Preface *xiii*

About the Companion Website *xv*

1	Introduction	1
1.1	Uniform Grids	2
1.2	Variable Grids	18
1.3	Stagewise Differentiation	24
	Appendix A1 – Online Documentation for <code>splinefun</code>	27
	Reference	30
2	One-Dimensional PDEs	31
2.1	Constant Coefficient	31
2.1.1	Dirichlet BCs	32
2.1.1.1	Main Program	33
2.1.1.2	ODE Routine	40
2.1.2	Neumann BCs	43
2.1.2.1	Main Program	44
2.1.2.2	ODE Routine	46
2.1.3	Robin BCs	49
2.1.3.1	Main Program	50
2.1.3.2	ODE Routine	55
2.1.4	Nonlinear BCs	60
2.1.4.1	Main Program	61
2.1.4.2	ODE Routine	63
2.2	Variable Coefficient	64
2.2.1	Main Program	67
2.2.2	ODE Routine	71
2.3	Inhomogeneous, Simultaneous, Nonlinear	76
2.3.1	Main Program	78

2.3.2	ODE routine	85
2.3.3	Subordinate Routines	88
2.4	First Order in Space and Time	94
2.4.1	Main Program	96
2.4.2	ODE Routine	101
2.4.3	Subordinate Routines	105
2.5	Second Order in Time	107
2.5.1	Main Program	109
2.5.2	ODE Routine	114
2.5.3	Subordinate Routine	117
2.6	Fourth Order in Space	120
2.6.1	First Order in Time	120
2.6.1.1	Main Program	121
2.6.1.2	ODE Routine	125
2.6.2	Second Order in Time	138
2.6.2.1	Main Program	140
2.6.2.2	ODE Routine	143
	References	155
3	Multidimensional PDEs	157
3.1	2D in Space	157
3.1.1	Main Program	158
3.1.2	ODE Routine	163
3.2	3D in Space	170
3.2.1	Main Program, Case 1	170
3.2.2	ODE Routine	174
3.2.3	Main Program, Case 2	183
3.2.4	ODE Routine	187
3.3	Summary and Conclusions	193
4	Navier–Stokes, Burgers’ Equations	197
4.1	PDE Model	197
4.2	Main Program	198
4.3	ODE Routine	203
4.4	Subordinate Routine	205
4.5	Model Output	206
4.6	Summary and Conclusions	208
	Reference	209
5	Korteweg–de Vries Equation	211
5.1	PDE Model	211
5.2	Main Program	212
5.3	ODE Routine	225

5.4	Subordinate Routines	228
5.5	Model Output	234
5.6	Summary and Conclusions	238
	References	239
6	Maxwell Equations	241
6.1	PDE Model	241
6.2	Main Program	243
6.3	ODE Routine	248
6.4	Model Output	252
6.5	Summary and Conclusions	252
	Appendix A6.1. Derivation of the Analytical Solution	257
	Reference	259
7	Poisson–Nernst–Planck Equations	261
7.1	PDE Model	261
7.2	Main Program	265
7.3	ODE Routine	271
7.4	Model Output	276
7.5	Summary and Conclusions	284
	References	286
8	Fokker–Planck Equation	287
8.1	PDE Model	287
8.2	Main Program	288
8.3	ODE Routine	293
8.4	Model Output	295
8.5	Summary and Conclusions	301
	References	303
9	Fisher–Kolmogorov Equation	305
9.1	PDE Model	305
9.2	Main Program	306
9.3	ODE Routine	311
9.4	Subordinate Routine	313
9.5	Model Output	314
9.6	Summary and Conclusions	316
	Reference	316
10	Klein–Gordon Equation	317
10.1	PDE Model, Linear Case	317
10.2	Main Program	318
10.3	ODE Routine	323

10.4	Model Output	326
10.5	PDE Model, Nonlinear Case	328
10.6	Main Program	330
10.7	ODE Routine	335
10.8	Subordinate Routines	338
10.9	Model Output	339
10.10	Summary and Conclusions	342
	Reference	342
11	Boussinesq Equation	343
11.1	PDE Model	343
11.2	Main Program	344
11.3	ODE Routine	350
11.4	Subordinate Routines	354
11.5	Model Output	355
11.6	Summary and Conclusions	358
	References	358
12	Cahn–Hilliard Equation	359
12.1	PDE Model	359
12.2	Main Program	360
12.3	ODE Routine	366
12.4	Model Output	369
12.5	Summary and Conclusions	379
	References	379
13	Camassa–Holm Equation	381
13.1	PDE Model	381
13.2	Main Program	382
13.3	ODE Routine	388
13.4	Model Output	391
13.5	Summary and Conclusions	394
13.6	Appendix A13.1: Second Example of a PDE with a Mixed Partial Derivative	395
13.7	Main Program	395
13.8	ODE Routine	398
13.9	Model Output	400
	Reference	403
14	Burgers–Huxley Equation	405
14.1	PDE Model	405
14.2	Main Program	406
14.3	ODE Routine	411

14.4	Subordinate Routine	416
14.5	Model Output	417
14.6	Summary and Conclusions	422
	References	422
15	Gierer–Meinhardt Equations	423
15.1	PDE Model	423
15.2	Main Program	424
15.3	ODE Routine	429
15.4	Model Output	432
15.5	Summary and Conclusions	437
	Reference	440
16	Keller–Segel Equations	441
16.1	PDE Model	441
16.2	Main Program	443
16.3	ODE Routine	449
16.4	Subordinate Routines	453
16.5	Model Output	453
16.6	Summary and Conclusions	458
	Appendix A16.1. Diffusion Models	458
	References	459
17	Fitzhugh–Nagumo Equations	461
17.1	PDE Model	461
17.2	Main Program	462
17.3	ODE Routine	467
17.4	Model Output	470
17.5	Summary and Conclusions	475
	Reference	475
18	Euler–Poisson–Darboux Equation	477
18.1	PDE Model	477
18.2	Main Program	478
18.3	ODE Routine	483
18.4	Model Output	488
18.5	Summary and Conclusions	493
	References	493
19	Kuramoto–Sivashinsky Equation	495
19.1	PDE Model	495
19.2	Main Program	496
19.3	ODE Routine	503

19.4	Subordinate Routines	506
19.5	Model Output	508
19.6	Summary and Conclusions	513
	References	514

20	Einstein-Maxwell Equations	515
20.1	PDE Model	515
20.2	Main Program	516
20.3	ODE Routine	521
20.4	Model Output	526
20.5	Summary and Conclusions	533
	Reference	536

A	Differential Operators in Three Orthogonal Coordinate Systems	537
	References	539

	Index	541
