Preface	v
---------------	---

PART ONE

Specific Quantitative Determination of Water by Karl Fischer Reagent. Reactions of Inorganic Compounds

I. Methods for the Determination of Water	3
A. Oven Drying	3
B. Distillation	4
C. Absorption	5
D. Miscellaneous Methods	7
II. Titrimetric Determination of Water Using Karl Fischer Reagent. Summary of Analytical Procedures Based on Absorption or Elimination of Water	19
A. Reagent Specifications	19
B. Preparation of Karl Fischer Reagent	19
C. Preparation of Standard Water-in-Methanol Solution	19
D. Standardization of the Reagent	22
E. Determination of Free Water or Water of Hydration in Inert Compounds (General Procedure)	22
1. In Soluble Materials	22
2. In Porous Solids	23
F. Determination of Free Water in Compounds That Interfere on Direct Titration	23
1. In Carbonyl Compounds	23
2. In Mercaptans	24
G. Analytical Procedures Employing Karl Fischer Reagent	24
1. General	24
2. Determination of Alcoholic Hydroxyl	31
3. Determination of Amino Alcohols	32
4. Determination of Primary Plus Secondary Amines	32
5. Determination of Primary Amines	33
6. Determination of Anhydrides	33
a. Acid Hydrolysis	33
b. Alkaline Hydrolysis	34
7. Determination of Carbonyl Compounds	34
8. Determination of Carboxylic Acids	35
9. Determination of Esters	35
10. Determination of Nitriles	36
11. Determination of Dialkyl and Hydroperoxides	36
12. Analytical Procedures Applied to Analysis of Complex Mixtures	37
III. Nature of the Karl Fischer Reagent	39
A. Historical	39
B. Stoichiometry of the Reaction	41
1. General	41
2. Minimum Sulfur Dioxide Requirement	45

3. Minimum Pyridine Requirement	45
4. Minimum Methanol Requirement	46
C. Addition Compounds Involved in Karl Fischer Reagent	47
1. Likely Binary Compounds in the Active Reagent	47
2. Likely Compounds in "Spent" Fischer Reagent	51
3. Identification of Crystalline Constituents in Active and Spent Karl Fischer Reagent	53
D. Nature of Parasitic Side Reactions	54
E. Studies on Modifications of Karl Fischer Reagent	60
1. General	60
2. Possible Substitutes for Pyridine	61
3. Possible Substitutes for Methanol	62
IV. Titrimetric Procedures for Using Karl Fischer Reagent	65
A. Recommended Preparation of Karl Fischer Reagent	65
B. Standardization of the Reagent	68
1. Preparation of Water-in-Methanol Standard	68
2. Standardization of Standard Water-in-Methanol Solution and of Karl Fischer Reagent	69
C. Macrotitrimetric Methods	71
1. Visual Endpoint	71
a. Apparatus	71
b. Titration	74
2. Electrometric Endpoints	79
a. Titration Assemblies	79
b. Potentiometric Back Titration Method	82
c. Dead-Stop Back Titration Method	86
d. Potentiometric Direct Titration Method	93
e. Dead-Stop Direct Titration Method	94
3. Conclusions on Macrotitration Methods	97
D. Microtitrimetric Methods	97
1. Visual Microtitration Method	97
2. Electrometric Microtitration	99
3. Other Electrometric Microtitration Techniques	101
4. Conclusions on Microtitration Methods	102
V. Determination of Water in Organic Compounds	103
A. General	103
B. Determination of Water in Organic Acids	104
C. Determination of Water in Alcohols	114
D. Determination of Water in Esters, Lactones, Carbamates, Ortho Esters, and Esters of Inorganic Acids	118
E. Determination of Water in Acetals, Ethers, and Hydrocarbons ...	120
F. Determination of Water in Anhydrides and Acyl Halides	124
G. Determination of Water in Basic, Neutral, or Slightly Acidic Organic Nitrogen Compounds	126
Determination of Water in Hydrazine Derivatives	130
H. Determination of Water in Neutral Halides and Sulfur Compounds	131
1. Determination of Moisture in Halides	132
2. Determination of Water in Sulfur Compounds	134
a. General	134
b. Action of Karl Fischer Reagent on Mercaptans	134
c. Effect of Thiourea and Substituted Thioureas	139
d. Effect of Thioacetic Acid	141
I. Determination of Water in Organic Peroxides. Effect of Peroxides of Karl Fischer Reagent	142
1. Hydroperoxides	142
2. Dialkyl Peroxides	143

3. Diacyl Peroxides	143
4. Miscellaneous Peroxides	146
J. Determination of Water in Carbonyl Compounds	146
1. Preliminary Studies	146
2. Direct Analysis of Carbonyl Compounds for Water	151
a. General	151
b. Reagents	153
c. Analytical Procedure	153
d. Discussion	154
e. Interfering Substances	155
K. Determination of Water in Dimethylolurea	155
L. Determination of Water of Hydration in Organic Compounds ...	156
VI. Determination of Water in Commercial Organic Materials	161
A. Analysis of Petroleum Products for Moisture	162
1. Determination of Moisture in Liquid Hydrocarbons	162
2. Determination of Moisture in Hydrocarbon Gases	168
a. Procedure for Condensable Gases	169
b. Procedure for Noncondensable Gases	171
c. Discussion	171
B. Analysis of Oils for Moisture	172
C. Determination of Moisture in Foodstuffs	178
D. Determination of Moisture in Carbohydrates	194
E. Determination of Moisture in Plastics, Lacquers, Paints, and Varnishes	210
F. Determination of Moisture in Naval Stores	214
G. Determination of Moisture in Explosives	216
H. Miscellaneous Applications	221
VII. Determination of Water in Inorganic Compounds	223
A. Determination of Water in Salts of Organic Acids	224
B. Determination of Water in Inorganic Salts	231
C. Determination of Water in Desiccants	235
D. Determination of Water in Inorganic Acidic Materials	235
VIII. Reactions of Karl Fischer Reagent with Inorganic Compounds	247
A. General	247
B. Reactions Involving Oxygen of Metal Oxides and Hydroxides ...	248
C. Reactions Involving Peroxy Compounds	253
D. Reactions of Weak Acids and Oxides	256
E. Reactions of Some Salts of Inorganic and Organic Acids	258
F. Miscellaneous Reactions	263

PART TWO

Organic Reactions Involving Liberation or Consumption of Water.
 Application of Karl Fischer Reagent to Quantitative
 Determination of Organic Functional Groups

IX. Determination of Alcoholic Hydroxyl	267
A. Methods of Analysis for Alcoholic Hydroxyl	267
B. Development of Fischer Reagent Hydroxyl Procedure	273
C. Reagents	274
Preparation of Stock Solution of $\text{BF}_3 \cdot 2\text{CH}_3\text{COOH}$	275
D. General Analytical Procedure	277
E. Analytical Results	279
1. Reaction of Aliphatic and Alicyclic Alcohols	279
2. Reaction of Phenols	282

3. Determination of Aliphatic Alcohols in the Presence of Phenols	282
F. Interfering Substances	284
G. Other Studies	289
H. Determination of Aliphatic Amino Alcohols	292
1. Development of the Method	293
2. Preparation of Reagent	293
3. Analytical Procedure	294
4. Experimental Results	294
X. Determination of Organic Carboxylic Acids	297
A. Methods of Analysis for Organic Acids	297
B. Development of the Method	299
C. Reagents	300
D. General Analytical Procedure	301
E. Analytical Results	302
F. Interfering Substances	305
XI. Determination of Acid Anhydrides	311
A. Introduction	311
B. Development of Acid Hydrolysis Procedure	313
C. Reagent for Acid Hydrolysis	315
D. Acid Hydrolysis Procedure	315
E. Experimental Results	316
F. Development of the Alkaline Hydrolysis Procedure	317
G. Reagents for Alkaline Hydrolysis	320
H. Alkaline Hydrolysis Procedure	320
I. Experimental Results	321
XII. Determination of Carbonyl Compounds	323
A. Methods of Analysis for Carbonyl Compounds	323
B. Development of the Method	325
C. Reagents	327
D. General Analytical Procedure	328
E. Experimental Results	329
F. Interfering Substances	331
G. Other Studies	333
XIII. Determination of Amines and Nitriles	337
A. Determination of Primary Plus Secondary Amines	337
1. Methods of Analysis for Amines	337
2. Development of the Method	339
3. Reagents	339
4. Analytical Procedure	339
5. Experimental Results	341
6. Interfering Substances	343
7. Other Studies	344
B. Determination of Primary Amines	345
1. Methods of Analysis for Primary Amines	345
2. Development of the Method	346
3. Reagents	347
4. Analytical Procedure	347
5. Experimental Results	349
6. Interfering Substances	351
C. Determination of Nitriles	352
1. Methods of Analysis for Nitriles	352
2. Development of the Method	353
3. Reagents	354
4. Analytical Procedure	355
5. Experimental Results	356

6. Interfering Substances	357
XIV. Determination of Peroxides	361
A. General	361
B. Determination of Hydroperoxides and Dialkyl Peroxides	361
1. Methods of Analysis	361
2. Development of the Method	362
3. Reagents	363
4. Analytical Procedure	363
5. Experimental Results	365
6. Interfering Substances	365
C. Reactions of Diacyl Peroxides	366
XV. Miscellaneous Analytical Procedures	369
A. Determination of Acetyl Chloride and Acetylsulfanilyl Chloride ..	369
1. Development of Method for Acetyl Chloride	369
2. Proposed Analytical Procedure for Acetyl Chloride	371
3. Analytical Procedure for Acetylsulfanilyl Chloride	371
4. Discussion of Procedure for Acetylsulfanilyl Chloride	373
5. Interfering Substances in Procedure for Acetylsulfanilyl Chloride	374
6. General Procedure for Acyl Halides	375
B. Determination of Esters	375
1. Development of Method	375
2. Reagents	377
3. Analytical Procedure	377
C. Determination of Dibenzyl Ether Linkages in Phenol Alcohols and Derived Phenolic Resins	378
1. Reagents	379
2. Apparatus	379
3. Analytical Procedure	379
4. Analytical Results	380
D. Determination of Mercaptans	381
E. Determination of Metal Salts of Organic Acids	381
1. General	381
2. Reagent	383
3. Analytical Procedure	383
4. Experimental Results	384
F. Determination of Sulfur Trioxide in Fuming Sulfuric Acid	385
1. General	385
2. Reagents	385
3. Analytical Procedure	385
4. Experimental Results	387
5. Other Studies	387
XVI. Proposed Further Studies Involving Karl Fischer Reagent	389
A. Possible Modified Reagents (Chapters II and III)	389
B. Direct Electrometric Micro Methods (Chapter IV)	390
C. Interferences of Organic Compounds (Chapter V)	391
D. Applications to Commercial Materials (Chapter VI)	391
E. Quantitative Aspects of Inorganic Reactions (Chapter VIII) ..	392
F. Quantitative Organic Analytical Techniques (Chapters IX through XV)	395
Author Index	403
Subject Index	411
