FOREWORD, R. H. Lowe-McConnell	ix
ACKNOWLEDGMENTS	xi
INTRODUCTION	1
How the fishes and forest were studied	2
1 RIVERS, FLOODPLAINS, AND FLOODED FORESTS OF THE AMAZON	10
Annual rise and fall of rivers	12
Types of Amazonian rivers	14
River morphology and floodplain development	17
Flooded forests	21
The Rio Machado	24
2 FISH DIVERSITY IN THE AMAZON	28
Characins or characoids	29
The Catfishes	32
Gymnotoids or the so-called electric eels	35
Osteoglossidae, Lepidosirenidae, and Nandidae	36
Cichlids	36
Cyprinodontoids	37
Swamp eels (Synbranchidae)	37
Amazonian fishes of predominantly marine families	37
3 THE NATURE OF FISH MIGRATIONS IN THE RIO MADEIRA BASIN	40
Migratory characins	40
Catfish migrations	51
4 THE FRUIT- AND SEED-EATING LARGE CHARACINS	55
<i>Tambaqui</i> (<i>Colossoma macropomum</i>)	56
<i>Pirapitinga</i> (<i>Colossoma bidens</i>)	64
<i>Jatuarana</i> (<i>Brycon</i> sp.)	68
<i>Matrinchão</i> (<i>Brycon</i> sp.)	73
Interactions of large characins with fruits and seeds	75

- 5 THE SEED-, FRUIT-, AND LEAF-EATING PACU CHARACINS 101**
Pacus of the genus *Mylossoma* 102
Pacus of the genus *Myleus* 111
Interactions of *Pacu* Characins with fruits and seeds 116
- 6 FRUITS, SEEDS, INSECTS, AND THE PECTORAL FIN: AN ACCOUNT OF *TRIPORTHEUS* 131**
Feeding behavior 133
Interactions of *Triporthus* with fruits and seeds 142
- 7 PIRANHAS 153**
Piranha preta (*Serrasalmus rhombeus*) 156
Piranha mucura (*Serrasalmus elongatus*) 162
Piranha encarnada (*Serrasalmus serrulatus*) 165
Piranha mafurá (*Serrasalmus* cf. *striolatus*) 168
Notes on the feeding behavior of uncommon piranhas 169
- 8 CHARACINS OF THE FAMILY ANOSTOMIDAE 171**
Aracu cabeça gorda (*Leporinus friderici*) 172
Aracu amarelo (*Leporinus fasciatus*) 172
Aracu comum (*Schizodon fasciatus*) 174
- 9 MIDWATER AND SURFACE "SCALED" PREDATORS THAT SWALLOW THEIR PREY WHOLE 176**
Pescada (*Plagioscion squamosissimus*) 179
Apapá (*Pellona castelnaeana*) 181
Peixe-cachorro (*Rhaphiodon vulpinus*) 184
Pirandirá (*Hydrolycus pectoralis*) 185
Tucunaré (*Cichla ocellaris*) 186
- 10 CATFISHES 187**
Mandi (*Pimelodus blodii*) 188
Pintadinho (*Callophysus macropterus*) 192
Pirarara (*Phractocephalus hemeliopterus*) 195
Piraíba (*Brachyplatystoma filamentosum*) 196
Filhote (*Brachyplatystoma* sp.) 198
Dourada (*Brachyplatystoma flavicans*) 198
Piramutaba (*Brachyplatystoma* sp.) 198
Jaú (*Paulicea lutkeni*) 199
Surubim (*Pseudoplatystoma fasciatum*) 200
Caparari (*Pseudoplatystoma tigrinum*) 200

<i>Coroatá (Platynemateichthys notatus)</i>	201
<i>Bacu pedra (Lithodoras dorsalis)</i>	202
<i>Rebeca (Megaladoras irwini)</i>	204
<i>Cuiu-cuiu (Oxydoras niger)</i>	206
<i>Cangati (Trachycorystes)</i>	207
11 THE BONY-TONGUES OR OSTEOGLOSSIDS	209
<i>Pirarucu (Arapaima gigas)</i>	210
<i>Aruanã (Osteoglossum bicirrhosum)</i>	211
12 INTERACTIONS OF FISHES WITH FRUITS AND SEEDS	217
Fishes as seed predators and seed dispersal agents	
218	
Host specificity of fruit- and seed-eating fishes	228
Coevolution of fishes and floodplain forests	230
13 AMAZON FISHES AND THEIR FOODS	233
Nature of the food chain	233
Seasonality in fish diet	241
The use of food resources by a community of fishes	245
14 CONCLUSIONS	252
GLOSSARY	256
BIBLIOGRAPHY	259
INDEX	265
