Detailed Contents

<i>Table of Cases</i>	xv
<i>Table of Legislation</i>	xix
<i>Table of Guideline, Notice and Other Soft Law</i>	xxiii
1. Introduction: scope and limits of sustainability and antitrust law	1
I. The interaction of sustainability and antitrust law	1
II. Central argument, theme, and structure of the book	4
III. Background: sustainability as a concept	8
1. History and basic tenets of sustainability	8
2. Environmental sustainability	12
3. Social sustainability	15
4. Economic sustainability	17
5. Sustainability and corporate conduct	18
6. Conclusions	20
IV. Law and sustainability	21
1. Constitutional and other obligations towards achieving sustainability	23
2. Competition laws	26
V. Conclusion	27
2. The economics of competition and sustainability: good and bad competition	29
I. Introduction	30
II. The markets delivering sustainability	31
1. Economics: theory	32
a) Competition producing better sustainability outcomes in static analysis	32
aa) Demand side	32
bb) Supply side	37
b) Monopoly/cooperation producing better sustainability outcomes in static analysis	39
c) Consequences and limitations	45
aa) Consequences	45
bb) Limitations	46
d) Sustainability innovation	52
e) Standardization and coopetition	56
f) Summary: economic theory	57

2. Economics: practice	58
a) Empirical studies on sustainability and competition	58
b) Measuring sustainability in the context of competition law	62
c) Summary: economics—practice	65
3. Summary: economics in theory and in practice	66
III. Delivering sustainability: states vs markets	66
1. States fostering sustainability outcomes by improving competition: competition policy and other legal tools	66
2. States vs firms reducing competition to achieve sustainable outcomes	69
3. Summary—states vs markets	72
IV. Conclusion	73
3. Competition authorities as guardians of sustainability	75
I. Introduction	76
II. When is competition good for sustainability?	77
III. Competition enforcement and coincidental sustainability improvements	78
IV. Targeted enforcement with spillover effects	81
1. Price competition and important input markets	82
2. Protecting price competition and the fight against poverty	83
3. Restrictions in the labour market and poverty	86
4. Summary	89
V. Competition enforcement and sustainability as competition parameters	89
1. Suppressing competition on the sustainability component—quality, choice, and price	90
a) Cartels effecting choice	90
b) Mergers and closeness of competition	93
2. Suppressing competition on the sustainability component: sustainability innovation	94
a) Cartels and innovation	95
b) Innovation in the merger and abuse context	99
3. Summary	104
VI. Competition enforcement and directly fostering sustainability: on the margins of competition law	106
1. Exploitative abuses and superior bargaining power	106
2. Unsustainable business activity as abuse	109
3. Summary	111
VII. Limits of competition enforcement for sustainability	111
VIII. Conclusion	112
4. Competition authorities as public enablers of private sustainability efforts	115
I. Introduction	116
II. Of prima facie and actual conflicts	118

III. The mirage of a conflict: matter outside the scope of competition law	118
1. Arrangements generally outside the scope of competition laws	119
a) Commercial/economic activities covered by competition law	119
b) Actions within an entity, and collective bargaining	122
c) Summary	130
2. Platforms	130
3. Sectoral exceptions	133
4. State action and state compulsion, the right to petition to the government	136
5. Activities that reflect the applicable legal framework	140
6. Standard-setting and its special treatment	142
7. Other cases	155
a) IP pooling	155
b) Actions not substantially affecting prices, choice, or innovation	157
c) Shareholder agreements	165
8. Specific rules in some countries	166
9. Summary	167
IV. Balancing to resolve conflicts	168
1. Introduction	168
2. Abstract balancing via public interest clauses	169
a) General public interest clauses	169
b) Public interest clauses in mergers and with regard to anti-competitive agreements	174
c) Public interest tests for certain areas of the economy	180
d) Summary abstract balancing via public interest clauses	186
3. Balancing within economic frameworks of competition law	186
a) Quality	188
b) Choice	191
c) Future benefits and innovation	191
d) Benefits in other markets	194
e) Broader efficiency measurements	201
f) Benefits in markets abroad	208
4. Summary	213
V. The economic frameworks and legislative choices	214
VI. Conclusion	219
5. Process matters	221
I. Introduction	221
II. Objectives and priorities	222
1. Prioritizing sustainability matters/sustainability as an objective for an agency	223
2. De-prioritizing cases fostering sustainability	227
III. Openness and formal and informal guidance	229
1. Guidelines	229
2. Openness, informal guidance for individual cases	232
3. Informal guidance and publicity	234

IV. Approval/exemption procedures and sandboxing	235
1. Approval/exemption procedure	235
2. Sandbox and ongoing supervision	239
V. Evidence, capacity, cooperation, and advocacy	240
1. Evidence and burden of proof	240
a) The evidence	240
b) Burden of proof	242
2. Capacity and skills, cooperation, and advocacy	242
VI. Market inquiries and procedure	245
1. Market inquiries/studies/investigations	245
2. Procedure	247
3. Rights to private action	249
VII. Sanctions and remedies	250
1. Fines and sanctions	250
2. Remedies	252
VIII. International cooperation	256
IX. Conclusion	257
6. Conclusion	259
I. Overall contribution	259
II. A brief recap	259
1. Sustainability	259
2. Economics, competition, and sustainability	260
3. Competition authorities as guardians of sustainability	261
4. Competition authorities as public enablers of private sustainability	262
5. Process matters	263
III. Outlook	264
