Foreword	13
Acknowledgements	14
Introduction	15
I Identity	17
1.1 Nomenclature	17
1.1.1 Valid name	17
1.1.2 Subfamily Cyclanorbinæ HUMMEL, 1929 – Flap-shelled turtles	17
1.1.2.1 Diagnosis	17
1.1.3 Tribe Lissemydini WILLIAMS, 1950 (as Lissemydinae)	18
1.1.3.1 Diagnosis	18
1.1.4 Genus <i>Lissemys</i> M. A. SMITH, 1931– Indian flap-shelled turtles	18
1.1.4.1 Diagnosis	18
1.1.4.2 Subspecies	20
1.1.5 Common names	27
1.2 Description	28
1.2.1 Measurements and mass	28
1.3 Morphology	32
1.3.1 Diagnosis	32
1.4 External/internal morphology/colouration	33
1.4.1 Skull/head	33
1.4.2 Spine	37
1.4.3 Hyoid	38
1.4.4 Carapace (bony disc)	38
1.4.5 Plastron	41
1.4.6 Pectoral girdle	45
1.4.7 Pelvic girdle	45
1.4.8 Extremities	46
1.4.9 Antebrachial scales	47
1.4.10 Muscular system	49
1.4.10.1 Muscles of the head and neck	49
1.4.10.2 Movements of the head and neck	56
1.4.10.3 Muscles of the pectoral girdle and upper arm	57
1.4.10.4 Muscles of the forearm and hand	61
1.4.10.5 Muscles of the pelvic girdle and the hind limb	65
1.4.10.6 Muscles of the leg and foot	69
1.4.11 Visceral organs	73
1.4.11.1 Digestive system	73

1.4.II.1.1 pH-value	73
1.4.II.1.2 Enzymes	74
1.4.II.1.3 Oesophagus	75
1.4.II.1.4 Stomach	75
1.4.II.1.5 Intestine	75
1.4.II.1.6 Liver	76
1.4.II.1.7 Pancreas	76
1.4.II.2 Respiratory system	77
1.4.II.3 Circulatory system	79
1.4.II.3.1 Heart	79
1.4.II.3.2 Arterial system	83
1.4.II.3.3 Venous system	89
1.4.II.4 Urogenital system	95
1.4.II.4.1 Male genital system	95
1.4.II.4.2 Female genital system	97
1.4.II.4.3 Kidneys	98
1.4.II.4.4 Bladder	98
1.4.II.5 Nervous system	99
1.4.II.5.1 Brain	99
1.4.II.5.2 Spinal nerves	105
1.4.II.5.3 Autonomous nervous system	108
1.4.I2 Endocrinology	108
1.4.I2.1 Thyroid gland	109
1.4.I2.2 Pancreas	111
1.4.I2.3 Adrenal gland	111
1.4.I2.4 Pineal gland	115
1.4.I2.5 Testes	117
1.4.I3 Exocrine glands	117
1.4.I4 Blood proteins/amino acids	117
1.4.I5 Haematology	118
1.4.I6 Genetics	120
1.4.I7 Karyotype	123
1.4.I8 Colouration and pattern	126
2 Variation in characters	130
2.1 Sexual dimorphism	130
2.2 Ontogenetic development	134
3 Ecology	135
3.1 Distribution	135
3.1.1 Range	138
3.1.2 History of distribution	146

3.2 Biotope	149
3.2.1 Habitat preferences	149
3.2.2 Water depth	151
3.2.3 Habitat temperature	151
3.2.4 Body temperature	154
3.2.5 Physical and chemical properties of water	155
3.2.6 Presence in brackish water, the sea and on beaches	155
3.3 Population	158
3.3.1 Abundance	158
3.3.2 Population structure	158
3.3.3 Sex ratio	159
3.4 Food	159
3.4.1 Food in the wild	159
3.4.2 Food in captivity	163
3.5 Reproduction	163
3.5.1 Reproduction cycle	163
3.5.2 Clutch size	187
3.5.3 Eggs	189
3.5.4 Incubation period	191
3.5.5 Hatching time	193
3.5.6 Juvenile development and growth	193
3.5.7 Maturity	200
3.5.8 Longevity	201
3.6 Aestivation	201
3.7 Hibernation	205
3.8 Predators	206
3.9 Ectoparasites	207
3.10 Endoparasites	209
3.11 Anomalies	225
3.12 Injuries	227
3.13 Pathology	228
3.14 Mortality	232
4 Behaviour	234
4.1 Activity	234
4.2 Movements	235
4.3 Reproductive and egg-laying behaviour	236
4.4 Intraspecific behaviour and aggression/agonistic behaviour	239
4.5 Cannibalistic behaviour	242
4.6 Thermoregulation	242
4.7 Antipredator behaviour	243

4.8 Hunting and feeding behaviour 251

4.9 Diving and breathing behaviour 251

4.10 Burrowing behaviour 254

5 Anthropogenic threats and protection 255

6 Bibliography 264
