<i>About the author</i>	xv
<i>Foreword by Eric Quint</i>	xvii
<i>Preface</i>	xxiii
<i>Essay: Omit the unimportant by Dieter Rams</i>	xxvii
<i>Acknowledgements</i>	xxxix
1 Introduction	1
What is this book about?	3
Why do you need this book?	3
How to use this book	4
Content	6
Limitations	10
Summary	10
2 Change by design	11
Learning and unlearning	13
Creative and critical thinking	14
The future of design	17
Working across disciplines	19
Cross-disciplinary practice	20
Cross-disciplinary research	21
Cross-disciplinary education	23
Research as a competitive advantage	24
Summary	25
Research in Practice: From human-centric to humanity-centred design – In conversation with Don Norman	26
3 Design as practice, research, and thinking	33
Design practice	34
Design research	37
Design thinking	40
Summary	45
Research in Practice: Reflections on design – In conversation with Karim Rashid	46

4	Research essentials	51
	Defining a research problem	52
	Formulating a research statement	54
	Framing a research question or a hypothesis	55
	Review of the literature	56
	Types of literature review	57
	Validity and reliability of the literature review	58
	Saturation	58
	Glossary of key terms	59
	Understanding research methods and methodologies	59
	Why is this important?	60
	How does this look in practice?	61
	Choosing a research approach	62
	Research triangulation	65
	Multimethod research	66
	Ethical research	66
	Respect	68
	Research merit and integrity	69
	Justice	70
	Beneficence	70
	Writing a research proposal	71
	Content of a research proposal	72
	Summary	75
	Research in Practice: Hallmarks of good research –	
	In conversation with Ken Friedman	75
5	Ethnographic research	81
	What is ethnography?	83
	Conducting ethnographic research	83
	Type of communication	84
	Level of integration	85
	Duration of study	85
	Data collection	86
	Talking to people	87
	Observing people	91
	Being with people	92
	Cultural probes	94
	Ethics and research participants	101
	Informed consent	101

Deception in research	103
Debriefing	104
Confidentiality	104
Anonymity	104
Data analysis	105
Preparing a report	106
Hallmarks of good ethnographic research	108
Summary	108
Research in Practice: Contemporary Māori design – In conversation with Johnson Witehira	109
6 Qualitative research	115
What is qualitative research?	116
Case studies	118
Conducting a case study	118
Data collection	119
Data analysis	122
Preparing a report	123
Phenomenology	125
Conducting phenomenological research	126
Data collection	126
Data analysis	129
Preparing a report	129
Historical research	131
Design history	131
Trend forecasting	132
Conducting historical research	133
Data collection	134
Data analysis	136
Preparing a report	136
Grounded theory	138
Conducting grounded theory research	139
Data collection	139
Data analysis	139
Preparing a report	141
Hallmarks of good qualitative research	142
Summary	143
Research in Practice: Radical social change – In conversation with Lesley-Ann Noel	143

7	Quantitative research	149
	What is quantitative research?	151
	Settings	153
	Sampling	153
	Statistics	155
	Surveys	159
	Conducting a survey	159
	Data collection	161
	Data analysis	167
	Preparing a report	178
	User-centred design (UCD) research	179
	Conducting UCD research	181
	Data collection	195
	Data analysis	197
	Preparing a report	198
	Hallmarks of good quantitative research	199
	Summary	201
	Research in Practice: The design leadership of IBM – In conversation with Karel Vredenburg	201
8	User experience (UX) research	211
	What are UX design and UX research?	212
	Conducting UX research	213
	Data collection and analysis	214
	Preparing a report	221
	UX-led innovation	223
	Hallmarks of good UX research	233
	Summary	234
	Research in Practice: A day in the life of a UX researcher – In conversation with Naghmeh Nouri Esfahani	234
9	Visual research	241
	What is visual research?	242
	Visual and material culture studies	243
	Data collection	244
	Data analysis	244
	Preparing a report	262
	Introduction to branding	264
	Logos	265

	Corporate identities	266
	Corporate identity development process	269
	Brand management	274
	Rebranding	276
	Hallmarks of good visual research	277
	Summary	278
	Research in Practice: The redesign of the NASA identity programme – In conversation with Richard Danne	279
10	Applied research	289
	What is applied research?	290
	Practice-based research	293
	Practice-led research	294
	Action research	294
	Conducting action research	294
	Data collection	296
	Co-design	297
	Data analysis	299
	Preparing a report	300
	Hallmarks of good applied research	301
	Summary	302
	Research in Practice: Design for social innovation – In conversation with Ezio Manzini	303
11	Presenting your research	311
	Research report	312
	Writing a research report	313
	Keywords	316
	Abstract	317
	Abstract structure	317
	Contents of the research report	320
	Executive summary	325
	Contents of the executive summary	325
	Design brief	328
	Contents of the design brief	328
	Design report	331
	Contents of the design report	331
	Summary	333
	Research in Practice: Working in the government sector – In conversation with Gülgün Kayim	334

12 Conclusion

Afterword by Meredith Davis
