

Contents

1 Preface	1
References	15
2 Technologies Available Today to Generate Electricity from Sunlight and Their Current Status	17
2.1 The Industrially Proven Methods of Electricity Generation from Sunlight	17
2.1.1 Concentrated Solar Power (CSP)/Parabolic Trough Collectors (PTC)	17
2.1.2 Thermoelectric Effect	19
2.1.3 Solar Thermo-Photovoltaics and Fresnel Lenses	23
2.1.4 Dye-Sensitized Solar Cells	25
2.1.5 Photovoltaic (PV) Cells	27
2.2 The Environmental Concerns of the Retired SPVC Panels	45
2.3 Large Scale Failure of Silicon Photovoltaic Solar Panel Installations	48
2.4 Concluding Remarks	50
References	51
3 New SLAPE Solar Panels to Replace the Conventional Silicon Photovoltaic Cell (SPVC) Solar Panels	57
3.1 Semiconductor Assisted Photothermal Effect (SAPE)	57
3.2 Nanoparticle Assisted Photothermal Effect (NAPE)	59
3.3 Transpiration	60
3.4 Semiconductor and Liquid Assisted Photothermal Effect (SLAPE)	60
3.5 Black Silicon	70
3.6 SLAPE Technology for Electricity Generation from Sunlight	70
3.6.1 Fabrication of SLAPE Solar Panel to Convert Sunlight into Heat Energy	73

3.6.2	Fabrication of Reciprocally Moved Steam Engine	78
3.6.3	Fabrication of Electric Generator	79
3.7	Generation of Both DC and AC Electricity Using SLAPE Solar Panel with the Help of a Reciprocally Moved Steam Engine and an Electric Generator	80
3.8	The Theoretical Efficiency vs. Experimentally Generated Results Using SLAPE Panel	90
3.9	Concluding Remarks	94
	References	95
4	Electrochemical CO₂ Reduction: Fundamentals and Existing Industrial Applications	99
4.1	Importance of Electrochemical CO ₂ Reduction (ECR) Reaction	99
4.2	Fundamental Challenges in the Reduction of CO ₂ into Value Added Chemicals Including Methanol: Thermochemical Routes	100
4.3	Electrochemical CO ₂ Reduction (ECR): The Essential Understandings Needed	104
4.4	CO ₂ Speciation vs. Electrolyte pH	112
4.5	The Cost Economics Involved in the ECR to CO	117
4.6	Energy and Kinetics Involved in the Electrochemical Reduction of Carbon Dioxide (ERC) to Carbon Monoxide	119
4.7	The Capacity of Today's Industrial CO ₂ Conversion Plants Relevant to the Today's Social Cost of Carbon	120
4.8	Commercial Plants Producing Fuel and Value Added Chemicals from CO ₂ Gas	127
4.8.1	Liquid Light Incorporation, USA	127
4.8.2	George Olah CO ₂ to Renewable Methanol Plant, Iceland	128
4.8.3	Bayer's Material Science Plant, Germany	130
4.8.4	Audi AG, Germany	131
4.8.5	Mitsubishi Heavy Industries, Japan	131
4.8.6	Honeywell UOP, USA	132
4.9	Concluding Remarks and Future Perspectives	133
	References	134
5	Industrial Chemicals Synthesized Today from Carbon Dioxide and Its Direct Uses	141
5.1	Potential Advantages in the Conversion of CO ₂ into Methanol ...	141
5.2	Conversion of CO ₂ to Methanol	142
5.3	Conversion of CO ₂ to Sodium Carbonate and Dimethyl Carbonate	147
5.4	Conversion of CO ₂ to Urea	148
5.5	Conversion of CO ₂ to Dimethyl Ether	148

5.6	Conversion of CO ₂ to Hydrocarbons	149
5.7	Conversion of CO ₂ to Acetic Acid	152
5.8	Conversion of CO ₂ into Formaldehyde	153
5.9	Conversion of CO ₂ to Lower Alkenes	153
5.10	Biochemical Conversion of CO ₂ into Renewable Biofuels	154
5.11	The Reverse Microbial Fuel Cells—The Practical Artificial Leaves	156
5.11.1	Biofuels from Bacteria, Electricity and Carbon Dioxide	159
5.11.2	Fuels from Bacteria, CO ₂ , Water and Solar Energy	160
5.12	Reverse Water Gas Shift (RWGS) Reaction and Disproportionation of CO ₂	160
5.13	Direct Uses of Carbon Dioxide	162
5.13.1	As a Soft Oxidant	162
5.13.2	As a Benign Non-Aqueous Solvent	164
5.13.3	As a Refrigerant	164
5.13.4	As a Laser Generating Material	166
5.13.5	As a Component in the Synthesis of Building Materials	166
5.14	Concluding Remarks	166
	References	167
6	Electrochemical CO₂ Reduction: What Else Still Left to Be Done to Solve the CO₂ Related Global Warming, Climate Change and Social Cost of Carbon Problems	173
6.1	Electrochemical CO ₂ Reduction (ECR) to Methanol, Its Advantages and Current Status	173
6.1.1	Pure Metals as Cathodes for ECR	177
6.1.2	Effects of Aqueous Medium on ECR	183
6.1.3	Gas Diffusion Electrode (GDE) and Solid Polymer Electrolyte (SPE) for ECR	184
6.1.4	Effect of Chemical Modification on Efficiency of Metal Cathodes for ECR	184
6.2	Effect of Molecular Catalysts on Efficiency of Metal Cathodes on ECR	185
6.3	Metal Oxides and Doped-Metal Oxides as Cathode Materials for ECR	191
6.4	Effect of Room Temperature Ionic Liquids (RTILs) for ECR Over Metal Cathodes	193
6.5	ECR to CO in the Presence of Imidazolium Based RTILs: Importance of ECR to CO	195
6.6	ECR Over Bulk Metal Monoliths in Conjunction with bmim-BF ₄ via CV	202

6.7	ECR Reaction Over Bulk Metal Monoliths in Conjunction with bmim-BF ₄ RTIL via CPBE in the Presence of Protons (H ⁺) Derived from Water	208
6.8	Underlying Reaction Mechanism in the Formation of CO in ECR Reaction Over Sn Cathode in Conjunction with bmim-BF ₄ RTIL	223
6.9	ECR Over Bulk Metal Monoliths in Conjunction with bmim-BF ₄ RTIL via CPBE in the Absence of Protons (H ⁺) Derived from Water	226
6.10	Concluding Remarks	233
	References	237
7	Storing of Electricity in the Form of H₂ and O₂ Gases by Electrolyzing Water	247
7.1	Introduction: The Importance of Water Splitting Reaction on the Way to Harvest Sunlight at Every Home to Meet All the Energy Needs of the Society	247
7.2	Lessons Learned from the Biological Catalytic Water Oxidation Reaction that Occurs in a Plant Leaf	249
7.3	Effect of Solution pH and Other Conditions on Stability and Efficiency of Water Oxidation Catalysts (WOCs)	252
7.4	Photoelectrochemical (PEC) or Light Assisted Splitting of Water	254
7.5	Artificial Leaves	257
7.6	Light Assisted Water Oxidation Catalyzed by Synthetic Inorganic Materials	259
7.6.1	By Nano-Size Cobalt Oxide Impregnated in Meso-Porous Silica	259
7.6.2	By Polyoxometallates (POMs)	259
7.6.3	By Layered Double Hydroxides	261
7.6.4	Ultrathin Nickel Oxide/Nickel Film	266
7.6.5	Cuprous Oxide Coated with Pt Loaded TiO ₂	275
7.7	Electrolyzers Commercially Operated to Produce H ₂ Gas from Water	282
7.8	Importance of Alkaline Electrolysis and Ultra-Low Cost EPDM Rubber Based Membranes	283
7.9	Concluding Remarks and Future Perspectives	289
	References	291
