

CONTENTS

10 INTRODUCTION

LET THE TRADING BEGIN

400 BCE–1770 CE

- 20 **Property should be private** Property rights
- 22 **What is a just price?** Markets and morality
- 24 **You don't need to barter when you have coins** The function of money
- 26 **Make money from money** Financial services
- 30 **Money causes inflation** The quantity theory of money
- 34 **Protect us from foreign goods** Protectionism and trade
- 36 **The economy can be counted** Measuring wealth
- 38 **Let firms be traded** Public companies
- 39 **Wealth comes from the land** Agriculture in the economy
- 40 **Money and goods flow between producers and consumers** The circular flow of the economy
- 46 **Private individuals never pay for street lights** Provision of public goods and services

THE AGE OF REASON 1770–1820

- 52 **Man is a cold, rational calculator** Economic man
- 54 **The invisible hand of the market brings order** Free market economics
- 62 **The last worker adds less to output than the first** Diminishing returns
- 63 **Why do diamonds cost more than water?** The paradox of value
- 64 **Make taxes fair and efficient** The tax burden

- 66 **Divide up pin production, and you get more pins** The division of labor
- 68 **Population growth keeps us poor** Demographics and economics
- 70 **Meetings of merchants end in conspiracies to raise prices** Cartels and collusion
- 74 **Supply creates its own demand** Gluts in markets
- 76 **Borrow now, tax later** Borrowing and debt
- 78 **The economy is a yo-yo** Boom and bust
- 80 **Trade is beneficial for all** Comparative advantage

INDUSTRIAL AND ECONOMIC REVOLUTIONS

1820–1929

- 90 How much should I produce, given the competition?**
Effects of limited competition
- 92 Phone calls cost more without competition**
Monopolies
- 98 Crowds breed collective insanity**
Economic bubbles
- 100 Let the ruling classes tremble at a communist revolution**
Marxist economics
- 106 The value of a product comes from the effort needed to make it**
The labor theory of value
- 108 Prices come from supply and demand**
Supply and demand
- 114 You enjoy the last chocolate less than the first**
Utility and satisfaction
- 116 When the price goes up, some people buy more**
Spending paradoxes
- 118 A system of free markets is stable**
Economic equilibrium
- 124 If you get a pay raise, buy caviar not bread**
Elasticity of demand

- 126 Companies are price takers not price makers**
The competitive market
- 130 Make one person better off without hurting the others**
Efficiency and fairness
- 132 The bigger the factory, the lower the cost**
Economies of scale
- 133 The cost of going to the movies is the fun you'd have had at an ice rink**
Opportunity cost
- 134 Workers must improve their lot together**
Collective bargaining
- 136 People consume to be noticed**
Conspicuous consumption
- 137 Make the polluter pay**
External costs
- 138 Protestantism has made us rich**
Religion and the economy
- 140 The poor are unlucky, not bad**
The poverty problem
- 142 Socialism is the abolition of rational economy**
Central planning
- 148 Capitalism destroys the old and creates the new**
Creative destruction

WAR AND DEPRESSIONS

1929–1945

- 154 Unemployment is not a choice**
Depressions and unemployment
- 162 Some people love risk, others avoid it**
Risk and uncertainty
- 164 Government spending boosts the economy by more than what is spent**
The Keynesian multiplier
- 166 Economies are embedded in culture**
Economics and tradition
- 168 Managers go for perks, not their company's profits**
Corporate governance
- 170 The economy is a predictable machine**
Testing economic theories
- 171 Economics is the science of scarce resources**
Definitions of economics
- 172 We wish to preserve a free society**
Economic liberalism
- 178 Industrialization creates sustained growth**
The emergence of modern economies
- 180 Different prices to different people**
Price discrimination

POST-WAR ECONOMICS

1945–1970

- 186 In the wake of war and depression, nations must cooperate**
International trade and Bretton Woods
- 188 All poor countries need is a big push**
Development economics
- 194 People are influenced by irrelevant alternatives**
Irrational decision making
- 196 Governments should do nothing but control the money supply**
Monetarist policy
- 202 The more people at work, the higher their bills**
Inflation and unemployment
- 204 People smooth consumption over their life spans** Saving to spend
- 206 Institutions matter**
Institutions in economics
- 208 People will avoid work if they can** Market information and incentives
- 210 Theories about market efficiency require many assumptions**
Markets and social outcomes
- 214 There is no perfect voting system** Social choice theory
- 216 The aim is to maximize happiness, not income**
The economics of happiness

- 220 Policies to correct markets can make things worse**
The theory of the second best
- 222 Make markets fair**
The social market economy
- 224 Over time, all countries will be rich**
Economic growth theories
- 226 Globalization is not inevitable** Market integration
- 232 Socialism leads to empty shops** Shortages in planned economies
- 234 What does the other man think I am going to do?**
Game theory
- 242 Rich countries impoverish the poor** Dependency theory
- 244 You can't fool the people**
Rational expectations
- 248 People don't care about probability when they choose**
Paradoxes in decision making
- 250 Similar economies can benefit from a single currency** Exchange rates and currencies
- 256 Famine can happen in good harvests**
Entitlement theory

CONTEMPORARY ECONOMICS

1970–PRESENT

- 262 It is possible to invest without risk**
Financial engineering
- 266 People are not 100 percent rational**
Behavioral economics
- 270 Tax cuts can increase the tax take**
Taxation and economic incentives
- 272 Prices tell you everything**
Efficient markets
- 273 Over time, even the selfish cooperate with others** Competition and cooperation
- 274 Most cars traded will be lemons**
Market uncertainty
- 276 The government's promises are incredible**
Independent central banks

- 278 The economy is chaotic even when individuals are not**
Complexity and chaos
- 280 Social networks are a kind of capital**
Social capital
- 281 Education is only a signal of ability**
Signaling and screening
- 282 The state governs the market**
The East Asian miracle
- 288 Beliefs can trigger currency crises**
Speculation and currency devaluation
- 294 Auction winners pay over the odds**
The winner's curse
- 296 Stable economies contain the seeds of instability**
Financial crises

- 302 Businesses pay more than the market wage**
Incentives and wages
- 303 Real wages rise during a recession**
Sticky wages
- 304 Finding a job is like finding a partner or a house**
Searching and matching
- 306 The biggest challenge for collective action is climate change**
Economics and the environment
- 314 GDP ignores women**
Gender and economics
- 316 Comparative advantage is an accident**
Trade and geography
- 317 Like steam, computers have revolutionized economies**
Technological leaps
- 318 We can kick-start poor economies by writing off debt**
International debt relief

- 320 Pessimism can destroy healthy banks**
Bank runs
- 326 Savings gluts abroad fuel speculation at home**
Global savings imbalances
- 330 More equal societies grow faster**
Inequality and growth
- 332 Even beneficial economic reforms can fail**
Resisting economic change
- 334 The housing market mirrors boom and bust**
Housing and the economic cycle
- 336 Economic shocks are not forever**
Economics and the pandemic
- 338 More diversity equals better policy**
The economic benefits of inclusivity
- 340 DIRECTORY**
- 348 GLOSSARY**
- 352 INDEX**
- 359 ACKNOWLEDGMENTS**
