Preface to the third edition	ix	<i>Fracture gaps</i>	85
Preface to fourth edition	x	<i>Hold: implant choice</i>	86
Dedications and acknowledgements	xi	<i>Move: activity restriction and weight-bearing</i>	101
Contributors	xii		
Part 1: General Principles	1	6 Musculoskeletal infection and joint aspiration	103
1 Fractures and fracture management	2	Acute arthritis	103
Orthopaedic terminology	2	Cellulitis	105
Assessment of a fracture	12	Necrotizing fasciitis	105
Principles of fracture management	15	Abscesses	106
Bone structure and healing	16	Muscle infection	107
How to present a radiograph	18	Bone infection (osteomyelitis)	107
		Joint aspiration and injection	109
2 Management of the injured patient	21	7 Complications	115
Major trauma	21	Non-union	115
Intravascular fluid replacement in major trauma	25	Postoperative infection	117
Decision-making in trauma	26	Malunion	118
Anaesthesia and analgesia	30	Bone defects	118
Trauma in the elderly	35	Heterotopic ossification	119
		Complex regional pain syndrome	121
3 Limb-threatening injuries	40	Pathological fractures	122
Closed soft tissue injuries	40		
Open fractures	41	Part 2 Specific Injuries by Region	127
Compartment syndrome	45	8 Shoulder girdle	128
Crush injuries	49	General principles	128
Nerve injury	50	Clavicle	134
Vascular injury	58	Acromioclavicular joint	139
The mangled limb	60	Sternoclavicular joint	143
Signpost injuries	61	Scapula	144
		Scapulothoracic dissociation	145
4 Closed management of fractures	62	Anterior shoulder (glenohumeral) dislocation	146
Reduce: closed reduction	62	Posterior shoulder dislocation	152
Hold: principles of cast management	64	Inferior shoulder dislocation (luxatio erecta)	155
Backslabs	65	Rotator cuff tears	156
Full casts	73	Calcific tendonitis	157
Limb elevation	76	Frozen shoulder (adhesive capsulitis)	158
Cast aftercare	78		
Orthoses	81	9 Humerus	159
		General principles	159
5 Operative management of fractures	83	Proximal humeral fractures	164
Reduce: closed or open fracture reduction	83		
Hold: construct stability	83		

Contents

Humeral shaft fractures	174	Distal phalanx: rigger jersey finger	282
Long head of biceps rupture (proximal injury at the shoulder)	181	Distal phalanx: closed tuft fractures	283
Biceps tendon avulsion (distal injury at the elbow)	182	Dislocations	283
10 Elbow	183	Carpometacarpal joint dislocations	283
General principles	183	Thumb metacarpophalangeal joint instability: ulnar collateral ligament rupture or 'gamekeeper's thumb'	283
Distal humeral fractures	186	Metacarpophalangeal joint dislocations	284
Radial head and neck fractures	196	Proximal interphalangeal joint dislocations	285
Olecranon fractures	201	Distal interphalangeal joint dislocations	286
Elbow dislocation	206	Soft tissue injuries of the hand	287
11 Forearm	215	Extensor tendon injury	287
General principles	215	Flexor tendon injury	287
Radial shaft fractures	218	Fingertip injuries	288
Ulnar shaft fractures	221	Trigger finger	290
Both-bones fracture of the forearm	228	Hand infections	290
Compartment syndrome of the forearm	228	Fingertip infections	290
12 Wrist and carpus	230	Flexor sheath infection	291
General principles	230	Septic arthritis	292
Distal radial fractures	237	14 Spine	293
Distal ulnar fractures	251	General principles	293
Scaphoid fractures	251	Principles of management of major spinal trauma	297
Other carpal fractures	256	Major spinal injuries	307
Carpal instability	257	Atlanto-occipital injuries	307
Carpal tunnel syndrome	262	Atlanto-axial fractures and instability	308
Differential diagnoses for acute wrist pain	264	Subaxial cervical fractures C3-C7	310
13 Hand	266	Fractures of the thoracic and lumbar (thoracolumbar) spine	312
General principles	266	Sacral fractures	319
Immobilization of hand injuries	271	Spinal cord injuries	319
Metacarpal fractures	274	Minor spinal injuries	320
Metacarpal head fractures	274	Spinous process fractures	320
Metacarpal neck fractures	275	Coccyx fractures	321
Metacarpal shaft fractures	275	Other spinal pathology	321
Finger metacarpal base Fractures	278	The ambulant patient with back pain	321
Thumb metacarpal base Fractures	278	The ambulant patient with neck pain	324
Phalangeal fractures	280	Lumbar radiculopathy	324
Proximal and intermediate phalanges: extra-articular fractures	280	Cauda equina syndrome	326
Proximal and intermediate phalanges: intra-articular fractures	281	Spinal infection	327
Distal phalanx: mallet finger injury	282	Spondylolisthesis	327

15	Pelvis	329	<i>Midfoot fractures</i>	548
	<i>General principles</i>	329	<i>Tarsometatarsal (lisfranc) injuries</i>	550
	<i>Pelvic ring injuries</i>	333	<i>Metatarsal fractures</i>	554
16	Acetabulum	344	<i>Metatarsophalangeal joint and toe injuries</i>	556
	<i>General principles</i>	344	<i>Compartment syndrome of the foot</i>	557
	<i>Acetabular fractures</i>	345	<i>Foot sprains</i>	559
17	Hip	353	23 Principles of paediatric trauma	561
	<i>General principles</i>	353	<i>Trauma in the skeletally immature</i>	561
	<i>Hip fractures</i>	355	<i>The unique properties of children's bones</i>	561
	<i>Hip dislocation</i>	378	<i>Physeal injuries</i>	561
	<i>Femoral head (Pipkin) fractures</i>	381	<i>Types of paediatric fracture</i>	566
	<i>Periprosthetic fractures around the hip</i>	382	<i>Interpreting paediatric radiographs</i>	569
	<i>Atypical hip fractures</i>	386	<i>Neurovascular complications</i>	569
18	Femur	388	<i>Non-accidental injury</i>	570
	<i>General principles</i>	388	<i>The limping child</i>	571
	<i>Femoral shaft fractures</i>	391	24 Upper limb paediatric trauma	574
	<i>Distal femoral (supracondylar) fractures</i>	413	Shoulder girdle	574
19	Knee	421	<i>Clavicle</i>	574
	<i>General principles</i>	421	<i>Scapula</i>	574
	<i>Knee dislocation</i>	430	<i>Proximal humeral fractures</i>	574
	<i>Isolated knee ligament injuries</i>	433	<i>Glenohumeral dislocation</i>	575
	<i>Tibial spine fractures</i>	435	<i>Humeral cysts</i>	576
	<i>Meniscal injuries</i>	435	<i>Humeral shaft fractures</i>	576
	<i>Quadriceps and patellar tendon ruptures</i>	437	Elbow	576
	<i>Patellar fractures</i>	440	<i>Supracondylar fractures of the humerus</i>	577
	<i>Patellar dislocation</i>	444	<i>Lateral condylar fractures</i>	582
	<i>Non-specific soft tissue knee injury</i>	446	<i>Medial condylar fractures</i>	585
20	Tibia	447	<i>Medial epicondylar fractures</i>	585
	<i>General principles</i>	447	<i>Elbow dislocation</i>	586
	<i>Tibial plateau fractures</i>	448	<i>Olecranon fractures</i>	586
	<i>Tibial shaft fractures</i>	458	<i>Radial head and neck fractures</i>	586
21	Ankle	475	Forearm	587
	<i>General principles</i>	475	<i>Monteggia fracture dislocation</i>	587
	<i>Ankle fractures</i>	482	<i>Galeazzi fracture dislocation</i>	587
	<i>Pilon fractures</i>	513	<i>Diaphyseal fractures of radius and ulna</i>	588
	<i>Ankle sprains</i>	522	Wrist	592
	<i>Achilles tendon rupture</i>	522	<i>Fractures of the distal radius and ulna</i>	592
	<i>Peroneal tendon dislocation</i>	524	Hand and carpus	594
22	Foot	526	<i>Carpus</i>	594
	<i>General principles</i>	526	<i>Scaphoid</i>	594
	<i>Talar fractures</i>	530	<i>Metacarpals and fingers</i>	594
	<i>Subtalar dislocation</i>	538	25 Lower limb paediatric trauma	596
	<i>Talar dislocation</i>	539	Pelvis and acetabulum	596
	<i>Calcaneal fractures</i>	539	<i>Pelvic fractures</i>	596

Acetabular fractures	596	Distal tibial metaphyseal fractures	613
Hip	596	Ankle	614
Hip fractures	596	Ankle fractures	614
Hip dislocation	599	Foot	617
Slipped capital femoral epiphysis	599		
Femur	602	Part 3: Training in Orthopaedic Trauma Surgery	619
Femoral shaft fractures	602		
Knee	607	26 Getting the most from your orthopaedic training	620
Fractures of the distal femur	607	The unstated training contract	620
Patellar dislocation	608	Getting the best from your theatre time	621
Tibial spine fracture and anterior cruciate ligament disruption	610	Tulips	621
Patellar fracture	610	Getting the best from clinic time	623
Proximal tibial fractures	610		
Tibial tuberosity fractures	611	Index	624
Tibial diaphyseal fractures	612		
Toddler's fracture	613
