| <i>Preface</i> .....      | v  |
| <i>Contributors</i> ..... | ix |

## PART I CONCEPTS AND PROGRESSIONS

|   |     |
|---|-----|
| 1 The New Era of Cancer Cytogenetics and Cytogenomics .....   | 3   |
| <i>Jing Christine Ye and Henry H. Heng</i>  |     |
| 2 Methods of Detection and Mechanisms of Origin of Complex<br>Structural Genome Variations .....  | 39  |
| <i>Martin Poot</i>  |     |
| 3 A Paradoxical Role for Somatic Chromosomal Mosaicism and Chromosome<br>Instability in Cancer: Theoretical and Technological Aspects ..... | 67  |
| <i>Ivan Y. Iourov, Svetlana G. Vorsanova, and Yuri B. Yurov</i>   |     |
| 4 The Importance of Monitoring Non-clonal Chromosome<br>Aberrations (NCCAs) in Cancer Research .....  | 79  |
| <i>Eric Heng, Sanjana Thanedar, and Henry H. Heng</i>   |     |
| 5 Optical Genome Mapping: A Machine-Based Platform in Cytogenomics .....  | 113 |
| <i>Jing Christine Ye and Guilin Tang</i>  |     |

## PART II PROTOCOLS

|  |     |
|--|-----|
| 6 Cell Culture and Slide Preparation for Cytogenetic Studies<br>of Hematological Neoplasms .....                             | 127 |
| <i>Jingwei Yu</i>  |     |
| 7 Chromosome Bandings and Recognition .....  | 137 |
| <i>Thomas S. K. Wan and Edmond S. K. Ma</i>  |     |
| 8 Cancer Sample Analysis Utilizing Single-Nucleotide Polymorphism<br>Array and Array Comparative Genomic Hybridization ..... | 151 |
| <i>Benjamin Kang, Hong Xiao, Todd Ackley, and Lina Shao</i>  |     |
| 9 Multitarget Fluorescence In Situ Hybridization Diagnostic Applications<br>in Tumors .....                                  | 173 |
| <i>Martina Amato, Jeremy A. Squire, Renato Franco, and Federica Zito<br/>Marino</i>  |     |
| 10 High-Resolution FISH Analysis Using DNA Fibers Generated<br>by Molecular Combing .....                                    | 185 |
| <i>Sandra Louzada and Fengtang Yang</i>  |     |
| 11 FISH-Banding for Characterization of Simple and Complex<br>Chromosomal Rearrangements in Cancer .....                     | 205 |
| <i>Thomas Liehr</i>  |     |

|    |  |     |
|----|--|-----|
| 12 | Profiling Chromosome Topological Features by Super-Resolution<br>3D Structured Illumination Microscopy .....   | 213 |
|    | <i>Eunice Fabian-Morales, Alfredo Rodríguez, Adriana Gudiño,<br/>Luis A. Herrera, and Sara Frias</i>   |     |
| 13 | Quantitative FISHing: Implications for Chromosomal Analysis .....  | 239 |
|    | <i>Svetlana G. Vorsanova, Yuri B. Yurov, and Ivan Y. Iourov</i>  |     |
| 14 | Characterizing Chemotherapy/Radiotherapy-Induced Genome<br>Chaos in Hodgkin's Lymphoma Patients Using M-FISH .....                                     | 247 |
|    | <i>Sandra Ramos and Sara Frias</i>   |     |
| 15 | Tracking Karyotype Changes in Treatment-Induced<br>Drug-Resistant Evolution .....  | 263 |
|    | <i>Jing Christine Ye and Henry H. Heng</i>   |     |
| 16 | Generation of Polyploid Giant Cancer Cells (PGCCs) from Hey<br>Ovarian Cancer Cells and Analysis of Embryonic Properties .....                         | 281 |
|    | <i>Na Niu and Jinsong Liu</i>  |     |
| 17 | Single-Cell MTT: A Simple and Sensitive Assay for Determining<br>the Viability and Metabolic Activity of Polyploid Giant Cancer<br>Cells (PGCCs) ..... | 293 |
|    | <i>Razmik Mirzayans, Bonnie Andrais, and David Murray</i>  |     |
| 18 | Evaluating Chromosome Instability and Genotoxicity Through<br>Single Cell Quantitative Imaging Microscopy .....  | 309 |
|    | <i>Rubi Campos Gudiño, Kailee A. Rutherford, and Kirk J. McManus</i>   |     |
| 19 | Studying the Dynamics of Tunneling Tubes and Cellular Spheres .....  | 333 |
|    | <i>Sanjana Thanedar, Eric Heng, Donghong Ju, Kezhong Zhang,<br/>and Henry H. Heng</i>  |     |
| 20 | Profiling Numerical and Structural Chromosomal Instability<br>in Different Cancer Types .....  | 345 |
|    | <i>Xiaoxiao Zhang and Maik Kschischo</i>   |     |
| 21 | The Digital World of Cytogenetic and Cytogenomic Web Resources .....   | 361 |
|    | <i>Andrzej Kasperski and Henry H. Heng</i>   |     |
|    | <i>Index</i> .....   | 393 |
