

CONTENTS

	Abstract	3
	Publications included in the thesis	7
1	Introduction	8
2	Fundamental characteristics of the indene rearrangement	11
3	Internal ion-pair return	13
4	The polarimetric differential method	16
5	The $^{11}\text{C}/^{14}\text{C}$ -radiochemical method	21
6	Kinetic isotope-effect studies of stereospecific proton transfer	23
7	Kinetic isotope-effect studies of stereoselective proton transfer	28
8	Preparation of the substrates	31
9	Model calculations	34
10	Acknowledgements	39
11	References	41
