

# Contents

1.	Preface .....	5
2.	Introduction .....	6
3.	Uncrewed Vehicles in CBRN Defence .....	7
3.1	Analysis of NATO Capstone Capabilities Influenced by Uncrewed Vehicles .....	7
3.1.1	CBRN Reconnaissance .....	7
3.1.2	Aerial Radiological Survey .....	7
3.1.3	Biological Monitoring and Detection .....	8
3.1.4	Decontamination .....	8
3.2	Analysis of the Current Use of Uncrewed Vehicles for CBRN Defence Tasks .....	9
4.	Research and Development of Uncrewed Vehicles in CBRN Defence .....	13
4.1	Cognitive Task Analysis of Using Uncrewed Vehicles .....	13
4.2	Practical Examples of the Development of Uncrewed Vehicles for CBRN Defence Tasks .....	16
5.	Uncrewed Vehicles within Enabling Components of CBRN Defence .....	19
5.1	Detection, Identification and Monitoring .....	19
5.2	CBRN Knowledge Management .....	20
5.3	CBRN Physical Protection .....	21
5.4	Hazard Management .....	22
5.5	Medical Countermeasures and Casualty Care .....	22
6.	Limitations of Uncrewed Vehicles in CBRN Defence .....	23
6.1	Uncrewed Vehicles Constraints .....	23
6.2	Limitations of the Data Transmission of CBRN Sensors or Detectors Carried By Uncrewed Vehicles .....	23
6.3	Environmental Effects on Operating Uncrewed Vehicles .....	24
7.	Evolution of Uncrewed Vehicles in CBRN Defence .....	25
7.1	The Effects of Emerging and Disruptive Technologies on Autonomous Systems .....	25
7.1.1	Disruptive Technologies Likely to Affect Autonomous CBRN Systems .....	25
7.1.2	Emerging Technologies Likely to Affect Robotic and Autonomous CBRN Systems .....	27
7.2	The Employment of Robotic and Autonomous Systems to Support CBRN Defence .....	27
7.3	Defensive and Offensive Employment Considerations .....	29
8.	Assessment & Conclusion .....	30
	Annex: Industry Data Sheets .....	32
	Authors .....	35
	Bibliography .....	37
