<i>List of Figures</i>	page vii
<i>Preface</i>	xi
1 Fundamentals of Thirst and Body Fluid Regulation	1
1.1 Pioneers	1
1.2 Thirst and Water Intake: Measurement	5
1.3 Initiation, Maintenance, and Termination of Drinking	9
1.4 The Lamina Terminalis	11
1.5 Summary	16
2 Body Fluid Compartments, Inputs, and Outputs	17
2.1 Fluid Compartments	17
2.2 Fluid Loss	24
2.3 Measurement of Fluid Compartments and Their Composition	28
2.4 Summary	30
3 Intracellular Dehydration Thirst and Drinking	31
3.1 General Considerations	31
3.2 Intracellular Dehydration Drinking or Thirst in Humans	33
3.3 Intracellular Dehydration Drinking in Large Mammals	38
3.4 Intracellular Dehydration Drinking in Small Mammals	41
3.5 Peripheral Osmoreception	46
3.6 Summary	48
4 Intracellular Dehydration: Mechanism	50
4.1 Introduction	50
4.2 Osmoreceptors: Structure and Function	50
4.3 Osmoreceptors and Drinking: The Lamina Terminalis	55
4.4 Lamina Terminalis and Osmoregulatory Drinking in Large Mammals	56
4.5 Lamina Terminalis and Osmoregulatory Drinking in Small Mammals: Evidence from Lesion Studies	59
4.6 Neural Pathways of Systemic Osmoregulatory Drinking	63
4.7 Neural Pathways of Peripheral Osmoreceptive Drinking	70
4.8 Summary	72

5	Extracellular Dehydration Thirst and Drinking	73
5.1	Angiotensin II as a Dipsogen	73
5.2	Hemorrhage	80
5.3	Isovolemic Hypotension: Caval Ligation	83
5.4	Isovolemic Hypotension: Vasodilator Drugs	84
5.5	Nonhypotensive Hypovolemia	88
5.6	Sodium Depletion and Sodium Appetite	95
5.7	Summary	96
6	Pregnancy and the Ontogeny of Thirst	97
6.1	Introduction	97
6.2	Pregnancy	98
6.3	Ontogeny of Drinking	104
6.4	Ontogeny and Phenotypic Plasticity of Neural Structures	114
6.5	Summary	116
7	Food-Associated Drinking and Nycthemeral Rhythms	117
7.1	Introduction	117
7.2	Meal-Associated Drinking: Descriptive Analysis	117
7.3	Meal-Associated Drinking: Mechanism	126
7.4	Nycthemeral Rhythms	130
7.5	Summary	138
8	Hybrid Dehydrations: Water Deprivation	139
8.1	Introduction	139
8.2	Solute Handling during Water Deprivation	140
8.3	Systemic Effects of Water Deprivation and Drinking	144
8.4	Physiological and Neural Mechanisms of Deprivation-Induced Drinking	153
8.5	Hybrid Thirst: Perspective	161
8.6	Summary	162
9	Hybrid Dehydrations: Thermal Stress and Exercise	164
9.1	Thermoregulation	164
9.2	Thermal Dehydration in Humans	165
9.3	Thermal Dehydration in Animals	173
9.4	Implications for Endurance Performance	184
9.5	Summary	186
10	Thirst in Aging and Clinical Populations	187
10.1	Aging	187
10.2	Polydipsia	202
10.3	Hypodipsia	205
10.4	Summary	206
11	Comparative Aspects of Body Fluid Regulation	208
11.1	Aquatic Species	208
11.2	Amphibians and Reptiles	211
11.3	Birds	213
11.4	Mammals	216
11.5	Summary	217

Appendix: Methods in Physiology and Neuroscience	218
A.1 Physiological Measurements	218
A.2 Measurement and Manipulation of Neural Activity	220
References	227
Index	271
