Prologue: Why write a biography of carbon?	I
PART I	
The invention of carbon	9
1 Mephitis	II
A thing with many names	13
A genius of place	14
Geomythologies	16
An elixir of youth	20
2 An indescribable air	22
From mephitic air to sylvester spirit	22
From sylvester spirit to fixed air	24
From fixed air to carbonic acid	27
3 Between diamond and coal	29
The diamond enigma	29
A creature of nomenclature	32
Coal's footprint	34
Word battles	36
4 An exemplary element	39
A textbook example	40
A material abstraction	42
A metaphysical substance	45

5 Carbon liberates itself	48
One among others	48
Two or three chemistries?	49
A quartet of elements	52
An exchange centre	55
A measurement standard	57
6 A relational being	60
Atomicity	60
The C–C bond	62
Asymmetry	63
Dispositions and affordances	69
A philosopher's stone	72
7 Welcome to the nanoworld	76
Filaments doomed to oblivion	78
Seeing without discovering	81
A football	83
The nanotube jungle	86
8 Strategic materials	89
Nuclear graphite	89
Graphene as an academic material	91
A pure surface rich in promises	93
At the limits of materiality	95
Unique and generic	97
<b>PART II</b>	
<b>Carbon civilization</b>	<b>101</b>
9 Traces, stories and memories	103
Carbon as writer	103
Carbon as graphic designer	104
Diamond as engraver and reader	108
Radiocarbon dating	III
The carbon archive	II3

10	The resilient rise of fossil fuels	116
	Memories of life on earth	116
	A carbon liberation front?	118
	Multiple coals	119
	Prometheus unbound	123
	Scarcity foretold	125
	A hoped-for turnaround	126
11	The bewitching power of oil	129
	The rush for black gold	129
	A capitalist sorcerer	131
	A gift from the earth	132
	Virtues as traps	135
12	The age of plastics	140
	‘Better things for better living . . . through chemistry’	141
	The miracles of plastic	144
	Reinforced with carbon	146
	A continent of waste	149
13	Working towards a more sustainable economy	153
	From black gold to green oil	154
	Towards a white carbon?	156
	A universal machine	159
14	The carbon market	162
	Carbon finance	163
	The new general equivalent	164
	A common measure	166
	Why carbon?	168
	The price of carbon	170

## PART III

### Carbon temporalities

15	Carbon cosmogony	179
	In the mists of time	179
	Unlikely carbon	181
	Anthropogenic carbon?	186
	Carbon as earthling	189
	Multiple cycles	191
16	Turbulence in the biosphere	194
	Redox carbon	194
	Selfish carbon?	196
	A melting pot	198
	Star of the oceans: <i>Emiliana huxleyi</i>	199
	The potential of soils	201
17	Rethinking time with carbon	206
	The Anthropocene	206
	A grand narrative	208
	The accelerating arrow of time	210
	Unravelling the scales	213
	Multiple temporalities	216
	Epilogue: The heteronyms of carbon	222
	Stories of genius	222
	A plurality of modes of existence	224
	Ontography	226
	Who is carbon?	230
	Notes	234
	Index	272
