

LIST OF POSTER PRESENTATIONS

Topic 1 – Advanced Nanostructured Materials and Innovative Technologies

P1

K. Čech Barabaszová: *Innovative technology for PVDF nanocomposite materials preparation*33

P2_S

B. Cetinkaya: *Influence of Process Parameters on Graphene-Reinforced Galvanized Coatings for Pearlitic Steel Wire*.....34

P3_S

M. Davidová: *Synthesis of Graphite and Multi-layer Graphene from a Low Molecular Weight Carbon Precursor*.....35

P4

J. Kupková: *Cordierite ceramic foams decorated with Ag nanoparticles*.....36

P5_S

L. Mačák: *Preparation of polymer nanocomposites with silver nanoparticles*.....37

P6

S. Nakatsuka: *Design strategy of Amine Functionalized Graphene for Catalytic Applications*.38

P7

L. Schiavo: *Effect of the surface etching on the cenospheres coating by silver nanoparticles*.39

Topic 2 – Materials and Technology for Environment

P8

J. H. Advani: *Engineering Iron Dimers at the Atomic Scale for Tunable Biomass Oxidation in Water*49

P9

T. Ghosh: *Cobalt containing Cerium Oxide as a Multifunctional Nanocatalyst for various Selective organic transformations*50

P10_S

M. Gregor: *Ruthenium based electrodes for electrooxidation of organic pollutants from industrial wastewater*.....51

P11

S. Holešová: *Biodegradable polycaprolactone/clay nanocomposites for biotechnological applications*52

P12_S

A. Chojnowska: Noble metal nanoparticles supported on multicomponent metal alloys as catalysts for organic reactions	53
---	----

P13

J. Kalina: Phytoremediation potential of plant stems: adsorption of azo dyes	54
---	----

P14

M. Krzan: Medical applications of saponin-based emulsions: from drug delivery to immunotherapy	55
---	----

P15

M. Krzan: Natural organo-gels as a platform for anaesthetic drugs: from synthesis to application	56
---	----

P16

K. Malachová: Genotoxicity detection of nanoparticles and nanocomposite ZnO by the Comet assay	57
---	----

P17

A. Manayil Parambil: Harnessing Carbon Dots for a Sustainable Environment	58
--	----

P18_S

G. Mikesková: Plant phytotoxic responses of nanoparticles	59
--	----

P19

G.S. More: Synergistic Pd-Ni Alloy on H-NbOx: Boosting Hydrogenation of Lignin Derivatives to Cyclic Hydrocarbons and Alcohols	60
---	----

P20_S

A. Paříková: Hygroscopic growth of submicrometer aerosols for targeted pulmonary deposition	61
--	----

P21

P. Ryšánek: Electrospun PA6 Nanofibers Bearing the CeO ₂ Dephosphorylation Catalyst	62
---	----

P22_S

M. Syrový: One-step preparation of nanofibrous material based on polyacrylonitrile and cellulose acetate for CO ₂ capture	63
---	----

P23_S

J. Zágora: Highly Efficient Antimicrobial Coating Based on Polylactide Prepared via Supercritical Fluid Technology	64
---	----

Topic 3 – Materials for Energy Harvesting and Storage

P24_S

B. Cetinkaya: Electrochemical Investigation of Hard Carbon Anode and Na(Ni _{1/3} Fe _{1/3} Mn _{1/3})O ₂ Cathode using Different Electrolyte with FEC Additives for Na-Ion Batteries	74
--	----

P25_S

V. Kubáň: *Porous carbon in energy storage*75

P26

B. Mishra: *Single atom ruthenium decorated on MOF-derived porous carbon for overall water splitting*.....76

P27

S. Paul: *Cu(I)/Cu(II) Single Atoms Over N-Doped Graphene Acid for Electrocatalytic Nitrate Reduction to Ammonia*77

P28_S

S.K. Sathish: *Clay minerals and porous carbon for battery applications*78

P29_S

M. Šindler: *Heat treated phosphate ceramics in battery applications*.....79

P30_S

S. Tekin: *Modified polyolefine separators for safe Li-batteries*80

P31

J. Výtisk: *Li-Ion battery separators and the importance of their life cycle assessment for smarter design and recycling strategies*.....81

Topic 4 –Instrumentation-Driven Design and Characterization of Materials

P32_S

J. Molek: *Computational determination of preferred out-of-plane orientation of heteroepitaxial films*96

P33

M. Oćwieja: *The Electrokinetic and spectroscopic characteristic of novel conjugates of neuroleptics with gold nanoparticles*97

P34_S

Z. Pěgřimočová: *Determination of major mineral content in sedimentary rocks by Raman spectroscopy*.....98

P35_S

J. Walter: *Influence of process parameters on the structure and properties of chromium oxide films deposited by reactive high power impulse magnetron sputtering*.....99
