

Brief Contents

About the Authors xxiii

Preface xxv

- 1** Introduction: Ecology, Evolution, and the Scientific Method 1

Part I: Life and the Physical Environment

- 2** Adaptations to Aquatic Environments 30
- 3** Adaptations to Terrestrial Environments 54
- 4** Adaptations to Variable Environments 80
- 5** Climates and Soils 106
- 6** Terrestrial and Aquatic Biomes 130

Part II: Organisms

- 7** Evolution and Adaptation 152
- 8** Life Histories 176
- 9** Reproductive Strategies 198
- 10** Social Behaviors 222

Part III: Populations

- 11** Population Distributions 240
- 12** Population Growth and Regulation 264
- 13** Population Dynamics Over Space and Time 288

Part IV: Species Interactions

- 14** Predation and Herbivory 310
- 15** Parasitism and Infectious Diseases 336
- 16** Competition 360
- 17** Mutualism 384

Part V: Communities and Ecosystems

- 18** Community Structure 406
- 19** Community Succession 434
- 20** Movement of Energy in Ecosystems 456
- 21** Movement of Elements in Ecosystems 482

Part VI: Global Ecology

- 22** Landscape Ecology and Global Biodiversity 506
- 23** Conservation of Global Biodiversity 532

Appendices

- Reading Graphs A-1
- Statistical Tables A-7
- Answers to “Analyzing Ecology” and “Graphing the Data” A-11
- Glossary G-1
- Index I-1
