

CONTENTS

Preface	v
---------------	---

GENERAL DISCUSSION

I. Organic Compounds as Precipitants for Inorganic Ions.....	3
Salt-Forming Reagents	5
Precipitation of Normal Salts.....	5
The Arsonic Acids	5
Acid Nitro Compounds.....	9
Anion Precipitants	11
Formation of Complex Salts.....	13
Factors Influencing Complex Formation.....	13
Reactive Groups in Reagents.....	14
Summary	29
"Adsorption" Precipitants.....	30
II. Some Properties of Organometallic Precipitates.....	33
Color	33
Solubility	35
Stability	37
Structure	40
Chemical Evidence for Structure.....	41
Crystallographic Evidence for Structure.....	42
Magnetochemical Evidence for Structure.....	43
Summary	46
III. Separations by Means of Organic Reagents.....	47
Separation by Solvent Extraction.....	47
Separation by Precipitation.....	50
Precipitation by a Monobasic Acid.....	53
Precipitation by a Dipolar Ion.....	55
Methods of Evaluating the Solubility Products.....	59
Applications of the Solubility Product Data.....	60
Summary	65
IV. Theory of the Solubility of Salts with a Common Anion.....	67
V. Techniques in Gravimetric and Volumetric Analysis with Organic Reagents	79
Preparation and Purification of Organic Reagents.....	79
Solutions of Organic Reagents.....	81
Solvents	81
Concentration of Reagents.....	82
Stability	83
Conditions for Precipitation.....	83
pH Control.....	83
Temperature of Precipitation.....	84
Rate of Precipitation.....	85
Digestion	85

Filtration and Washing.....	85
Drying (Ignition) and Weighing.....	86
Calculation of Results.....	87
Volumetric Determinations.....	87
Reclaiming Organic Reagents.....	91

SPECIAL REAGENTS

VI. Anthranilic Acid	95
Determination of Cadmium.....	98
Microdetermination of Cadmium.....	99
Determination of Zinc.....	100
Microdetermination of Zinc.....	100
Determination of Zinc in Tin-Lead Solder and in White Metal Alloys	101
Analysis of Solder and Zinc-Tin Alloys.....	101
White Metal Alloys Containing Iron.....	102
Zinc Chloride Fluxes.....	103
Enamel Coating of Tin Cans.....	103
Other Methods for Zinc.....	103
Determination of Cobalt.....	104
Miscellaneous Determinations.....	104
Similar Reagents.....	105
VII. The Arsonic Acids.....	107
Determination of Zirconium.....	108
With Phenylarsonic Acid.....	108
In the Presence of Iron (III).....	109
In the Presence of Thorium.....	109
In the Presence of Titanium.....	110
With <i>n</i> -Propylarsonic Acid.....	110
With <i>p</i> -Hydroxyphenylarsonic Acid.....	110
In Steel.....	111
With Phenylarsonic Acid.....	111
With <i>n</i> -Propylarsonic Acid.....	112
With Methylarsonic Acid.....	113
Determination of Thorium.....	113
Determination of Titanium.....	114
Basic Method.....	114
In Steel and Iron Ore.....	115
Titanium and Zirconium in Burnt Refractory.....	115
Titanium and Zirconium in Plastic Clay.....	116
Titanium and Zirconium in Titaniferous Materials.....	116
Determination of Iron with <i>p-n</i> -Butylphenylarsonic Acid.....	117
Determination of Tin with Phenylarsonic Acid.....	117
Determination of Bismuth.....	118
In the Absence of Interfering Ions.....	118
Separation of Bismuth from Cadmium, Cobalt, Copper, Nickel, and Silver.....	119
VIII. α -Benzoin Oxime.....	121
Determination of Copper.....	123
Volumetric Analysis of the Copper Precipitate.....	123
Gravimetric Microdetermination of Copper.....	124
In Steel Containing Molybdenum and Vanadium.....	125
In Tungsten Steels.....	126

Filtration and Washing.....	85
Drying (Ignition) and Weighing.....	86
Calculation of Results.....	87
Volumetric Determinations.....	87
Reclaiming Organic Reagents.....	91

SPECIAL REAGENTS

VI. Anthranilic Acid	95
Determination of Cadmium.....	98
Microdetermination of Cadmium.....	99
Determination of Zinc.....	100
Microdetermination of Zinc.....	100
Determination of Zinc in Tin-Lead Solder and in White Metal Alloys	101
Analysis of Solder and Zinc-Tin Alloys.....	101
White Metal Alloys Containing Iron.....	102
Zinc Chloride Fluxes.....	103
Enamel Coating of Tin Cans.....	103
Other Methods for Zinc.....	103
Determination of Cobalt.....	104
Miscellaneous Determinations.....	104
Similar Reagents.....	105
VII. The Arsonic Acids.....	107
Determination of Zirconium.....	108
With Phenylarsonic Acid.....	108
In the Presence of Iron (III).....	109
In the Presence of Thorium.....	109
In the Presence of Titanium.....	110
With <i>n</i> -Propylarsonic Acid.....	110
With <i>p</i> -Hydroxyphenylarsonic Acid.....	110
In Steel.....	111
With Phenylarsonic Acid.....	111
With <i>n</i> -Propylarsonic Acid.....	112
With Methylarsonic Acid.....	113
Determination of Thorium.....	113
Determination of Titanium.....	114
Basic Method.....	114
In Steel and Iron Ore.....	115
Titanium and Zirconium in Burnt Refractory.....	115
Titanium and Zirconium in Plastic Clay.....	116
Titanium and Zirconium in Titaniferous Materials.....	116
Determination of Iron with <i>p-n</i> -Butylphenylarsonic Acid.....	117
Determination of Tin with Phenylarsonic Acid.....	117
Determination of Bismuth.....	118
In the Absence of Interfering Ions.....	118
Separation of Bismuth from Cadmium, Cobalt, Copper, Nickel, and Silver.....	119
VIII. α -Benzoin Oxime.....	121
Determination of Copper.....	123
Volumetric Analysis of the Copper Precipitate.....	123
Gravimetric Microdetermination of Copper.....	124
In Steel Containing Molybdenum and Vanadium.....	125
In Tungsten Steels.....	126

XV. Precipitants for Anions.....	233
Benzidine	233
Determination of Sulfate.....	234
Microdetermination of Sulfate.....	236
Manometric Combustion Method.....	238
Determination of Tungsten.....	240
Nitron	241
Determination of Nitrate.....	242
Determination of Perrhenate.....	242
Other Determinations.....	243
Tetraphenylarsonium Chloride.....	243
Determination of Mercury.....	244
Determination of Tin.....	245
Determination of Cadmium and Zinc.....	245
Triphenyltin Chloride	245
XVI. Quinaldic Acid.....	247
Determination of Copper.....	250
Determination of Copper in the Presence of Lead, Phos- phoric Acid, Arsenious and Arsenic Acids.....	250
Determination of Copper in the Presence of Manganese, Nickel, and Cobalt.....	251
Determination of Copper in the Presence of Cadmium.....	251
Microdetermination of Copper and Separation of Copper from Phosphoric, Arsenious, and Arsenic Acids....	251
Determination of Copper in Cast Iron and Steel.....	252
Determination of Cadmium.....	253
Determination of Zinc.....	253
Determination of Zinc in the Presence of Phosphoric Acid..	254
Determination of Zinc in the Presence of Iron, Aluminum, Uranium, Beryllium, and Titanium.....	254
Determination of Zinc in the Presence of Copper, Mercury, and Silver.....	254
Microdetermination of Zinc.....	255
Polarography of Quinaldic Acid.....	256
XVII. Salicylaldoxime	259
Determination of Copper.....	260
Microdetermination of Copper.....	261
Determination of Copper in Alloys.....	262
Miscellaneous Determinations.....	262
Other Applications of Salicylaldoxime.....	263
XVIII. Tannin	265
Separation and Determination of Columbium and Tantalum...	266
Determination of Tungsten.....	268
Determination of Uranium.....	270
Miscellaneous Determinations.....	270
XIX. Thionalide	273
Determination of Copper.....	274
Determination of Silver.....	275
Determination of Mercury.....	275
Determination of Bismuth.....	276
Precipitation in Acid Solution.....	276
Precipitation in Tartrate-Cyanide Solution.....	277
Determination of Lead.....	278

Determination of Magnesium.....	173
Microdetermination of Magnesium.....	176
Determination of Magnesium in Cement, Limestone, and Similar Materials.....	177
Determination of Magnesium in Alloys.....	179
Polarographic Determination of Magnesium.....	180
Determination of Zinc.....	182
Microdetermination of Zinc.....	182
Determination of Zinc in Alloys.....	183
Other Applications of Oxine.....	183
Derivatives of Oxine as Precipitants.....	188
XII. Miscellaneous Reagents.....	191
Benzotriazole	191
β -Furfuraldoxime	192
Determination of Palladium.....	193
Hexanitrodiphenylamine (Dipicrylamine).....	193
Determination of Potassium.....	195
Mercaptobenzthiazole	197
Phenylthiohydantoic Acid.....	198
8-Quinolinecarboxylic Acid.....	199
Anti-1,5-di(<i>p</i> -methoxyphenyl)-1-hydroxylamino-3-oximino- 4-pentene.....	200
Determination of Tungsten in Ores.....	201
Determination of Tungsten in Alloys and Metals.....	204
Other Reagents.....	205
XIII. α -Nitroso- β -Naphthol	207
Determination of Cobalt.....	209
Determination of Cobalt in Steel.....	210
Determination of Cobalt in Plain Carbon and Other Steels Containing Less than 0.10% Cobalt.....	212
Determination of Cobalt in Cast Iron, Open Hearth Iron, and Wrought Iron.....	212
Determination of Cobalt in Magnet and High-Speed Tool Steel	212
Amperometric Titration of Cobalt.....	213
Determination of Iron.....	214
Determination of Iron in the Presence of Aluminum and Gallium	214
Determination of Iron in the Presence of Zirconium.....	214
Miscellaneous Determinations.....	215
XIV. Picrolonic Acid.....	217
Determination of Calcium.....	219
Gravimetric Determination of Calcium.....	219
Polarographic Determination of Calcium.....	220
Microdetermination of Calcium.....	222
Microgravimetric Method.....	223
Microvolumetric Method.....	223
Microgasometric Method.....	224
Determination of Lead.....	229
Determination of Lead in the Presence of Metals.....	229
Determination of Thorium.....	230
Microdetermination of Thorium.....	230

Determination of Antimony.....	278
Determination of Thallium.....	278
Determination of Thallium in Pure Solutions.....	278
Determination of Thallium in Presence of Other Elements.....	279
Determination of Platinum Metals.....	280
Determination of Rhodium.....	280
Determination of Ruthenium.....	280
Appendix	283
Drying Temperatures and Conversion Factors.....	283
Elements Determined Gravimetrically and Volumetrically by Organic Reagents.....	284
Author Index.....	287
Subject Index.....	295
