<i>List of contributors</i>	viii
<i>Preface</i>	xxi
PART I LAW'S GOVERNANCE OF AI	
1	A computational thinking approach for law and artificial intelligence <i>Woodrow Barfield</i> 2
2	Control, influence, and manipulation: AI has a power problem <i>Michael Guihot</i> 13
3	AI Bill of Rights and creative lawmaking <i>John Frank Weaver</i> 36
4	Three paradigms in the legal governance of AI: on power, convenience, and prestige 57 <i>Ugo Pagallo</i>
5	Compliance, Regtech, and smart legal ecosystems: a methodology for legal governance validation 73 <i>Pompeu Casanovas, Mustafa Hashmi, Louis de Koker, and Ho-Pun Lam</i>
6	The Japanese perspective of regulation, management, and governance of artificial intelligence 105 <i>Fumio Shimpo</i>
7	How artificial intelligence will affect the practice of law 122 <i>Yueh-Hsuan Weng and David Torabi</i>
8	Three years of evolution in AI law and governance: as the law catches up to AI 148 <i>Michael Simon and Andrew Pery</i>
PART II THE INTERPLAY BETWEEN AI AND THE LAW	
9	Lawyers are from Mars, data scientists are from Venus: promoting responsible AI on Earth 177 <i>Hofit Wasserman-Rozen and Karni Chagal-Feferkorn</i>
10	The law-machine interface and the changing interplay between artificial intelligence and the law 194 <i>Peter K. Yu</i>
11	AI characterisations and their legal implications 213 <i>Jerrold Soh</i>

12	False agency in artificial intelligence <i>Shawn Bayern</i>	232
13	Automated law enforcement: perfect vision or dystopia? <i>Antje von Ungern-Sternberg</i>	250
14	Disaggregating artificial intelligence biases: a law and systems engineering approach for AI governance and regulation <i>Emile Loza de Siles</i>	275
15	A blueprint for auditing generative AI <i>Jakob Mökander, Justin Curl, and Mihir Kshirsagar</i>	307
PART III CRIMES, CONTRACTS, AND TORTS		
16	Crimes without criminals: in search of criminal liability for harms caused by AI systems <i>Elina Nerantzi and Giovanni Sartor</i>	329
17	Criminal law enforcement through AI <i>Serena Quattrocolo</i>	349
18	Artificial intelligence as evidence <i>Daniel Seng</i>	373
19	Artificial intention, unintended contracts <i>Eliza Mik</i>	402
20	Contract law and advances in artificial intelligence <i>John Linarelli</i>	425
21	Managing fairness risk of AI in consumer finance <i>David M. Skanderson and Adam H. Gailey</i>	443
22	Civil liability and artificial intelligence: challenges, policy options and legal responses <i>Teresa Rodríguez de las Heras Ballell</i>	467
23	European Union's Regulation on the placing on the market and use of AI systems: a critical overview of the AI Act <i>Nathalie Nevejans</i>	489
24	Adding to the EU AI Liability Directive: degree of autonomy, chain of confidence, inherent flaws of indecent induction, and mandatory insurance <i>Ronald P. Loui</i>	541
25	Consumer law and artificial intelligence <i>Przemysław Pałka and Agnieszka Jabłonowska</i>	570

PART IV BUSINESS LAW AND INTELLECTUAL PROPERTY RIGHTS

26	A tale of obsession: is autonomous algorithmic collusion the white whale of competition law? <i>Jerome De Cooman</i>	596
27	Robots in the boardroom: artificial intelligence and corporate law <i>Florian Möslein</i>	614
28	Taxation of artificial intelligence <i>Xavier Oberson</i>	636
29	When machines create: AI authorship and copyright law <i>Ryan Abbott and Elizabeth Rothman</i>	652
30	Copyright, fair use, and AI technology development: time to sunset the “transformative purpose” test <i>S.J. Blodgett-Ford</i>	673
31	Reorienting patent policy towards responsible AI design <i>Liza Vertinsky</i>	715
	<i>Index</i>	737
