

The Impact of Vine Pruning Methods on Physiological Development and Health Condition of <i>Vitis Vinifera</i>	9
Optimization of the Nutritional and Phytochemical Composition of Microgreens Through Biofortification	10
Yeasts as a Biotechnological Tool for Wine Acidity Management	11
Effect of Microclimatic Conditions of the Habitat on <i>Vitis Vinifera</i>	12
Influence of Arbuscular Mycorrhizal Fungi on Grapevine Vitality	13
Study of Grapevine Cultivar Resistance to the Pathogen <i>Cadophora Luteo-Olivacea</i>	14
The Influence of Technological Operations on Selected Parameters of Fruit Wine Quality	15
Horticultural Crops as a Tool for Sustainable Development in Developing Countries.....	16
Influence of the Modified Soil Environment on Establishment and Vitality of Trees After Planting	17
Condensation of Fermentation Gases.....	18
Development and Testing of Selective Sorbents for Sulfur Compounds in the Flow of Fermentation Gas Mixture	19
Study of the Microbiome and Polyphenolic Profil of Grape Must and Wine	20
Peri-Urban Landscape in the Planning System	21
Identification, Interpretation and Possibilities of Regeneration of Designed Landscape Vranov, Bítov, Chlumec Nad Cidlinou.....	22
Influence of <i>Brettanomyces</i> Yeast Metabolites Content on the Sensory Perception of Wine	23
Possibilities of Influencing the Production of Biogenic Amines in Red Wines	24
Optimization of Ecological Cultivation of Forced Chicory (<i>Cichorium Intybus</i> Var. <i>Folium</i>).....	25
The Role of Landscape Architecture in Planning and Designing Pedestrian Connections in Cities – Safety and Public Health.....	26
Study of the Influence of Selected Rootstocks on Infection by ,Candidatus Phytoplasma Prunorum‘ in the Tissues of Apricot Trees	27
Parametric Modelling in Landscape Planning: a Data-Driven Approach to the Optimization of Adaptation Measures in the Landscape.....	28
Evaluation of Aquaculture-Derived Organic Fertilizers for Indoor Basil Production	29
Study and Critical Evaluation of Archival Sources on the Historical Development of the Lednice Chateau Park.....	30
Nanoparticles Enhance in Vitro Micropropagation of Olive (<i>Olea Europaea</i> L.): Preliminary Observations on Cultivars ,Galega Vulgar‘ and ,Frantoio‘	31

The Study of Pomological Traits and Genetic Variability of the Service Tree (<i>Sorbus Domestica</i>).....	32
Indoor Plants and Their Use in Vertical Gardens.....	33
Management of Nutrition During Secondary Fermentation	34
Sustainability of the Herbaceous Layer in Public Spaces.....	35
