## **SECTION 1 Neuropsychiatric disorders and epigenetics: general aspects**

---

<b>CHAPTER 1 Introduction to Neuropsychiatric disorders and epigenetics .....</b>	<b>3</b>
<i>Jacob Peedicayil and Dennis R. Grayson</i>	
1 Introduction .....	3
2 Neuropsychiatry and neuropsychiatric disorders.....	3
3 Historical outline of neuropsychiatric disorders.....	4
4 Neuropsychiatric disorders and epigenetics .....	5
5 Epigenetics and neuropsychiatric disorders: Translational aspects .....	6
Abbreviations.....	7
Glossary .....	7
References.....	7
<b>CHAPTER 2 Environmental factors and epigenetics of neuropsychiatric disorders .....</b>	<b>11</b>
<i>Jacob Peedicayil</i>	
1 Introduction .....	11
2 The epigenetic dimension of neuroplasticity.....	12
3 Molecular epigenetic mechanisms.....	13
3.1 Epigenetic tagging of DNA.....	13
3.2 Epigenetic tagging of histones .....	15
4 Early-life adversity as a major risk factor for neuropsychiatric disorders .....	16
5 The stress system as a mediator of early-life adversity .....	17
5.1 Epigenetic programming of the stress system.....	19
5.2 Epigenetic programming of the glucocorticoid receptor by early-life experiences .....	19
5.3 Programming of Fkbp5 by glucocorticoids and early-life adversity .....	22
5.4 Epigenetic programming of hypothalamic neuropeptides by early-life adversity.....	23
5.5 Epigenetic programming of CRH.....	23
5.6 Epigenetic programming of Avp by early-life adversity.....	25
5.7 Epigenetic programming of pituitary Pomc by early-life adversity .....	26
6 Cell type—specific and sex-specific epigenetic effects of early-life stress on the brain .....	26

<b>7</b>	Psychosocial factors during life in the pathogenesis of neuropsychiatric disorders .....	26
<b>8</b>	Other environmental factors acting epigenetically in the pathogenesis of neuropsychiatric disorders .....	26
8.1	Maternal antenatal stress .....	27
8.2	Migration .....	28
8.3	Poverty .....	28
8.4	Urban life .....	28
8.5	Pregnancy and birth complications .....	28
8.6	Alcohol and drug abuse .....	28
8.7	Microbiota .....	29
<b>9</b>	Conclusions .....	29
	Abbreviations .....	29
	Glossary .....	30
	Acknowledgments .....	30
	References .....	30
	Further reading .....	35

**CHAPTER 3 Epigenetic biomarkers in neuropsychiatric disorders ..... 37**

*Dennis R. Grayson and Jacob Peedicayil*

<b>1</b>	Introduction .....	37
<b>2</b>	DNA methylation of candidate genes as markers of psychiatric disorders .....	39
2.1	Glucocorticoid receptor ( <i>NR3C1</i> ) .....	40
2.2	Other candidate genes and epigenome-wide analyses .....	42
<b>3</b>	DNA methylation and hydroxymethylation study of alcohol use disorder .....	43
<b>4</b>	DNA methylation as an indicator of epigenetic age .....	44
<b>5</b>	Future directions .....	45
	Abbreviations .....	46
	Glossary .....	46
	References .....	46

**SECTION 2 Epigenetics of neuropsychiatric disorders**

**CHAPTER 4 Epigenetics and cognitive disorders—translational aspects ..... 53**

*Fabio Coppedè*

<b>1</b>	Introduction: epigenetics and cognitive disorders .....	53
<b>2</b>	DNA methylation and histone tail modifications .....	53
<b>3</b>	Epigenetic changes in Alzheimer's disease .....	56
3.1	DNA methylation in Alzheimer's disease .....	56
3.2	Histone tail modifications in Alzheimer's disease .....	57
<b>4</b>	Epigenetic changes in Parkinson's disease .....	58

4.1	DNA methylation in Parkinson's disease .....	58
4.2	Histone tail modifications in Parkinson's disease .....	59
<b>5</b>	<b>Epigenetic changes in Huntington's disease .....</b>	<b>59</b>
5.1	DNA methylation in Huntington's disease .....	59
5.2	Histone tail modifications in Huntington's disease .....	59
<b>6</b>	<b>Epigenetic drugs.....</b>	<b>60</b>
6.1	DNMT inhibitors .....	60
6.2	HDAC inhibitors.....	60
<b>7</b>	<b>Natural compounds exerting epigenetic properties.....</b>	<b>62</b>
<b>8</b>	<b>The epigenetic properties of the gut microbiota metabolites .....</b>	<b>63</b>
<b>9</b>	<b>Manipulation of epigenetic mechanisms for the treatment of Alzheimer's disease .....</b>	<b>63</b>
<b>10</b>	<b>Manipulation of epigenetic mechanisms for the treatment of Parkinson's disease .....</b>	<b>66</b>
<b>11</b>	<b>Manipulation of epigenetic mechanisms for the treatment of Huntington's disease .....</b>	<b>67</b>
<b>12</b>	<b>Epigenome editing in cognitive disorders.....</b>	<b>69</b>
<b>13</b>	<b>Conclusions .....</b>	<b>69</b>
	List of acronyms and abbreviations .....	70
	Glossary .....	71
	References.....	72
<b>CHAPTER 5</b>	<b>Epigenetics of autism spectrum disorder .....</b>	<b>81</b>
	<i>Andrea Gropman and Charles Jake Sadle</i>	
<b>1</b>	<b>Introduction .....</b>	<b>81</b>
<b>2</b>	<b>Epidemiological understanding of ASD.....</b>	<b>81</b>
<b>3</b>	<b>Genetic understanding of ASD.....</b>	<b>82</b>
3.1	Monogenic causes .....	83
3.2	Microdeletions and duplications .....	83
3.3	Copy number variants (CNVs).....	84
3.4	Single nucleotide variations (SNVs).....	84
3.5	Tandem repeat expansions .....	84
3.6	Somatic mosaicism.....	85
3.7	Summarizing the heredity of ASD .....	85
3.8	Summarizing what these ASD-associated genes do.....	85
<b>4</b>	<b>Epigenetic regulator genes implicated in ASD .....</b>	<b>86</b>
4.1	Histone protein mutations .....	86
4.2	DNA and CpG island methylation.....	86
4.3	DNA methylation mutations .....	88
4.4	Histone methyltransferases.....	88
4.5	Histone demethylases .....	88

4.6	Histone deacetylase .....	89
4.7	Histone acetyltransferase (HAT) .....	89
4.8	Abnormal chromatin folding .....	89
4.9	Future epigenetic avenues .....	90
<b>5</b>	<b>Epigenetic imprinting patterns in ASD .....</b>	<b>90</b>
5.1	How imprinting is assessed in ASD .....	90
5.2	Differentially methylated CpG sites in ASD versus control .....	90
5.3	15q11-q13 as a possible neurodevelopmental epigenetic loci .....	91
5.4	Impaired excitatory/inhibitory balance and ASD .....	91
5.5	GABA is an excitatory epigenetic factor in gestational neurodevelopment.....	91
5.6	GABA and the cerebellum in ASD .....	92
5.7	ASD imprinting pattern conclusion .....	92
<b>6</b>	<b>Epigenetic sex differences in ASD .....</b>	<b>92</b>
6.1	Introduction .....	92
6.2	Oxytocin and sex-specific neurodevelopment .....	93
6.3	Oxytocin as an ASD therapy .....	94
<b>7</b>	<b>Acquired epigenetic changes associated with ASD .....</b>	<b>94</b>
7.1	Introduction .....	94
7.2	Neuroinflammation, epigenetics, and ASD .....	95
7.3	Small (<2.5 $\mu$ m) particulate exposure.....	95
7.4	Advanced parental age .....	96
7.5	Valproic acid.....	96
7.6	Ketogenic diet.....	97
7.7	Folate-methionine pathway enzymes.....	97
<b>8</b>	<b>Conclusions .....</b>	<b>97</b>
	Abbreviations .....	98
	Glossary .....	98
	References.....	98
<b>CHAPTER 6</b>	<b>Epigenetic causes of intellectual disability—the fragile X syndrome paradigm .....</b>	<b>103</b>
	<i>E. Tabolacci and G. Neri</i>	
1	Introduction .....	103
2	Fragile X syndrome.....	105
3	The <i>FMR1</i> gene and the FMRP protein .....	107
4	Different transcripts at the <i>FMR1</i> locus .....	110
5	Epigenetic modifications of the <i>FMR1</i> locus and the enigma of unmethylated full mutation alleles .....	112
6	Translational strategies.....	115
	Abbreviations .....	117
	Glossary .....	118
	References.....	118

<b>CHAPTER 7</b>	<b>Epigenetics of attention-deficit hyperactivity disorder</b> .....	<b>125</b>
	<i>Jacob Peedicayil</i>	
1	Introduction .....	125
2	Pathophysiology of attention-deficit hyperactivity disorder .....	125
3	Scope for epigenetics in attention-deficit hyperactivity disorder.....	126
4	The role of epigenetics in the pathogenesis of attention-deficit hyperactivity disorder .....	126
4.1	The role of DNA methylation in the pathogenesis of attention-deficit hyperactivity disorder.....	126
4.2	The role of histone modifications in the pathogenesis of attention-deficit hyperactivity disorder.....	129
4.3	The role of noncoding RNAs in the pathogenesis of attention-deficit hyperactivity disorder.....	130
5	Epigenetics in the diagnosis of attention-deficit hyperactivity disorder.....	131
6	Epigenetics in the treatment of attention-deficit hyperactivity disorder.....	131
7	Conclusions .....	132
	Abbreviations.....	132
	Glossary .....	133
	Acknowledgments.....	133
	References.....	133
	Further reading .....	137
<b>CHAPTER 8</b>	<b>Epigenetics and Down syndrome</b> .....	<b>139</b>
	<i>Luis A. González Molina, Alain D. Dekker, Peter P. De Deyn, Amalia M. Dolga and Marianne G. Rots</i>	
1	Introduction .....	139
2	Epigenetic mechanisms affect learning and memory.....	141
3	Altered DNA methylation is associated with DS.....	143
3.1	DNA methylation in DS.....	145
3.2	DNA demethylation in DS .....	149
4	Altered histone modifications are associated with DS .....	150
4.1	Post-translational histone tail modifications .....	150
4.2	Histone core variants and constitutive chromatin proteins.....	153
5	Epigenetics in DS: a link to Alzheimer's disease .....	154
6	Mitochondrial DNA methylation in Down syndrome and Alzheimer's disease .....	155
7	Epigenetic therapy may alleviate cognitive deficits in DS .....	159
8	Conclusions .....	163
	Abbreviations.....	164
	Glossary .....	166
	Acknowledgments.....	166
	References.....	166

<b>CHAPTER 9</b>	<b>Epigenetics and multiple sclerosis.....</b>	<b>183</b>
	<i>Lara Kular, Gonçalo Castelo-Branco and Maja Jagodic</i>	
1	Multiple sclerosis: introduction .....	183
2	Overview of epigenetic studies performed in MS.....	186
2.1	DNA methylation .....	187
2.2	Histone posttranslational modifications .....	201
2.3	Histone changes in immune cells and in CNS tissue in MS.....	202
3	Challenges in epigenetic studies.....	203
4	Potential roles of epigenetic changes in MS .....	204
4.1	Potential role of epigenetic mechanisms in mediating genetic risk.....	205
4.2	Potential roles of epigenetic modifications in mediating environmental risks.....	207
5	Utility of epigenetics in diagnosis, prognosis, and treatment of MS .....	210
5.1	Epigenetic patterns as a biomarker.....	210
5.2	Therapeutic methods based on epigenetics .....	211
6	Conclusions and future perspectives.....	212
	Abbreviations.....	214
	Glossary .....	214
	References.....	215
<b>CHAPTER 10</b>	<b>Epigenetics of migraine .....</b>	<b>225</b>
	<i>Parisa Gazerani</i>	
1	Migraine .....	225
2	Epigenetics .....	226
3	Migraine and epigenetic interface .....	226
4	Epigenetic mechanisms in migraine .....	227
4.1	DNA methylation .....	227
4.2	Histone modifications.....	229
4.3	Noncoding RNAs .....	230
5	Epigenetic therapy.....	232
6	Concluding remarks and future perspectives.....	232
	Abbreviations.....	233
	Glossary .....	233
	References.....	233
<b>CHAPTER 11</b>	<b>The role of epigenetics in the pathophysiology of epilepsy .....</b>	<b>239</b>
	<i>Kyung-Ok Cho</i>	
1	Introduction .....	239
2	General overview of epilepsy and its basic mechanisms.....	240
2.1	Classification of seizures.....	240
2.2	Classification of epilepsy .....	240

2.3 Cellular alterations induced by acute seizures ..... 241

2.4 Management of epilepsy ..... 245

**3 Epigenetic modifications in epilepsy ..... 246**

3.1 DNA methylation ..... 246

3.2 Histone modifications ..... 248

3.3 Noncoding RNAs ..... 251

3.4 ATP-dependent chromatin remodeling complex ..... 257

**4 Neuropsychiatric aspects of epilepsy ..... 258**

**5 Conclusions ..... 259**

Abbreviations ..... 260

Glossary ..... 262

Acknowledgments ..... 262

References ..... 262

**CHAPTER 12 Epigenetic dysregulation in brain tumors ..... 269**

*Jacob Peedicayil and Ananth P. Abraham*

**1 Introduction ..... 269**

**2 Epigenetic dysregulation in pediatric brain tumors ..... 270**

2.1 DNA methylation changes in pediatric brain tumors ..... 270

2.2 Epigenetic dysregulation in pediatric tumors involving histones ..... 270

2.3 Dysregulation of noncoding RNAs in pediatric brain tumors ..... 272

2.4 INI-1 and other SWI/SNF complexes in atypical teratoid rhabdoid tumors ..... 272

2.5 Emerging epigenetic mutations in medulloblastomas ..... 273

**3 Epigenetic dysregulation in adult brain tumors ..... 273**

3.1 DNA methylation changes in adult brain tumors ..... 273

3.2 Histone modifications in adult brain tumors ..... 274

3.3 Dysregulation of noncoding RNAs in adult brain tumors ..... 274

3.4 IDH mutations in adult gliomas ..... 274

3.5 ATRX mutations in adult gliomas ..... 275

3.6 Other emerging epigenetic mutations in adult gliomas ..... 275

**4 Tumor cell of origin and epigenetics ..... 276**

**5 Emerging epigenetic diagnostics for brain tumors ..... 276**

5.1 DNA methylation for diagnostics of brain tumors ..... 276

5.2 Histone modifications for diagnostics of brain tumors ..... 276

5.3 Noncoding RNAs for diagnostics of brain tumors ..... 277

**6 Emerging epigenetic therapies for brain tumors ..... 277**

**7 Epimutations and neurocognitive dysfunction versus carcinogenesis ..... 277**

**8 Neuropsychiatric aspects of brain tumors ..... 278**

**9 Conclusions ..... 278**

Abbreviations ..... 279

Glossary .....	279
Acknowledgment .....	279
References.....	280
<b>CHAPTER 13 Epigenetics and cerebrovascular diseases.....</b>	<b>287</b>
<i>Jacob Peedicayil and Sanjith Aaron</i>	
1 Cerebrovascular diseases—introduction.....	287
2 Vascular stroke risk factors.....	288
3 Intermediate phenotypes/endophenotypes.....	289
4 Genetic risk factors and stroke .....	289
5 Monogenic causes of stroke .....	290
6 Stroke as a complex polygenic disorder.....	290
7 Evidence for abnormal epigenetic mechanisms in the pathogenesis of stroke .....	291
7.1 Abnormalities of DNA methylation in stroke .....	291
7.2 5-hydroxymethylcytosine and stroke .....	293
7.3 Abnormalities of histone modifications in stroke.....	295
7.4 Abnormalities of noncoding RNAs (miRNAs) in stroke .....	295
8 Modifiable stroke risk factors and epigenetics.....	296
8.1 Epigenetics of atherosclerosis .....	296
8.2 Epigenetics of hypertension .....	297
8.3 Epigenetics of type 2 diabetes mellitus .....	298
8.4 Epigenetics of hyperlipidemia and obesity.....	298
8.5 Epigenetics of atrial fibrillation.....	299
8.6 Epigenetics of cigarette smoking.....	299
8.7 Epigenetics of nutrition and diet.....	299
9 Tissue specificity: which is the best tissue for studying stroke epigenetics?.....	300
10 Epigenetics in the diagnosis and treatment of stroke .....	300
11 Neuropsychiatric aspects of cerebrovascular diseases .....	301
12 Conclusions .....	301
Abbreviations.....	302
Glossary .....	303
Acknowledgments.....	303
References.....	303
<b>CHAPTER 14 The epigenetics of anxiety .....</b>	<b>311</b>
<i>Troy A. Richter, Lily J. Baraty and Richard G. Hunter</i>	
1 Introduction .....	311
2 Neuroanatomy of anxiety disorders.....	311
3 Neuroendocrine axis in anxiety disorders .....	312
4 Epigenetic factors.....	313
5 Epigenetics in animal models of anxiety .....	313

6	Transgenerational epigenetics.....	314
7	Neuroepigenetic effects of early stress on anxious behaviors .....	315
8	Prenatal stress.....	316
9	Early-life stress .....	316
10	Prospects for an epigenetic pharmacology of anxiety .....	317
11	Conclusions .....	318
	Abbreviations .....	318
	Glossary .....	319
	References.....	319
<b>CHAPTER 15</b>	<b>Epigenetics and obesity .....</b>	<b>325</b>
	<i>Brian M. Shewchuk</i>	
1	Introduction .....	325
2	Epigenetic mechanisms.....	326
3	DNA methylation .....	327
4	Histone modification.....	328
5	Normal developmental epigenetic processes.....	328
6	Developmental origins of obesity .....	329
7	Genetic imprinting disorders associated with obesity.....	330
8	Genetic associations with obesity.....	332
9	Epigenetic control of metabolism and obesity associated genes.....	332
10	Metabolic regulation by histone modifying enzymes .....	333
11	Metabolic pathway connections to epigenetic mechanisms .....	334
12	Hypothalamic regulation of energy balance.....	335
13	Epigenetic programming of hypothalamic dysfunction by perinatal malnutrition .....	338
14	Hypothalamic epigenetic targets associated with obesity.....	340
15	Hypothalamic-pituitary axis dysfunction in obesity .....	342
16	Neuropsychiatric aspects of obesity .....	343
17	Conclusions .....	343
	List of acronyms and abbreviations .....	344
	Glossary .....	344
	References.....	344
<b>CHAPTER 16</b>	<b>Epigenetics and substance use disorders: translational aspects .....</b>	<b>353</b>
	<i>Gabriella M. Silva and Peter J. Hamilton</i>	
1	Introduction: substance use disorders, epigenetics, and the brain reward pathway .....	353
2	Histone modifications in substance use disorders .....	357
3	Histone acetylation in substance use disorders .....	358

4 Histone methylation in substance use disorders.....361  
5 DNA methylation in substance use disorders.....363  
6 Long noncoding RNAs and MicroRNAs in substance use disorders .....364  
7 Transcription factors in substance use disorders.....365  
8 Translational aspects of neuroepigenetic editing to study substance  
use disorders .....368  
9 Translational aspects of behavioral approaches in substance use disorders.....369  
Abbreviations .....370  
Glossary .....371  
Acknowledgments.....372  
References.....372

### SECTION 3 Summary and outlook

---

**CHAPTER 17 Neuropsychiatric Disorders and Epigenetics: summary and  
outlook ..... 381**  
*Jacob Peedicayil and Dennis R. Grayson*  
1 Introduction .....381  
2 Differing roles of epigenetics in the pathogenesis of different neuropsychiatric  
disorders .....381  
3 Epigenetics of non-neuronal cells in neuropsychiatric disorders.....382  
4 Long noncoding RNAs and neuropsychiatric disorders.....383  
5 Future strategies in the epigenetics of neuropsychiatric disorders .....384  
Abbreviations .....386  
Glossary .....386  
References.....386  
Index ..... 391
