

Contents

<i>Preface</i>	x
<i>How to use this book</i>	xi
<i>Acknowledgements</i>	xii
Units and Measurements	1
Philosophy and practice in science	1
The S.I. system of units	1
Symbols and equations in physics	3
Making measurements in physics	4
Uncertainty and accuracy	6
Summary	8
Revision questions	8

PART 1

Waves

1. Properties of Waves	11
1.1 Types of waves	11
1.2 Measuring waves	12
1.3 Properties of waves	14
1.4 Longitudinal and transverse waves	17
1.5 Polarised light	20
Summary	21
Revision questions	22
2. Sound	24
2.1 The nature and properties of sound	24
2.2 The human ear	26
2.3 Ultrasonics	28

2.4 Vibrating strings	29
2.5 Acoustic resonance	31
Summary	34
Revision questions	35
3. Optics	36
3.1 Interference and the nature of light	36
3.2 Reflection and refraction of light	39
3.3 Lenses	42
3.4 Optical instruments	46
Summary	48
Revision questions	49

4. Electromagnetic Waves	50
4.1 The visible spectrum	50
4.2 Types of spectra	51
4.3 Infra-red and beyond	56
4.4 Ultraviolet radiation, X-radiation and gamma radiation	61
Summary	63
Revision questions	64

PART 2

Properties of Materials

5. Matter and Molecules	67
5.1 States of matter	67
5.2 Elements and compounds	69

5.3	The Avogadro constant, N_A	72
5.4	Intermolecular forces	73
	Summary	76
	Revision questions	76
6.	Thermal Properties of Materials	77
6.1	Thermal expansion	77
6.2	Specific heat capacity	79
6.3	Specific latent heat	81
6.4	Heat transfer	84
6.5	More about thermal conduction	86
	Summary	89
	Revision questions	90
7.	Strength of Solids	91
7.1	Measuring force	91
7.2	Force and materials	93
7.3	Stress and strain	94
7.4	Stress versus strain curves	97
7.5	Elastic energy	100
	Summary	102
	Revision questions	102
8.	Pressure	103
8.1	Pressure and force	103
8.2	Hydraulics	104
8.3	Pressure in a fluid at rest	106
8.4	Measurement of pressure	107
8.5	Flotation	110
	Summary	112
	Revision questions	112

PART 3

Mechanics

9.	Forces in Equilibrium	115
9.1	Force as a vector	115
9.2	Turning effects	119
9.3	Stability	121
9.4	Friction	123
9.5	Equilibrium conditions	125
	Summary	128
	Revision questions	128
10.	Dynamics	130
10.1	Speed and distance	130
10.2	Speed and velocity	132
10.3	Acceleration	133
10.4	The equations for uniform acceleration	136
10.5	Acceleration due to gravity	138
10.6	Rates of change	141
	Summary	143
	Revision questions	143
11.	Force and Motion	144
11.1	Newton's laws of motion	144
11.2	Force and momentum	148
11.3	Conservation of momentum	150
	Summary	154
	Revision questions	155
12.	Energy and Power	156
12.1	Work and energy	156
12.2	Power and energy	159

12.3 Efficiency	161
12.4 Energy resources	163
Summary	167
Revision questions	168

PART 4

Electricity

13. Introduction to Electricity	171
13.1 Static electricity	171
13.2 Current and charge	174
13.3 Potential difference	178
13.4 Resistance	181
Summary	185
Revision questions	185
14. Electric Circuits	187
14.1 Cells and batteries	187
14.2 The potentiometer	190
14.3 The Wheatstone bridge	194
14.4 Resistivity	197
14.5 Electrical measurements	198
Summary	201
Revision questions	202
15. Capacitors	204
15.1 Storing charge	204
15.2 Capacitor combinations	207
15.3 Energy stored in a charged capacitor	210
15.4 Capacitor design factors	211
15.5 Capacitor discharge	213

Summary	216
Revision questions	217
16. Electronics	218
16.1 The systems approach	218
16.2 Electronic logic	219
16.3 Electronics at work	223
16.4 Operational amplifiers	226
16.5 Multivibrators	232
Summary	233
Revision questions	234

PART 5

Fields

17. Electric Fields	237
17.1 Electrostatic forces	237
17.2 Electric field patterns	239
17.3 Electric field strength	244
17.4 Electric potential	247
Summary	249
Revision questions	250
18. Magnetic Fields	251
18.1 Magnetic field patterns	251
18.2 Electromagnets	254
18.3 The motor effect	255
18.4 Magnetic flux density	258
18.5 Magnetic field formulae	261
18.6 Magnetic materials	264
Summary	266
Revision questions	267

19. Electromagnetic Induction	268	22. Radioactivity	327
19.1 The dynamo effect	268	22.1 Inside the atom	327
19.2 Magnetic flux	271	22.2 Radiation from radioactive substances	329
19.3 The alternating current generator	274	22.3 The range and penetrating power of alpha, beta and gamma radiation	333
19.4 The transformer	276	22.4 Radioactive decay	337
19.5 Self-inductance	280	22.5 The mathematics of radioactive decay	340
Summary	282	Summary	342
Revision questions	283	Revision questions	342
20. Alternating Current	284	23. Energy from the Nucleus	344
20.1 Measurement of alternating currents and voltages	284	23.1 The nature of force	344
20.2 Rectifier circuits	287	23.2 Binding energy	347
20.3 Alternating current and power	289	23.3 Nuclear power	352
20.4 Capacitors in a.c. circuits	291	23.4 Probing the nucleus	357
20.5 Coils in a.c. circuits	295	Summary	361
20.6 Resonant circuits	297	Revision questions	362
Summary	299		
Revision questions	300		

PART 6

Atomic and Nuclear Physics

21. Electrons and Photons	303
21.1 Electron beams	303
21.2 The charge of the electron	308
21.3 Photoelectricity	311
21.4 Electrons in the atom	315
21.5 X-rays	318
21.6 Wave mechanics	321
Summary	325
Revision questions	326

PART 7

Further Physics

24. Gases	365
24.1 The gas laws	365
24.2 The ideal gas equation	370
24.3 The kinetic theory of gases	371
Summary	375
Revision questions	376
25. Thermodynamics	377
25.1 Temperature	377
25.2 Heat and work	380

25.3 The thermodynamics of ideal gases	382	28.4 Resonance	421
25.4 The Second Law of Thermodynamics	387	Summary	423
Summary	390	Revision questions	424
Revision questions	391	29. Fluid Flow	425
26. Uniform Circular Motion	392	29.1 Flow patterns	425
26.1 Circular measures	392	29.2 Flow rates	428
26.2 Centripetal acceleration	394	29.3 Viscous flow	431
26.3 Reactions and rides	396	29.4 Non-viscous flow	436
Summary	399	Summary	439
Revision questions	400	Revision questions	440
27. Gravitation	401	<i>Further Questions</i>	441
27.1 Newton's theory of gravity	401	<i>Using Spreadsheets</i>	452
27.2 Gravitational field strength	404	<i>List of Experiments in the Book</i>	454
27.3 Gravitational potential energy	406	<i>Location Guide to Mathematical Skills</i>	456
27.4 Satellite motion	409	<i>Summary of Equations</i>	457
Summary	411	<i>Useful Data</i>	461
Revision questions	412	<i>Answers to In-text Questions and Revision Questions</i>	462
28. Simple Harmonic Motion	413	<i>Answers to Further Questions</i>	494
28.1 Oscillating motion	413	<i>Glossary</i>	495
28.2 Sine waves	415	<i>Index</i>	501
28.3 Forces in oscillating systems	417
