

Contents

Preface.....	xi
About the Author	xiii
Chapter 1 Calculus Revision.....	1
Differentiation	1
Function Analysis (Derivatives).....	3
Extreme Values.....	4
Derivatives of Functions of Multi-variables.....	5
Partial Differentiation.....	6
Gradient ∇	6
Total Derivative	8
Integration	9
Indefinite Integral	9
Definite Integral.....	11
Key Takeaways.....	12
Exercises.....	12
Chapter 2 Fundamental Principles of Aerodynamics (Subsonic)	13
Continuity Equation	13
Bernoulli's Equation.....	15
Stagnation Pressure	18
Applications of Bernoulli's Equation	19
Ideal Gas Law.....	22
First Law of Thermodynamics.....	24
Thermal Processes	25
-V Diagram	25
Isothermal Process	26
Isobaric Process.....	27
Isochoric (Isovolumetric) Process	27
Adiabatic Process	28
Energy Equation.....	29
Stagnation Temperature.....	31
Key Takeaways.....	32
Exercises.....	33
Chapter 3 Viscous Flow and Boundary Layer.....	34
Viscosity	34
Effect of Pressure and Temperature on Viscosity	35
Pressure Loss.....	36

Reynolds Number and Regimes of Viscous Flow.....	38
Reynolds Number	39
Regimes of Viscous Flow	39
Boundary Layers	41
Structure of the Boundary Layer.....	41
Viscous Flow of Boundary Layer.....	43
Boundary Layer Separation over a Curved Surface (Stall).....	47
Form Drag – Separation Drag	49
Key Takeaways.....	51
Exercises.....	52
Chapter 4 Aerodynamic Forces – Subsonic Flight	53
Geometric Features of Aerofoil.....	54
Name of Aerofoil.....	54
Dimensions of Airflow over Aerofoil.....	56
Finite/Infinite Wings	56
Theory of Lift.....	57
Bernoulli’s Theorem.....	57
PDE Aerodynamics System.....	58
Circulation Theory of Lift.....	60
Drag.....	65
Induced Drag	65
Parasite Drag	69
Total Drag.....	72
Key Takeaways.....	73
Exercises.....	73
Chapter 5 Applications of Analysis of Aerodynamic Forces	74
Features of Aerofoil on Aerodynamic Forces	74
Thickness of Aerofoil	74
Aspect Ratio of Aerofoil.....	75
Camber of Aerofoil.....	77
Laminar Flow Aerofoil.....	77
Features to Delay/Prevent Boundary Layer Separation	78
Shape of Wing Tip.....	80
Washout	81
Performance	81
Level Flight.....	81
Power Required and Power Available	84
Climbing.....	92
Descending	94
Banking	95
Force Feed-Back Model for PCATD.....	100

	Aerodynamic Force	100
	Inertia Force	102
	Frictional Force	103
	Key Takeaways.....	104
	Exercises.....	104
Chapter 6	Stability	105
	Revision on Moment.....	105
	Aerodynamic Forces.....	105
	Principles of Moment	105
	Pitch Moment and Pitch Moment Coefficient	108
	Aerodynamic Center (AC).....	110
	Longitudinal Stability	113
	Effects on Longitudinal Stability	114
	Longitudinal Stability Diagram	116
	Lateral Stability.....	117
	Factors on Lateral Stability	118
	Lateral Stability Diagram.....	121
	Directional Stability	122
	Factors on Directional Stability.....	122
	Directional Stability Diagram	125
	Lateral and Directional Stability (Dynamic)	126
	Spiral Instability	126
	Dutch Roll.....	127
	Design Requirements for Lateral and Directional Stability	127
	Longitudinal Dynamic Stability	127
	Phugoid Mode.....	127
	Short-Period Mode	128
	Key Takeaways.....	128
	Exercises.....	128
Chapter 7	Speed of Sound and Mach Number.....	129
	Speed of Sound in Air.....	129
	Mach Number.....	132
	Mach Wave	132
	Shockwave	134
	Special Mach Numbers	135
	Ranges of Flights.....	136
	Mach Number Measurement.....	136
	Low Subsonic Flight.....	137
	High Subsonic and Low Transonic Flight.....	137
	Supersonic Flight.....	138

	Mach Number Applications	139
	Instrument Check	139
	Performance Check	140
	Key Takeaways	141
	Exercises.....	141
Chapter 8	Compressible Airflow.....	142
	Compressible 1-D Airflow System	142
	Continuity Equation	142
	Euler Equation	143
	Energy Equation	143
	Ideal Gas Law (State Equation of Gas)	143
	Critical Point.....	143
	Speed Coefficient M^*	146
	Compressible Airflow with a Variable Area of Flow Path.....	150
	Convergent–Divergent Nozzle.....	152
	Shockwave.....	154
	Formation of Shockwave	154
	Air Properties Before and After a Normal Shockwave.....	155
	Shockwave in a Flow Path.....	159
	Key Takeaways	161
	Exercises.....	161
Chapter 9	Aerodynamics of Transonic Aerofoils	163
	Shockwaves on Aerofoil.....	163
	Structure of Shockwave on Aerofoil	164
	Movement of Shockwave on Aerofoil	164
	Effective Critical Mach Number	166
	Changes of C_P , C_L , and C_D on a Transonic Aerofoil.....	166
	Shockwave on Lift.....	167
	Shock Drag	167
	Changes of C_P , C_L , and C_D between M_{crit} and M_{det}	168
	Shock Stall.....	171
	Shockwaves on Control Surfaces	171
	Transonic Control Issues	172
	Key Takeaways	175
	Exercises.....	175
Chapter 10	Transonic Flight and Aerofoils.....	177
	Transonic Speed Limits.....	177
	Coffin Corner.....	178
	Buffet Boundary	178

Effects on Buffet Boundary.....	179
Crossover Altitude.....	181
Increase M_{crit}	181
Slimness.....	182
Flat Leading Edge	182
Sweepback	183
Vortex Generators.....	183
Transonic Aerofoils	183
Low Thickness to Chord Ratio t/c	184
Supercritical Aerofoil	185
Sweepback Wings.....	186
Devices to Delay Shock Stall	188
Area Rule.....	190
Key Takeaways.....	191
Exercises.....	191
Chapter 11 Supersonic Waves.....	192
Two Examples of Reversible and Irreversible Adiabatic Processes (Supersonic)	192
Reversible	192
Irreversible.....	192
Oblique Shockwaves	194
Air Properties before and after an Oblique Shockwave.....	194
θ - β - M Equation.....	199
Expansion Waves.....	203
Air Properties before and after Expansion Waves	204
Size of Expansion Region.....	205
The Limit of Expansion.....	207
Key Takeaways.....	209
Exercises.....	209
Chapter 12 Introduction of Supersonic Flight	211
Supersonic Flow over Aerofoil.....	211
Thin Plate	211
Pressure Coefficient.....	212
Double Wedge	214
Biconvex	216
Boundary Layer and Drag.....	219
Boundary Layer in Supersonic Flow.....	220
Drag of Supersonic Flight	220
Supersonic Wings and Planforms	221
Unswapt Wings.....	221
Swept Wings.....	222

Delta Wings	224
Variable-Sweep Wings	224
Body Shapes of Supersonic Airplane	224
Kinetic Heating	225
Supersonic Control	227
Key Takeaways	227
Appendix I: List of Derivatives	228
Appendix II: θ-β-M Diagram	229
Appendix III: Prandtl-Meyer Function	230
Appendix IV: Answers to Exercises	232
Notation	237
Acknowledgments	239
References	240
Index	241
Chapter 12 Introduction of Supersonic Flight	241
Supersonic flow over a flat plate	241
Thin Plate	241
Pressure Coefficient	242
Double Wedge	244
Boundary Layer and Drag	246
Boundary Layer in Supersonic Flow	249
Drag of Supersonic Flights	250
Supersonic Wings and Planforms	251
Un swept Wings	251
Swept Wings	252
Two Examples of Expansion and Compression	252
Processes (Supersonic)	252
Reversible	252
Irreversible	252
Oblique Shockwaves	254
Air Properties before and after an Oblique Shockwave	254
θ - β - M Equation	259
Expansion Waves	260
Air Properties before and after Expansion Waves	264
Size of Expansion Region	265
The Limit of Expansion	267
Key Takeaways	269
Exercises	269
