List of contributions

Session 1: Inventory and identification

Opening statement (Yde de Jong)	12
RE: Opening statement (Mauri Ahlberg)	12
RE: Opening statement (Zoheir Sabeur)	13
Biodiversity salvage: strategically building taxonomic resources in an age of global extinction (Philippe Bouchet)	15
RE: Biodiversity salvage (Martin Sharman)	15
RE: Biodiversity salvage (Ferdinando Boero).....	16
RE: Biodiversity salvage (Simon Tillier)	17
RE: Biodiversity salvage (Christos Arvanitidis)	17
Collection and observation of data: The BioCASE perspective (Walter Berendsohn)	19
Collection and observation of data: The GBIF perspective (Vishwas Chavan).....	20
Could taxonomy increase its relevance if practised more pragmatically and dynamically? (Josef Settele).....	21

Session 2: Understanding patterns and change

Species conservation: Rareness, threats and trends (Donat Agosti).....	22
Species conservation: Going fast: The ATLANTIS initiative in Macaronesia (Paulo Borges)	23
RE: Species conservation (Nikita Kluge).....	24

Session 3: Ecological functions and services

Integrating taxonomic work (Dave Roberts).....	25
RE: Integrating taxonomic work (Ferdinando Boero).....	26
RE: Integrating taxonomic work (Giuseppe Fabrizio Turrisi)	26
RE: Integrating taxonomic work (Yves Samyn)	26
RE: Integrating taxonomic work (Ole Seberg).....	27
RE: Integrating taxonomic work (Jan Dick).....	27
RE: Integrating taxonomic work (Harvey Tyler-Walters).....	28
RE: Integrating taxonomic work (Mark Costello).....	28
RE: Integrating taxonomic work (Frank Bisby)	29
Pitfalls awaiting users of plant taxonomic data when assessing biodiversity at the species level (Jan Kirschner).....	31
RE: Assessing biodiversity at the species level (Hendrik Segers)	32
RE: Assessing biodiversity at the species level (Zoheir Sabeur)	32
How far can we trust the distribution databases? (Petr Petřík).....	32
RE: Assessing biodiversity at the species level (Roberto Canullo).....	33
Using the presence of vulnerable species for biodiversity assessments (Nikolay Sobolev) ...	34
Mountains: a laboratory for understanding basic questions of evolution using taxonomy oriented electronic data bases (Christian Körner and Eva Spehn).....	36
How phylogenetics and ecological niche modelling can combine to inform conservation threats (Chris Yesson).....	37
RE: Phylogenetics and ecological niche modelling (Daniel Faith)	39

Role of taxonomy in river water quality assessments and sustainable water management (Moog et al.)	40
Taxonomy and Ecosystem Function (Vanbergen et al.).....	41
RE: Taxonomy and Ecosystem Function (Ferdinando Boero).....	42
Taxonomic and intra-specific diversity: the two-faced Janus of biodiversity (Elena Bukvareva).....	42
Needs for improved taxonomic tools for policy support and applied biodiversity research (Klaus Henle).....	44
Taxonomy, biodiversity and its conservation: How to manage it in a sustainable way? (Dominique Richard and Doug Evans).....	46
Taxonomy to understand ecological change (Ferdinando Boero).....	47
RE: Taxonomy, biodiversity and its conservation (Sandra Luque).....	47
Taxonomy as a basis for ecological research and biodiversity conservation (Daniel Faith)...	49
RE: Taxonomy as a basis for ecological research and biodiversity conservation (Angel Perez-Ruzafa)	50

Session 4: Open access

Taxonomy and Biodiversity Information Systems: The FishBase and SeaLifeBase Experience (Deng Palomares and Nicolas Bailly).....	51
Do not let 'Open Access' stand alone in the EU as barriers will kill it (Phillip Boegh)	53
Sustainability of online taxonomic information systems (Mark Costello).....	54
How will large-scale research infrastructures benefit our science? (Wouter Los)	56
Biodiversity informatics: The Global Names Architecture (David Remsen).....	57
Taxonomy and citizen science (Jean-François Molino)	58
Recommendations for taxonomy from a Portuguese perspective (Marina Pereira Silva and Isabel Sousa Pinto)	59
Recommendations for taxonomy from a Ukrainian perspective (Viktor Gasso)	61
