2	The Scientific Method: A Knowledge Machine	19
	What Is Science?	19
	Subject Matter	20
	Abstraction	20
	Objectivity	20
	Data-Driven	21

Hypothesis-Driven	21
Mathematical Modeling	22
Logical	23
Rigorous	23
Reproducible	23
Open-Minded	23
The Scientific Method	24
Sources of Scientific Data	26
Observations	26
Surveys	26
Experiments	26
Theories	27
Simulations	27
Search Engines	27
Key Scientific Skills	28
The Creative Phase	28
The Research Phase	29
The Communication Phase	30
Pioneers of the Scientific Method	30
The Nature of Science	31
Francis Bacon	31
David Hume	32
Immanuel Kant	33
Karl Popper	35
Thomas Kuhn	36
Modern Theories	38
Pioneers and Settlers	39
Transformative <i>versus</i> Incremental Science	40
Reductionism and Holism	40
Reductionism	41
Holism	41
General Approaches to Designing and Interpreting Research	42
Trial-and-Error Approach	42
Black-Box Approaches	43
Gray- and White-Box Approaches (Physicochemical Approaches) ..	45
Concluding Remarks	47
Resources	48
3 Planning Your Research: A Laser Focus on Manuscripts	49
Why Is Publishing Manuscripts So Important?	49
When Do you Start Writing Your Manuscript?	51
Be Open-Minded and Willing to Change	57
Types of Scientific Publications and Their Importance	57
Where to Publish Your Manuscript	59
Citations: Important (But Not Always)	59

Reasons for Delaying or Not Publishing	60
Concluding Remarks.	61
Resources	62
4 Research Practice: Efficiently and Effectively Performing Your Experiments	65
Introduction.	65
Be Prepared.	66
Safety Issues	68
Good Laboratory Practices	69
Preliminary Experiments	70
Optimizing Study Design: The Critical Importance of Preliminary Experiments	71
Reagent, Equipment, and Protocol Suitability	72
Magnitude of Changes	72
Main Experiments.	74
Develop a Clear Experimental Plan	74
Data Collection and Storage	75
The Importance of Keeping a Good Notebook.	75
Quality Control Checks.	76
Data Backup	76
Quality Control of Experiments: Critical Check Points	76
The Importance of Being Open Minded.	78
Concluding Remarks.	79
Resources	80
5 Data Analysis and Reporting: Presenting Your Best Face	81
Introduction.	81
Measures of Central Tendency	84
Mean	84
Median and Mode	85
Measures of Spread of Data	86
Standard Deviation	87
Standard Error of the Mean.	87
Confidence Intervals	88
Coefficient of Variation.	89
How Many Measurements Should You Make?	89
Establishing Statistical Differences: ANOVA.	91
Sources of Error	94
Blunders	94
Random Errors	94
Systematic Errors	95
Rejecting Data.	97
Propagation of Errors	99
Significant Figures and Rounding.	100
Standard Curves: Regression Analysis	101

Modeling Trends	103
Correlation and Causation.	105
Establishing Causation: Identifying the Origin of Observed Effects . . .	106
Plotting Data: Which Type of Graph or Table to Use?	108
Tables	108
Bar Charts	109
Pie Charts	109
Scatter Plots	110
Line Plots	110
Surface Plots	112
Concluding Remarks.	113
Resources	114
6 Writing Your Manuscript: The Nuts and Bolts	115
Getting Started	115
Organizing Your Data	116
Naming Your Folders and Files.	117
Organizing the Writing of Your Manuscript	118
Authors	118
What Qualifies as Authorship?	119
Corresponding Author.	120
Who Goes Where?	120
Title	121
Abstract.	124
Keywords	127
Introduction Section	128
Structuring Your <i>Introduction</i> Section	128
Citing Previous Research	131
Materials and Methods Section.	131
Structuring Your <i>Materials and Methods</i> Section.	132
Other Tips	134
Results and Discussion Section	134
Objectives of the Results and Discussion Section	134
Using the Correct Format	135
Structuring Your <i>Results and Discussion</i> Section.	135
Subsection Structure	136
Other Tips	138
Conclusions Section	139
Purpose	140
Major Findings	140
Context	141
Further Research.	141
Relevance	141
Acknowledgments Section	142
Declaration of Competing Interests	142

References Section	142
Reference Managers	143
Writing Review Articles	145
Writing Tips	147
Understand Your Audience	147
Develop a Strong Narrative	147
Be Clear and Precise	148
Spelling and Grammar	149
Be Consistent in Your Writing Style	149
Seek Feedback	150
Plagiarism	150
Concluding Remarks	151
Resources	152
7 Submission and Revision: Getting Published	153
Where to Publish Your Manuscript	153
Subject Matter	154
Manuscript Type	154
Journal Reputation	154
Open Access	155
Predatory Publishers	157
Manuscript Submission	158
Cover Letter	158
Graphical Abstract	158
