Introduction xi

1 Success criteria: the goals of this book **1**
"Why?" – The purpose of this book 1
"What?" – What does "producer" even mean? 2
"Who?" – What kind of people make good producers? 3
"Where?" – The video game industry today 5

2 Who's who? meet the teams **9**
Game design 9
UX (user experience) 10
Writers 11
Art 12
Animation 13
Programming 14
Audio 16
QA 18
Release management 19
Localization (aka "Loc") 19
DevOps 20
LiveOps 21
Legal 21
HR 22
IT and Ops 22
Publishers 23
Brand, marketing, and community management 24
The players 25

3 Assessing the needs: Types of game **27**
Genre 27
Platform 28
Stakeholders 31
Release/monetization format 32

4 Building a schedule: project phases **36**
Kick-off (what are we making?) 36
Concepting (find the questions) 36
Preproduction (answer the questions) 37
Production (make the game) 38
Alpha (polish it) 39
Beta (test it) 39
Finaling (wrap it up) 40
Release (ship it) 40
Post-release content (retain the players) 41
Recap 42

5 Planning the work: project components **43**
What is a milestone anyway? 43
Tasks and their many forms 45
Bugs 48
Localization 54
Budgets 56
Outsourcers and contractors 59
Version control 60

6 Breaking in: getting the job **62**
CVs and LinkedIn 62
Networking starts now 63
Does anyone read cover letters? Yes. I do 64
Does a "producer portfolio" even exist? 65
Where do I look for jobs? 66
The interview 67
What salary should I ask for? 70
"The QA route" 71
Coming from another industry 72

7 What's my task? producer responsibilities **74**
Your first week in the job 74
Concepting phase responsibilities 75
Preproduction phase responsibilities 76
Production phase responsibilities 77
Alpha phase responsibilities 80
Beta phase responsibilities 82
Release phase responsibilities 83
Postmortems 84

Schedules and scenarios 85
Estimating work 89
Clarity and transparency 93
Team culture 94
Change and education 96
Following up 98
Miscellaneous responsibilities (I'm serious) 99

8 Make it happen: producer methods 101
Do the reading – common project management methodologies 101
The good, the bad, and the unnecessary – meetings 104
Who decides? – Getting decisions made 108
Who's responsible for this? – The RASCI document 109
When did we decide that? – decision logs 110
What's the worst that can happen? – risk registers 111
Identify, solve, prevent – a problem-solving method 111
Grand designs – pipelines and processes 113
Outsourcing – effective, but not simple 115
Reports that serve your boss (and you!) 117
Say what? – team language and naming conventions 119
Look both ways – project data 120
Cut the feature, save the game 123
Smooth operation – how to prevent "crunch" 124
Keep improving – regular retrospectives 128
Read the manual – master your tools 128

9 Empower them: people and communication 130
Connecting people 130
Do you trust me? – building trust in people 132
Do you trust *that?* – building trust in documentation 135
Motivating your team 137
Listening: the quiet superpower 139
Presenting: the loud superpower 142
Teaching 145
Constructive criticism – giving feedback that empowers 147
How to write an email that people actually read 150
Anticipating questions 152
Opinions vs expectations – effective negotiation 153
The power of the stupid question 155

10 One more team member: you **157**
Growing and learning 157
Receiving feedback 159
"I intend to…" and "deliberate action" – two techniques for taking action with confidence 161
Understanding your bandwidth 163
Practice effective laziness – automate yourself 165
Protecting yourself from burnout 166
Measuring your own success 168

11 Continuous improvement: progressing in the job **171**
Leveling up – producer titles 171
Promotions and pay rises 173
When should I change jobs? 176
Big studio, little studio 176

12 Closing words – make it happen! **179**

Glossary of terms 181
