

## PLENARY LECTURES

OPENING ADDRESS	1
Hendrik B.G. Casimir, De Zegge 7, NL-5591 Heeze (N.Br), (NL).	
DIFFRACTIVE OPTICS: APPLICATION TO MICRORELIEF STRUCTURES	5
Karl Knop, Laboratories RCA Ltd, Zürich, (CH).	
FOUR YEARS OF HIGH- $T_c$ SUPERCONDUCTORS	26
K. Alex Müller, IBM Research Laboratory, Rüschlikon, (CH).	
PHYSICS AND TECHNOLOGY OF MEGABIT CHIPS	29
Roel P. Kramer and Marc Rocchi, Philips, Eindhoven, (NL).	
SUPERNOVA THEORY	68
Hans A. Bethe, Cornell University, Ithaca, NY, (USA).	
ON THE CARRIERS OF FORCES	77
Janusz A. Zakrzewski, University of Warsaw, Warsaw, (PL).	
AEROGEL-LIKE STRUCTURES FROM LOW TEMPERATURE PLASMA	112
B.M. Smirnov, Institute for High Temperatures, Moscow, (SU).	
PERSPECTIVES IN NUCLEAR PHYSICS WITH ELECTRON ACCELERATORS	135
Bernard Frois, DPhN/SEPN, CEN Saclay, (F).	
QUANTUM CRYSTALS	151
A.F. Andreev, Institute for Physical Problems, Moscow, (SU).	
EXPERIMENTS ON TIME REVERSAL SYMMETRY AND PARITY	160
Norman F. Ramsey, Harvard University, Cambridge, MA, (USA).	
MAGNETIC FIELDS IN THE SUN AND STARS	177
Nigel O. Weiss, University of Cambridge, Cambridge, (GB).	

PROSPECTS FOR THE THEORY OF EVERYTHING	187
Gerard 't Hooft, University of Utrecht, Utrecht, (NL).	
CONSTRUCTION, OPERATION AND FIRST RESULTS OF LEP	203
Herwig Schopper, CERN, Geneva, (CH).	
SINGLE ATOM EXPERIMENTS AND THE TEST OF QUANTUM PHYSICS	226
Herbert Walther, University of München and MPI Garching, (D).	
LASER STUDIES OF COLD HYDROGEN ATOMS	257
T.W. Hänsch, MPI, Garching and University of Munich, Munich, (D).	
THE CONTRIBUTION OF STATISTICAL PHYSICS TO NEURAL NETWORK THEORY	259
Gérard Toulouse, Ecole Supérieure Normale, Paris, (F).	
PHYSICS OF FRACTALS	273
Luciano Pietronero, Univ. of Rome, "La Sapienza", Rome, (I).	

-----

**SYMPOSIAL LECTURES**

**S 1A NUCLEAR PHYSICS I: Nuclear spectroscopy, Euroball**

NUCLEAR STRUCTURE AT FINITE TEMPERATURE AS PROBED BY GIANT RESONANCES	295
R.A. Broglia et al. University of Milano, Milano, (I).	

DISCRETE LINE SPECTROSCOPY OF HIGH SPIN STATES	310
M.A. Riley, University of Liverpool, Liverpool, (GB).	

-----

S 1B NUCLEAR PHYSICS II: Intermediate energy, Heavy ions

ELECTRON SCATTERING FROM NUCLEI AND SUBNUCLEONIC DEGREES OF FREEDOM 322

Ingo Sick, University of Basel, Basel, (CH).

HARD PHOTONS FROM HEAVY ION COLLISIONS 338

Volker Metag, Universität Gießen, Gießen, (D).

FIRST EXPERIMENTAL RESULTS FROM SIS/ESR 355

Paul Kienle, GSImbH, Darmstadt, (D).

MULTIFRAGMENTATION OF HOT NUCLEI 383

B. Tamain, ISMRA, Caen, (F).

NUCLEAR STRUCTURE STUDIES WITH RELATIVISTIC AND RADIOACTIVE BEAMS AT SIS 410

Hans Emling et al., GSImbH, Darmstadt, (D).

-----

S 2A HIGH ENERGY PHYSICS I: First operation of LEP, First results from new SppS and Tevatron, Superconducting super-collider, Large hadron collider

PHYSICS FROM LEP 421

Jacques Haissinski, Université Paris-Sud, Orsay, (F).

HADRON COLLIDERS: PAST, PRESENT AND FUTURE 439

Luigi Di Lella, CERN, Geneva, (CH).

-----

S 2B HIGH ENERGY PHYSICS II: Accelerator technology and control

THE CERN ACCELERATOR COMPLEX 476

G. Brianti, CERN, Geneva, (CH)

ACCELERATORS FOR INDUSTRIAL APPLICATIONS 489

H.L. Hagedoorn et al. Eindhoven Univ. of Techn., Eindhoven, (NL)

-----

S 3 ORDER AND CHAOS IN PHYSICS (AND BIOLOGY)

CLASSICAL CHAOS AND QUANTUM LOCALIZATION 514

Italo Gueneri, University of Pavia, Pavia, (I).

-----

S 4 CLUSTERS OF ATOMS AND MOLECULES

PHOTOELECTRON SPECTROSCOPY AS PROBE OF METAL CLUSTER  
LEVEL STRUCTURE 523

Karl-Heinz Meiwes-Broer, Universität Bielefeld, Bielefeld, (D).

HIGH RESOLUTION ELECTRON MICROSCOPY OF SUPPORTED  
METAL CLUSTERS 540

J.-O. Bovin and J.-O. Malm, Chemical Center, Lund, (S).

COMPUTER SIMULATION OF SEMICONDUCTOR AND METAL CLUSTERS 554

Wanda Andreoni, IBM Research Laboratory, Rüschlikon (CH).

-----

S 5 ATOMIC SCALE SCANNING MICROSCOPY

RECENT PROGRESS IN SCANNING TUNNELING MICROSCOPY 567

Roland Wiesendanger, University of Basel, Basel, (CH).

INTRODUCTION TO ATOMIC FORCE MICROSCOPY 584

E. Meyer and H. Heinzelmann, Universität Basel, Basel, (CH).

SXM/SNOM: TECHNIQUES RELATED TO STM	602
D.W. Pohl, IBM Research Laboratory, Rüschlikon, (CH)	
-----	
S 6 PROGRESS IN SOLAR CELLS	
A GENERAL VIEW ON PHOTOVOLTAOC CELLS	611
W.H. Bloss and F. Pfisterer, Univ. of Stuttgart, Stuttgart, (D)	
INTERFACE EFFECTS IN SILICON SOLAR CELLS	631
R. Mertens et al., IMEC, Leuven, (B)	
AMORPHOUS SEMICONDUCTORS FOR SOLAR CELLS	644
Ionel Solomon, Ecole Polytechnique, Palaiseau, (F)	
PHYSICAL LIMITS FOR SOLAR CELL EFFICIENCY	649
Pierre Baruch, Université Paris 7, Paris, (F).	
-----	
S 7 PHYSICS OF LOW DIMENSIONAL SYSTEMS	
TIME CORRELATED SINGLE ELECTRON TUNNELING	667
Per Delsing et al., Chalmers Univ. of Technology, Göteborg, (S)	
ELECTRONIC TRANSPORT IN AN ARTIFICIAL ONE-DIMENSIONAL LATTICE	680
Leo P. Kouwenhoven et al. Delft Univ. of Technology, Delft, (NL)	
WANNIER QUANTIZATION IN SEMICONDUCTOR SUPERLATTICES	692
Paul Voisin, Ecole Normale Supérieure, Paris, (F).	
-----	
S 8 FREE-ELECTRON LASERS	
THE FEL MECHANISM AND THE STATUS OF FEL RESEARCH	709
P.W. van Amersfoort, FOM-Institute, Nieuwegein, (NL).	

STORAGE RING FEL'S FOR VISIBLE AND UV LIGHT 721  
M.E. Couprie, Université de Paris-Sud, Orsay, (F).

-----  
S 9 FIBRE OPTICS

FIBER LASERS AND AMPLIFIERS 752  
W.L. Barnes, Southampton University, Southampton, GB.

FABRICATION OF SPECIAL OPTICAL FIBRES 764  
J.E. Townsend, University of Southampton, Southampton, (GB).

-----  
S 10 TOPICS IN ATOMIC AND MOLECULAR SPECTROSCOPY

INELASTIC ION-SURFACE COLLISIONS 777  
Werner Heiland, Universität Osnabrück, Osnabrück, (D).

-----  
S 11 WAVES IN PLASMAS (LABORATORY AND UNIVERSE)

SOLAR AND STELLAR PLASMA WAVE PROBLEMS 792  
Jan Kuijpers, Utrecht University, Utrecht, (NL).

THE ROLE OF WAVES IN LABORATORY PLASMAS 813  
D.C. Robinson, AEA Fusion, Abbingdon, (GB).

MHD WAVES IN THERMONUCLEAR AND SOLAR PLASMAS 827  
Johan P. Goedbloed, FOM-Inst. voor Plasmafysica, Nieuwegein, (NL)

MAGNETOSPHERIC WAVE OBSERVATIONS AND INTERPRETATIONS 845  
Rolf Boström and Gunnar Holmgren, Swedish Institute of Space  
Physics, Uppsala Division, Uppsala, (S).

CURRENT DRIVE	860
David W. Faulconer, Ecole Royal Militaire, Brussels, (B).	
CYCLOTRON INSTABILITIES IN SPACE PLASMA	872
D. Le Quéau, CRPE/CNET - CNRS, \ (F).	
-----	
S 12 NON-CLASSICAL STATES OF ELECTROMAG. FIELDS AND APPLICATIONS	
DYNAMICS AND SYMMETRY OF A LASER WITH A SQUEEZED RESERVOIR	885
Axel Schenzle and Christian Ginzler, Universität München and MPI Garching, (D).	
NARROWING OF THE RESONANCE FLUORESCENCE SPECTRUM	896
OF AN ATOM DRIVEN BY TWO COHERENT FIELDS	
Gian-Luca Oppo et al., University of Strathclyde, Glasgow, (GB).	
-----	
S 13 THEORY OF CORRELATED ELECTRON SYSTEMS	
ANYONS, COMMENSURATE FLUX STATES AND SUPERCONDUCTIVITY	908
Pascal Lederer, Université Paris-Sud, Orsay, (F).	
A NEW WORKABLE APPROACH TO CORRELATED FUNCTIONS	922
Dieter Vollhardt, Technische Hochschule Aachen, Aachen, (D).	
QUASIPARTICLES IN DOPED QUANTUM ANTIFERROMAGNETS	937
P. Prelovšek et al., University of Ljubljana, Ljubljana, (YU).	
PARAMAGNETIC FLUX PHASE STATES	949
F.V. Kusmartsev, L. Landau Inst. for Theor. Phys., Moscow, (SU).	
-----	

S 14 HISTORY OF PHYSICS

UNIFYING PHYSICS IN THE LATE 19TH CENTURY:  
THE PROBLEM OF GRAVITATION 958  
F van Lunteren, Inst. for the History of Science, Utrecht, (NL).

PHYSICS AND GEOMETRY: THE BEGINNINGS OF RELATIVITY THEORY 969  
Dennis Dieks, University of Utrecht, Utrecht, (NL).

H.A.LORENTZ, THEORETICAL PHYSICS AND THE UNIFICATION OF  
ELECTRODYNAMICS: 1870-1895 983  
Fabio Bevilacqua, Università di Pavia, Pavia (I).

-----

S 15 PHYSICS AND ENVIRONMENT

PHYSICS AND ENVIRONMENT - ACPS SYMPOSIUM 998  
Evert W.A. Lingeman, NIKHEF-K, Amsterdam, (NL).

INDUCED CRITICAL CONDITIONS IN THE ATMOSPHERE 1004  
Angelo Tartaglia, Politecnico, Turin, (I).

-----
