Antihistamines (non-sedating)	170
3.12	Antihistamines (sedating)	172

3.13	Arsenic	175
3.14	Baclofen	179
3.15	Barbiturates	181
3.16	Benzodiazepines	185
3.17	Benztropine	187
3.18	Beta-blockers	189
3.19	Bupropion	192
3.20	Button batteries	195
3.21	Calcium channel blockers (CCBs)	197
3.22	Cannabinoids and synthetic cannabinoid receptor agonists (SCRAs)	201
3.23	Carbamazepine	205
3.24	Carbon monoxide	208
3.25	Chloral hydrate	212
3.26	Chloroquine and hydroxychloroquine	215
3.27	Clonidine and other central α_2 -adrenergic agonists	218
3.28	Clozapine	221
3.29	Cocaine	223
3.30	Colchicine	226
3.31	Corrosives	229
3.32	Cyanide	234
3.33	Digoxin: Acute overdose	237
3.34	Digoxin: Chronic poisoning	243
3.35	Diphenoxylate–atropine	249
3.36	Direct oral anticoagulants	251
3.37	Gamma-hydroxybutyrate (GHB)	256
3.38	Glyphosate	259
3.39	Hydrocarbons	262
3.40	Hydrofluoric acid	266
3.41	Hydrogen peroxide	269
3.42	Insulin	272
3.43	Iron	275
3.44	Isoniazid	280
3.45	Lamotrigine	282
3.46	Lead	285
3.47	Lithium: Acute overdose	289
3.48	Lithium: Chronic poisoning	292
3.49	Local anaesthetic agents	294
3.50	Mercury	297
3.51	Metformin	303
3.52	Methotrexate	306
3.53	Mirtazapine	310
3.54	Monoamine oxidase inhibitors (MAOIs)	311
3.55	Non-steroidal anti-inflammatory drugs (NSAIDs)	314
3.56	Olanzapine	317
3.57	Opioids	319
3.58	Organochlorines	322
3.59	Organophosphorus agents (organophosphates and carbamates)	325
3.60	Paracetamol: Immediate-release preparations (acute overdose)	330
3.61	Paracetamol: Modified-release formulations	337
3.62	Paracetamol: Repeated supratherapeutic ingestion	342
3.63	Paraquat	345
3.64	Phenothiazines and butyrophenones (antipsychotic agents)	350
3.65	Phenytoin	352
3.66	Potassium chloride	355
3.67	Pregabalin	358
3.68	Quetiapine	360
3.69	Quinine	362
3.70	Risperidone	365
3.71	Salicylates	367

3.72	Selective serotonin reuptake inhibitors (SSRIs)	371
3.73	Strychnine	374
3.74	Sulfonylureas	377
3.75	Theophylline	380
3.76	Thyroxine	383
3.77	Tramadol and tapentadol	385
3.78	Tricyclic antidepressants (TCAs)	388
3.79	Valproic acid (sodium valproate)	393
3.80	Venlafaxine and desvenlafaxine	397
3.81	Warfarin	400

CHAPTER 4 ANTIDOTES

4.1	Atropine	406
4.2	Calcium	407
4.3	Cyproheptadine	410
4.4	Desferrioxamine	411
4.5	Digoxin immune fab	413
4.6	Dimercaprol	417
4.7	DMSA (succimer) and DMPS (unithiol)	420
4.8	Ethanol	422
4.9	Flumazenil	424
4.10	Folinic acid	426
4.11	Fomepizole	428
4.12	Glucose	430
4.13	Hydroxocobalamin	432
4.14	Insulin (high-dose)	434
4.15	Intravenous lipid emulsion	437
4.16	Methylene blue	439
4.17	N-acetylcysteine	441
4.18	Naloxone	444
4.19	Octreotide	446
4.20	Penicillamine	448
4.21	Physostigmine	450
4.22	Pralidoxime	452
4.23	Pyridoxine	454
4.24	Sodium bicarbonate	456
4.25	Sodium calcium edetate	460
4.26	Sodium thiosulfate	462
4.27	Vitamin K	464

CHAPTER 5 ENVENOMINGS

5.1	Approach to snakebite	468
5.2	Black snake	475
5.3	Brown snake	478
5.4	Death adder	481
5.5	Tiger snake group	484
5.6	Taipan	488
5.7	Sea snakes	491
5.8	Australian scorpions	493
5.9	Bluebottle jellyfish (<i>Physalia</i> species)	495
5.10	Stonefish	496
5.11	Box jellyfish	498
5.12	Irukandji syndrome	501
5.13	Blue-ringed octopus	503
5.14	Redback spider	505
5.15	Funnel-web (big black) spider	508
5.16	White-tailed spider	510
5.17	Ticks	512

CHAPTER 6 ANTIVENOMS

6.1	Black snake antivenom	516
6.2	Brown snake antivenom	517
6.3	Death adder antivenom	519
6.4	Tiger snake antivenom	521
6.5	Taipan antivenom	523
6.6	Sea snake antivenom	525
6.7	Polyvalent snake antivenom	527
6.8	Stonefish antivenom	528
6.9	Box jellyfish antivenom	530
6.10	Redback spider antivenom	532
6.11	Funnel-web spider antivenom	534
6.12	Allergic reactions to antivenom	535

APPENDICES

Appendix 1:	Poisons information telephone numbers	538
Appendix 2:	Conversion factors and therapeutic ranges for important toxins	539
Appendix 3:	N-Acetylcysteine (NAC) IV infusion for paracetamol poisoning	540
Appendix 4:	Alcohol withdrawal score	541
Appendix 5:	Alcohol pathways	543

Index	545
