Nomenclature	ix
1 Introduction	1
1.1 Water and aqueous mixtures	2
1.2 Water at low temperatures	3
1.3 Surface tension of liquid water	7
1.4 IAPWS activities on surface tension	11
1.4.1 Surface tension of ordinary water	11
1.4.2 Surface tension of seawater	14
2 Development of experimental techniques	15
2.1 Modified capillary rise method	16
2.2 Capillary rise with counterpressure	21
2.3 Capillary rise with container elevation	23
2.4 Experiments with horizontal capillary tube	24
2.5 Additional measurements of surface tension and liquid density . . .	27
3 Results	31
3.1 Experiments with supercooled water	31
3.2 Investigation of aqueous mixtures	35
3.2.1 Density of aqueous mixtures	36
3.2.2 Surface tension of aqueous mixtures	38
3.3 Uncertainty of surface tension	43
3.4 Molecular simulations of water surface tension	44
4 Concluding remarks	45
Publications	47
1 Supercooled water – Capillary rise method	47
2 Supercooled water – Capillary rise with counterpressure	60
3 Supercooled water – Horizontal technique	79
4 Supercooled water – Final results	127
5 Investigation of aqueous mixtures	150
5.1 Density of aqueous mixtures	150
5.2 Surface tension of aqueous mixtures	178
6 Molecular simulations of water surface tension	233

Appendix – Report on Uncertainties	245
Appendix – IAPWS Release R1-76(2014)	263
Appendix – IAPWS Guideline G14-19	271
Appendix – IAPWS Helmholtz Award 2019	277

ix	Nomenclature
1	1 Introduction
2	1.1 Water and aqueous mixtures
3	1.2 Water at low temperatures
7	1.3 Surface tension of liquid water
11	1.4 IAPWS activities on surface tension
11	1.4.1 Surface tension of ordinary water
14	1.4.2 Surface tension of seawater
15	2 Development of experimental techniques
16	2.1 Modified capillary rise method
21	2.2 Capillary rise with counterpressure
23	2.3 Capillary rise with container elevation
24	2.4 Experiments with horizontal capillary tube
27	2.5 Additional measurements of surface tension and liquid density
31	3 Results
31	3.1 Experiments with supercooled water
35	3.2 Investigation of aqueous mixtures
36	3.2.1 Density of aqueous mixtures
38	3.2.2 Surface tension of aqueous mixtures
43	3.3 Uncertainty of surface tension
44	3.4 Molecular simulations of water surface tension
45	4 Concluding remarks
47	Publications
47	1 Supercooled water – Capillary rise method
60	2 Supercooled water – Capillary rise with counterpressure
79	3 Supercooled water – Horizontal technique
127	4 Supercooled water – Final results
150	5 Investigation of aqueous mixtures
150	5.1 Density of aqueous mixtures
178	5.2 Surface tension of aqueous mixtures
233	6 Molecular simulations of water surface tension
