## Section I AI-Enhanced Adaptive, Personalized Learning

1. Artificial Intelligence in STEM Education: Current Developments and Future Considerations.....	3
<i>Fan Ouyang, Pengcheng Jiao, Amir H. Alavi, and Bruce M. McLaren</i>	
2. Towards a Deeper Understanding of K-12 Students' CT and Engineering Design Processes.....	15
<i>Gautam Biswas and Nicole M. Hutchins</i>	
3. Intelligent Science Stations Bring AI Tutoring into the Physical World.....	39
<i>Nesra Yannier, Scott E. Hudson, and Kenneth R. Koedinger</i>	
4. Adaptive Support for Representational Competencies during Technology-Based Problem-Solving in STEM.....	51
<i>Martina A. Rau</i>	
5. Teaching STEM Subjects in Non-STEM Degrees: An Adaptive Learning Model for Teaching Statistics.....	61
<i>Daniela Pacella, Rosa Fabbriatore, Alfonso Iodice D'Enza, Carla Galluccio, and Francesco Palumbo</i>	
6. Removing Barriers in Self-Paced Online Learning through Designing Intelligent Learning Dashboards.....	77
<i>Arta Faramand, Hongxin Yan, M. Ali Akber Dewan, and Fuhua Lin</i>	

## Section II AI-Enhanced Adaptive Learning Resources

7. PASTEL: Evidence-based Learning Engineering Methods to Facilitate Creation of Adaptive Online Courseware.....	93
<i>Noboru Matsuda, Machi Shimmei, Prithviraj Chaudhuri, Dheeraj Makam, Raj Shrivastava, Jesse Wood, and Peeyush Taneja</i>	
8. A Technology-Enhanced Approach for Locating Timely and Relevant News Articles for Context-Based Science Education.....	109
<i>Jinnie Shin and Mark J. Gierl</i>	
9. Adaptive Learning Profiles in the Education Domain.....	127
<i>Claudio Giovanni Demartini, Andrea Bosso, Giacomo Ciccarelli, Lorenzo Benussi, and Flavio Renga</i>	

## Section III AI-Supported Instructor Systems and Assessments for AI and STEM Education

10. Teacher Orchestration Systems Supported by AI: Theoretical Possibilities and Practical Considerations.....	151
<i>Suraj Uttamchandani, Haesol Bae, Chen Feng, Krista Glazewski, Cindy E. Hmelo-Silver, Thomas Brush, Bradford Mott, and James Lester</i>	

<b>11. The Role of AI to Support Teacher Learning and Practice: A Review and Future Directions.....</b>	<b>163</b>
<i>Jennifer L. Chiu, James P. Bywater, and Sarah Lilly</i>	
<b>12. Learning Outcome Modeling in Computer-Based Assessments for Learning .....</b>	<b>175</b>
<i>Fu Chen and Chang Lu</i>	
<b>13. Designing Automated Writing Evaluation Systems for Ambitious Instruction and Classroom Integration .....</b>	<b>195</b>
<i>Lindsay Clare Matsumura, Elaine L. Wang, Richard Correnti, and Diane Litman</i>	
 <b>Section IV Learning Analytics and Educational Data Mining in AI and STEM Education</b>	
<b>14. Promoting STEM Education through the Use of Learning Analytics: A Paradigm Shift .....</b>	<b>211</b>
<i>Shan Li and Susanne P. Lajoie</i>	
<b>15. Using Learning Analytics to Understand Students' Discourse and Behaviors in STEM Education .....</b>	<b>225</b>
<i>Gaoxia Zhu, Wanli Xing, Vitaliy Popov, Yaoran Li, Charles Xie, and Paul Horwitz</i>	
<b>16. Understanding the Role of AI and Learning Analytics Techniques in Addressing Task Difficulties in STEM Education .....</b>	<b>241</b>
<i>Sadia Nawaz, Emad A. Alghamdi, Namrata Srivastava, Jason Lodge, and Linda Corrin</i>	
<b>17. Learning Analytics in a Web3D Based Inquiry Learning Environment.....</b>	<b>259</b>
<i>Guangtao Xu, Yingqian Li, Zhouyang Zhu, Yihui Hu, and Wenting Zhou</i>	
<b>18. On Machine Learning Methods for Propensity Score Matching and Weighting in Educational Data Mining Applications .....</b>	<b>277</b>
<i>Juanjuan Fan, Joshua Beemer, Xi Yan, and Richard A. Levine</i>	
<b>19. Situating AI (and Big Data) in the Learning Sciences: Moving toward Large-Scale Learning Sciences.....</b>	<b>289</b>
<i>Danielle S. McNamara, Tracy Arner, Reese Butterfuss, Debshila Basu Mallick, Andrew S. Lan, Rod D. Roscoe, Henry L. Roediger III, and Richard G. Baraniuk</i>	
<b>20. Linking Natural Language Use and Science Performance .....</b>	<b>309</b>
<i>Scott Crossley, Danielle S. McNamara, Jennifer Dalsen, Craig G. Anderson, and Constance Steinkuehler</i>	
 <b>Section V Other Topics in AI and STEM Education</b>	
<b>21. Quick Red Fox: An App Supporting a New Paradigm in Qualitative Research on AIED for STEM .....</b>	<b>319</b>
<i>Stephen Hutt, Ryan S. Baker, Jaclyn Ocumpaugh, Anabil Munshi, J.M.A.L. Andres, Shamyia Karumbaiah, Stefan Slater, Gautam Biswas, Luc Paquette, Nigel Bosch, and Martin van Velsen</i>	
<b>22. A Systematic Review of AI Applications in Computer-Supported Collaborative Learning in STEM Education .....</b>	<b>333</b>
<i>Jingwan Tang, Xiaofei Zhou, Xiaoyu Wan, and Fan Ouyang</i>	
<b>23. Inclusion and Equity as a Paradigm Shift for Artificial Intelligence in Education.....</b>	<b>359</b>
<i>Rod D. Roscoe, Shima Salehi, Nia Nixon, Marcelo Worsley, Chris Piech, and Rose Luckin</i>	
<b>Index .....</b>	<b>375</b>
