## **Section I Drivers, Environmental, Economic and Social Impacts, and Resiliency 1**

<b>1</b>	<b>Emerging Challenges, Sustainability, Resiliency, and Sustainable and Resilient Engineering</b>	<b>3</b>
1.1	Introduction	3
1.2	Emerging Challenges	4
1.2.1	Increased Consumption and Depletion of Natural Resources	4
1.2.1.1	Easter Island Example	4
1.2.1.2	Metallic Ores Consumption Example	5
1.2.2	Growing Environmental Pollution	6
1.2.3	Increasing Population	7
1.2.4	Increasing Waste Generation	9
1.2.5	Increasing Greenhouse Gas Emissions	11
1.2.5.1	Climate Change and Extreme Weather Impacts: Hurricane Sandy Example	15
1.2.6	Decline of Ecosystems	16
1.2.7	Loss of Biodiversity	17
1.2.8	Social Injustice	17
1.2.9	Urban Sprawl	19
1.3	The Master Equation or IPAT Equation	20
1.4	What Is Sustainability?	21
1.4.1	United Nations Sustainable Development Goals (SDGs)	23
1.4.2	What Is Sustainable Engineering?	27
1.5	What Is Resiliency?	33
1.5.1	What Is Resilient Engineering?	33
1.5.2	Difference Between Resiliency and Sustainability	34
1.6	Integrated Sustainable and Resilient Engineering	35
1.7	Summary	35
1.8	Questions	36
1.9	Problems	37
	References	43

<b>2</b>	<b>Environmental Concerns</b>	<b>47</b>
2.1	Introduction	47
2.2	Global Warming and Climate Change	48
2.2.1	Intergovernmental Panel on Climate Change (IPCC) Assessment Report	56
2.3	Desertification	57
2.4	Deforestation	59
2.5	Loss of Habitat and Biodiversity	60
2.6	Ozone Layer Depletion	61
2.7	Air Pollution	63
2.8	Smog	65
2.9	Acid Rain	65
2.10	Water Usage and Pollution	68
2.11	Eutrophication	74
2.12	Salinity	74
2.13	Wastes and Disposal	75
2.14	Land Contamination	83
2.15	Visibility	84
2.16	Odors	84
2.17	Aesthetic Degradation	85
2.18	Land Use Patterns	85
2.19	Thermal Pollution	85
2.20	Noise Pollution	86
2.21	Summary	86
2.22	Questions	87
2.23	Problems	88
	References	92
<b>3</b>	<b>Social, Economic, and Legal Issues</b>	<b>97</b>
3.1	Introduction	97
3.2	Social Issues	98
3.2.1	Society	98
3.2.2	Developed and Developing Societies	99
3.2.3	Social Sustainability Concept	100
3.2.4	Social Indicators	100
3.2.5	Social Impact and Social Vulnerability Assessment Framework	102
3.2.6	Social Sustainability Implementation	107
3.2.7	Equity	107
3.2.8	Environmental Justice	107
3.3	Economic Issues	110
3.3.1	Economic Assessment Framework	111
3.3.2	Life Cycle Costing	113
3.3.3	True-cost Accounting	114
3.4	Legal and Governance Issues	115
3.5	Environmental, Social and Governance (ESG) Reporting	116
3.6	Summary	117
3.7	Questions	118
3.8	Problems	118
	References	122

<b>4</b>	<b>Availability and Depletion of Natural Resources</b>	<b>125</b>
4.1	Introduction	125
4.2	Types and Availability of Resources	126
4.2.1	Fossil Fuels	126
4.2.2	Radioactive Fuels	132
4.2.3	Mineral Resources	132
4.2.4	Water Resources	134
4.2.5	Other Elemental Cycles	136
4.3	Resource Depletion	141
4.3.1	Causes of Resource Depletion	141
4.3.2	Effects of Resource Depletion	142
4.3.3	Overshooting	146
4.3.4	Urban Metabolism	147
4.4	Summary	147
4.5	Questions	148
4.6	Problems	149
	References	153
<b>5</b>	<b>Disaster Resiliency</b>	<b>157</b>
5.1	Introduction	157
5.2	Climate Change and Extreme Events	158
5.2.1	Rising Temperatures	158
5.2.2	Sea Level Rise	160
5.2.3	Extreme Weather Events	160
5.2.4	Droughts and Floods	161
5.2.5	Wildfires	162
5.3	Impacts of Extreme Events	163
5.3.1	Hurricanes, Storms, and Floods	163
5.3.2	Wildfires by Drought and Record Heat	166
5.4	What Is Resiliency?	166
5.5	Initiatives and Policies on Resiliency	172
5.6	Resilient Design of Infrastructure	176
5.7	Resiliency Assessment Framework	178
5.7.1	Technical Resiliency	180
5.7.2	Cascading Impacts of Resiliency	182
5.8	Resilient Infrastructure Examples	184
5.8.1	San Francisco Firehouse Resilient Design	184
5.8.2	San Francisco Resilient CSD Design	184
5.8.3	Resilient Environmental Remediation	188
5.9	Managed Retreat and Cost-Benefits	194
5.10	Soft Infrastructure	194
5.11	Challenges	195
5.12	Summary	195
5.13	Questions	196
5.14	Problems	196
	References	199

## **Section II Sustainability and Resiliency Metrics and Assessment Tools 203**

### **6 Sustainability and Resiliency Indicators, Metrics, and Assessment Tools 205**

- 6.1 Introduction 205
- 6.2 Attributes of Sustainability and Resiliency Indicators 206
- 6.3 Sustainability Indicators 206
- 6.4 Sustainability Metrics 217
- 6.5 Sustainability Assessment Tools 219
- 6.6 Resiliency Indicators 221
- 6.7 Resiliency Metrics 226
- 6.8 Resiliency Assessment Tools 228
- 6.9 Integrated Sustainability and Resilience Assessment Tools 230
- 6.10 Summary 230
- 6.11 Questions 231
- 6.12 Problems 232
- References 233

### **7 Material Flow Analysis and Material Budget 235**

- 7.1 Introduction 235
- 7.2 Budget of Natural Resources 236
- 7.3 Constructing a Budget 238
- 7.4 Material Flow Analysis 238
- 7.5 Material Flow Analysis: Wastes 242
- 7.6 National Material Account 245
- 7.7 Summary 250
- 7.8 Questions 250
- 7.9 Problems 251
- References 253

### **8 Carbon Footprint Analysis 255**

- 8.1 Introduction 255
- 8.2 Global Warming Potential and Carbon Footprint 256
- 8.3 Measuring Carbon Footprint 257
  - 8.3.1 Define the Scope of Your Inventory 257
  - 8.3.2 Measure Emissions and Establish a Baseline 258
  - 8.3.3 Develop Targets and Strategies to Reduce Emissions 258
  - 8.3.4 Offset Unavoidable Emissions 258
  - 8.3.5 Independent Verification 261
- 8.4 Standards for Calculating the Carbon Footprint 261
- 8.5 GHG Inventory: Developments in the United States 262
- 8.6 USEPA: Greenhouse Gas Reporting Program 262
- 8.7 Tools for GHG Inventory 262
- 8.8 Carbon Footprint Case Study 264
- 8.9 Programs to Mitigate GHG Emissions 270
- 8.10 Climate Action Plans 272
- 8.11 Carbon Markets: Credits/Offsets 274
- 8.12 Summary 274
- 8.13 Questions 275

8.14	Problems	275
	References	276
<b>9</b>	<b>Life Cycle Assessment</b>	<b>279</b>
9.1	Introduction	279
9.2	Life Cycle Assessment	280
9.2.1	Definition and Objective	280
9.2.2	Procedure	281
9.2.3	History	282
9.3	LCA Methodology	284
9.3.1	Goal and Scope Definition	285
9.3.2	Life Cycle Inventory (LCI)	286
9.3.3	Life Cycle Impact Assessment (LCIA)	289
9.3.4	Interpretation	294
9.4	LCA Tools and Applications	296
9.5	Summary	299
9.6	Questions	300
9.7	Problems	301
	References	303
<b>10</b>	<b>Streamlined Life Cycle Assessment</b>	<b>305</b>
10.1	Introduction	305
10.2	Streamlined LCA (SLCA)	306
10.3	Expanded SLCA	310
10.4	Simple Example of SLCA	312
10.5	Applications of SLCA	318
10.6	Summary	324
10.7	Questions	324
10.8	Problems	324
	References	326
<b>11</b>	<b>Economic Input–Output Life Cycle Assessment</b>	<b>327</b>
11.1	Introduction	327
11.2	EIO Model	328
11.3	EIO-LCA	330
11.4	EIO-LCA Model Results	331
11.4.1	Interpretation of Results	331
11.4.2	Uncertainty	331
11.4.3	Other Issues and Considerations	332
11.5	Projects Using the EIO-LCA Model	332
11.6	Conventional LCA versus EIO-LCA	335
11.7	EIO versus Physical Input–Output (PIO) Analysis	337
11.8	Summary	339
11.9	Questions	340
11.10	Problems	340
	References	341

<b>12</b>	<b>Environmental Health Risk Assessment</b>	<b>343</b>
12.1	Introduction	343
12.2	Emergence of the Risk Era	344
12.3	Risk Assessment and Management	344
12.3.1	Hazard Identification	345
12.3.2	Dose-Response Assessment	346
12.3.3	Exposure Assessment	347
12.3.4	Risk Characterization	349
12.4	Ecological Risk Assessment	350
12.5	Summary	352
12.6	Questions	352
12.7	Problems	353
	References	354

<b>13</b>	<b>Emerging Sustainability and Resiliency Assessment Tools</b>	<b>355</b>
13.1	Introduction	355
13.2	Environmental Assessment Tools/Indicators	355
13.3	Economic Assessment Tools	358
13.3.1	Life-Cycle Costing	358
13.3.2	Cost-Benefit Analysis	359
13.4	Ecosystem Services Valuation Tools	360
13.5	Environmental Justice Tools	361
13.6	Integrated Sustainability Assessment Tools	362
13.7	Integrated Sustainability and Resilience Assessment Tools	364
13.8	Summary	367
13.9	Questions	367
13.10	Problems	368
	References	370

### **Section III Sustainable and Resilient Engineering Practices 373**

<b>14</b>	<b>Emerging Technologies for Sustainable and Resilient Engineering</b>	<b>375</b>
14.1	Introduction	375
14.2	Emerging Smart Technologies	376
14.2.1	Big Data and Artificial Intelligence	376
14.2.2	Sensors and Remote-Sensing Technologies (Satellites, UAVs, GIS)	378
14.2.3	3D Printing and Robotics	380
14.2.4	Digital Twinning	380
14.2.5	Internet of Things	382
14.3	Engineered Materials for Circular Economy	383
14.3.1	Recycled Waste Materials	383
14.3.2	Nanomaterials	383
14.4	Resource Conservation in Energy Sector	384
14.4.1	Alternative Energy Sources	384
14.4.2	Innovative Energy Storage Technologies	386

14.5	Nature-Based Solutions	387	
14.5.1	Bio-Based Materials	387	
14.5.2	Biomimicry	388	
14.5.3	Green Infrastructure	389	
14.5.4	Synthetic Biology	389	
14.6	Summary	389	
14.7	Questions	390	
14.8	Problems	391	
	References	391	
<b>15</b>	<b>Sustainable and Resilient Energy Engineering</b>	<b>395</b>	
15.1	Introduction	395	
15.2	Environmental Impacts of Energy Generation	396	
15.2.1	Air Emissions	397	
15.2.2	Solid Waste Generation	400	
15.2.3	Water Resource Use	401	
15.2.4	Land Resource Use	401	
15.3	Nuclear Energy	401	
15.4	Strategies for Clean Energy	403	
15.5	Renewable Energy	405	
15.5.1	Solar Energy	405	
15.5.2	Wind Energy	406	
15.5.3	Water Energy	409	
15.5.4	Geothermal Energy	410	
15.5.5	Biomass Energy	413	
15.6	Economic Considerations	416	
15.7	Sustainability and Resiliency Considerations	418	
15.8	Summary	418	
15.9	Questions	420	
15.10	Problems	420	
	References	422	
<b>16</b>	<b>Sustainable and Resilient Materials, Waste Management, and Circular Economy</b>	<b>425</b>	
16.1	Introduction	425	
16.2	Sustainable Materials	426	
16.2.1	Eco-design and Green Materials	426	
16.2.2	Environmental Product Declarations (EPDs)	427	
16.2.3	Extended Producer Responsibility	427	
16.3	Waste Generation and Problems	428	
16.3.1	Types of Waste	429	
16.3.2	Nonhazardous Waste	429	
16.3.3	Hazardous Waste	429	
16.3.4	Effects and Impacts of Waste	430	
16.4	Waste Management	430	
16.4.1	Pollution Prevention	431	
16.4.2	Green Chemistry	432	

16.4.3	Waste Minimization	433
16.4.4	Reuse/Recycling	434
16.4.5	Energy Recovery	435
16.4.6	Landfilling	437
16.5	Integrated Waste Management	437
16.6	Sustainable Waste Management	440
16.7	Circular Economy	442
16.8	Resiliency Considerations	443
16.8.1	Resilient Materials	443
16.8.2	Resilient Waste Management	443
16.8.3	Resilient Circular Economy	444
16.9	Summary	444
16.10	Questions	445
16.11	Problems	446
	References	447
<b>17</b>	<b>Sustainable and Resilient Buildings</b>	<b>451</b>
17.1	Introduction	451
17.2	Green Building History	452
17.3	Why Build Green?	453
17.4	Green Building Concepts	454
17.4.1	Embodied Carbon and Carbon Neutral Approaches	454
17.5	Components of Green Building	455
17.6	Green Building Rating – LEED	457
17.6.1	LEED Case Study: HBS Tata Hall Executive Education Center	463
17.7	Sustainable Buildings	466
17.8	Resiliency Considerations	466
17.9	Summary	468
17.10	Questions	468
17.11	Problems	469
	References	470
<b>18</b>	<b>Sustainable and Resilient Civil Infrastructure</b>	<b>473</b>
18.1	Introduction	473
18.2	Principles of Sustainable Infrastructure	474
18.3	Civil Infrastructure	475
18.4	Envision™: Sustainability Rating of Civil Infrastructure	476
18.4.1	Envision™ Case Study: Berryessa Transit Center	477
18.5	Sustainable Infrastructure Practices	481
18.6	Built-Infrastructure Projects: Examples	484
18.6.1	Transportation Infrastructure Projects	484
18.6.1.1	Sustainable Airports	484
18.6.2	Water and Wastewater Treatment Projects	485
18.6.2.1	Sustainable Water Treatment	485
18.6.2.2	Reuse of Treated Wastewater	486

18.6.3	Stormwater Treatment/Green Infrastructure Projects	486
18.6.3.1	Green Roofs	487
18.6.3.2	Permeable Pavements	487
18.6.3.3	Rainwater Harvesting	488
18.6.3.4	Rain Gardens and Planter Boxes	491
18.6.3.5	Bioswales	491
18.6.3.6	Constructed Wetlands and Tree Canopies	491
18.7	Resiliency Considerations	494
18.8	Summary	494
18.9	Questions	495
18.10	Problems	495
	References	496
<b>19</b>	<b>Sustainable and Resilient Land Management</b>	<b>499</b>
19.1	Introduction	499
19.2	Land Management Problems	501
19.3	Contaminated Land Remediation Approach	503
19.4	Green and Sustainable Remediation Technologies	504
19.5	Sustainable Remediation Framework	509
19.6	Sustainable Remediation Indicators, Metrics, and Tools	512
19.7	Case Studies	513
19.8	Land Remediation Challenges and Opportunities	514
19.9	Resiliency Considerations	516
19.10	Summary	516
19.11	Questions	517
19.12	Problems	518

## **Section IV Sustainable and Resilient Engineering Applications 543**

### **21 Sustainable and Resiliency Assessment in Engineering Projects 545**

- 21.1 Introduction 545
- 21.2 Integrated Sustainability and Resiliency Assessment Framework 546
  - 21.2.1 Resiliency Assessment 546
  - 21.2.2 Sustainability Assessment 549
    - 21.2.2.1 Environmental Sustainability 550
    - 21.2.2.2 Social Sustainability 550
    - 21.2.2.3 Economic Sustainability 551
  - 21.2.3 Integrated Resiliency and Sustainability Assessment 551
- 21.3 Resiliency and Sustainability Assessment of Water Disinfection Technologies at Stickney Water Reclamation Plant 553
  - 21.3.1 Problem Statement 553
  - 21.3.2 Project Background 554
    - 21.3.2.1 Technical Design of Alternatives 555
  - 21.3.3 Integrated Resiliency and Sustainability Assessment 558
    - 21.3.3.1 Resiliency Assessment 558
    - 21.3.3.2 Sustainability Assessment 567
    - 21.3.3.3 Integrated Resilient Sustainability Index 574
  - 21.3.4 Conclusions and Recommendations 574
- 21.4 Resiliency and Sustainability Assessment to Design and Remediate a Contaminated Site 576
  - 21.4.1 Problem Statement 576
  - 21.4.2 Project Background 577
    - 21.4.2.1 Technical Design of Alternatives 577
  - 21.4.3 Integrated Resiliency and Sustainability Assessment 581
    - 21.4.3.1 Resiliency Assessment 581
    - 21.4.3.2 Sustainability Assessment 583
    - 21.4.3.3 Integrated Resilient Sustainability Index 591
  - 21.4.4 Lessons Learned 594
  - 21.4.5 Conclusions 594
- 21.5 Resiliency and Sustainability Assessment of Different Alternatives for Typical Highway Pavement 594
  - 21.5.1 Problem Statement 594
  - 21.5.2 Project Background 595
    - 21.5.2.1 Technical Design of Alternatives 595
  - 21.5.3 Integrated Resiliency and Sustainability Assessment 597
    - 21.5.3.1 Resiliency Assessment 597
    - 21.5.3.2 Sustainability Assessment 598
    - 21.5.3.3 Integrated Resilient Sustainability Index 603
  - 21.5.4 Conclusions 604
- 21.6 Resiliency and Sustainability Assessment of Community Gardens Versus Hydroponics: Chicago's Sustainable Food Systems 605
  - 21.6.1 Problem Statement 605
  - 21.6.2 Project Background 605
    - 21.6.2.1 Technical Design of Alternatives 605

21.6.3	Integrated Resiliency and Sustainability Assessment	606
21.6.3.1	Resiliency Assessment	606
21.6.3.2	Sustainability Assessment	607
21.6.3.3	Integrated Resilient Sustainability Index	615
21.6.4	Lessons Learned	615
21.6.5	Conclusions	616
21.7	Resiliency and Sustainability Evaluation of Green Infrastructure in a Chicago Neighborhood	616
21.7.1	Problem Statement	616
21.7.2	Project Background	617
21.7.2.1	Technical Design	618
21.7.3	Integrated Resiliency and Sustainability Assessment	620
21.7.3.1	Resiliency Assessment	620
21.7.3.2	Sustainability Assessment	621
21.7.3.3	Integrated Resilient Sustainability Index	626
21.7.4	Lessons Learned	626
21.7.5	Conclusions	627
	References	628
