

CONTENTS

Preface		xvii
Chapter 1	Introduction	1
	Approaches and Explanatory Constructs	2
	Organizational Behavior	3
	Job Performance	3
	Turnover and Other Withdrawal Behaviors	4
	Political Behavior	5
	Voting Participation	6
	Voting Choice	8
	Discriminatory Behavior	11
	Empirical Findings	11
	Implicit Versus Explicit Measures of Prejudice	14
	Empirical Evidence	15
	Discussion	17
	The Reasoned Action Approach	20
	The Nature of Reasoned Action	23
	Background Factors	24
	Related Reasoned Action Models	25
	Conclusion	27
Chapter 2	Defining and Predicting Behavior	29
	Levels of Generality	30
	Direct Observation Versus Self-Reports of Behavior	32
	Varieties of Behavioral Criteria	34
	Dichotomies, Frequencies, and Magnitudes	34
	Behavioral Categories	35

Validity of Self-Reports	37
Behaviors Versus Goals	38
Predicting Behavior	39
The Concept of Intention	39
Behavioral Expectations and Willingness	40
Behavioral Expectation	41
Willingness	42
Using Intentions to Predict Behavior	43
The Principle of Compatibility	44
Single-Act Dichotomous Criteria	44
Single-Act Continuous Criteria	45
Behavioral Categories	47
Empirical Support for Prediction of Behavior From Intentions	48
Self-Reports Versus Objective Measures of Behavior	48
Prospective Versus Retrospective Measures of Behavior	49
Prediction of Routine Behaviors	51
Automaticity	51
Factors Influencing the Predictive Validity of Intentions	53
Compatibility	54
Temporal Stability of Intentions	56
Sequential Hurdles	57
Volitional Control	57
Memory for Intentions	59
Intention–Behavior Gap: Literal Inconsistency	59
Pseudo-Inconsistency: An Explanation of Literal Inconsistency	60
Hypothetical Versus Real Situations	62
Perceived Behavioral Control	64
Definition and Measurement of Perceived Behavioral Control	64
Empirical Support for the Predictive Validity of Perceived Behavioral Control	65
Moderating Effects of Perceived Behavioral Control	65
Additive Effects of Intentions and Perceived Behavioral Control	66
Methodological Considerations in the Prediction of Behavior	68
Restriction of Range: Floor and Ceiling Effects	69

	Summary and Conclusions	71
	Notes	73
Chapter 3	Attitudes and Their Determinants	75
	Definition of Attitude	75
	Attitude Versus Affect	77
	Measuring Attitudes	79
	The Semantic Differential	79
	Instrumental Versus Experiential Aspects of Attitude	82
	Belief-Based Measures of Attitude	85
	Factor Analysis of Attitudinal Items	88
	Can Items and Factors Be Used to Explain an Underlying Attitude?	92
	Including Factual and Ambivalent Items in Attitude Scales	94
	The Expectancy-Value Model of Attitude	96
	Beliefs as a Basis of Attitudes	96
	Salient Beliefs	98
	Eliciting Salient Beliefs	100
	Empirical Support for the Expectancy-Value Model	103
	Predictive Validity of Salient Versus Nonsalient Beliefs	104
	Scoring Belief Strength	105
	Disagreement With Belief Statements	107
	Issues Related to the Expectancy-Value Model	110
	Importance of Accessible Beliefs	110
	Multiplicative Combination Rule	113
	Attitudinal Ambivalence	118
	Illustration of the Expectancy-Value Approach to Attitude	120
	Summary and Conclusions	125
	Notes	127
Chapter 4	Perceived Norms and Their Determinants	129
	Perceived Social Pressure	130
	Compliance With Perceived Social Pressure	130
	Injunctive Versus Descriptive Norms	131
	Injunctive Norms	133
	Determinants of Injunctive Norms	134
	Modal Normative Beliefs	139

	Issues Related to Normative Beliefs and Motivation to Comply	141
	Descriptive Norms	143
	Measuring Descriptive Norms	144
	Correlations Between Injunctive and Descriptive Norms	148
	Discussion and Conclusions	151
	Notes	152
Chapter 5	Perceived Behavioral Control and Its Determinants	153
	Defining and Measuring Perceived Behavioral Control	154
	Definition of Perceived Behavioral Control	154
	Self-Efficacy	155
	Measuring Perceived Behavioral Control	155
	Self-Efficacy Measures	156
	Self-Efficacy Versus Perceived Behavioral Control	160
	Perceived Ease or Difficulty of Behavioral Performance	162
	Capacity Versus Autonomy: A Hierarchical Model of Perceived Control	165
	Internal Versus External Sources of Control	168
	Control Beliefs	170
	Control Beliefs and Perceived Behavioral Control	172
	Internal Versus External Control Factors Reconsidered	176
	Summary and Conclusions	177
	Notes	178
Chapter 6	Attitudes, Norms, and Control as Predictors of Intentions and Behavior	179
	Separate Effects of Attitudes, Norms, and Control on Intentions	181
	Combined Effects of Attitudes, Norms, and Control on Intentions	184
	Illustrative Evidence for Predictive Validity	185
	Variations in Regression Coefficients	190
	Meaning of Regression Coefficients	191
	Systematic Comparisons of Regression Weights	193
	Testing Hypotheses About Regression Weights	197
	Correlational Evidence	197
	Experimental Evidence	199

	Mediating Processes	201
	From Beliefs to Behavior	203
	Mediated Effects of Beliefs	204
	The Explanatory Value of Beliefs	205
	Illustrations	206
	Summary and Conclusions	217
	Notes	218
Chapter 7	Background Factors and Origins of Beliefs	221
	Belief Formation	221
	Observational Beliefs	221
	Informational Beliefs	222
	Inferential Beliefs	222
	The Nature of Beliefs	223
	Differences in Beliefs: The Role of Background Factors	224
	Demographic Variables	225
	Gender	227
	Ethnicity	230
	Further Evidence for the Mediated Effect of Demographic Variables	234
	Personal Dispositions	236
	Effects of Personal Dispositions on Beliefs	237
	Other Background Factors	241
	Knowledge	241
	Affect: Moods and Emotions	246
	Social Environment	249
	Summary and Conclusions	252
	Notes	253
Chapter 8	General Attitudes and the Prediction of Behavior	255
	General Attitudes and Behavioral Patterns	257
	General Attitudes and Specific Behaviors	259
	Attitude Strength	260
	Fazio's MODE Model	263
	Empirical Support for the MODE Model	265
	Issues Related to the MODE Model	266
	Implications of the MODE Model	268
	Implicit Versus Explicit Attitudes	269
	Interpreting Implicit Attitude Measures	272

xii Contents

	General Attitudes as Background Factors	273
	Summary and Conclusions	278
	Notes	279
Chapter 9	Challenges to the Reasoned Action Approach	281
	The Question of Sufficiency	281
	The Limits of Predictive Validity	282
	The Normative Component	283
	The Role of Past Behavior	285
	Past Behavior and the Prediction of Future Behavior	285
	Past Behavior and the Prediction of Intentions	287
	The Residual Effect of Past Behavior on Intentions	289
	Self-Identity	290
	Anticipated Affect	294
	The Question of Rationality	300
	Deliberative Versus Spontaneous Action	300
	Limiting Conditions	303
	Uncontrollable Behaviors and Behaviors Outside of Awareness	304
	Addictive Behaviors	305
	Strong Emotions and Intoxication	306
	Cross-Cultural Applications	308
	Methodological Issues	309
	Validity of Questionnaire Measures	309
	Accessibility of Beliefs	310
	Consistency Bias	310
	The Effect of Measuring Intentions	313
	Correlational Data and Causal Effects	316
	Persuasive Communication	316
	Changing Intentions	317
	Summary and Conclusions	317
	Notes	319
Chapter 10	Changing Behavior: Theoretical Considerations	321
	Specifying Intervention Goals	322
	Defining the Behavior to Be Changed	323
	Behaviors Versus Goals	323
	Single Behaviors Versus Behavioral Categories	324
	Intention Versus Implementation	325

Designing an Intervention	326
Formative Research	326
First Phase	326
Second Phase	329
Changing Intentions	331
Acting on Intentions	334
Intervention Strategies Designed to Change Intentions	336
Persuasive Communication	338
The Hovland Approach	338
The Elaboration Likelihood Model	340
Argument Quality	343
Acceptance, Yielding, and Impact Effects	345
Message Content	348
Other Influence Strategies	352
Stages of Change	353
Stages of Change and the Reasoned Action Approach	356
Strategies for Helping People Act on Their Intentions	357
Implementation Intentions and Commitment	358
Evaluating Intervention Effects	359
Diagnosing Success and Failure	360
Targeting and Tailoring an Intervention	362
Searching for the Magic Bullet: Behavioral Aggregates	363
Ethical Concerns	366
Summary and Conclusions	367
Notes	368
Chapter 11 Changing Behavior: Sample Interventions	369
Interventions Designed to Change Intentions	372
Testicular Self-Examination	372
Using Public Transportation	373
HIV/AIDS Prevention	374
The AIDS Community Demonstration Projects	377
Project RESPECT	382
Validity of Self-Reported Behavior and Use of Biological Outcome Measures	385
Interventions Designed to Help People Act on Their Intentions	392

Summary and Conclusions	395
Notes	396
Chapter 12 Conclusion	397
Retrospective	397
Future Directions	401
Changing Behavior	407
Final Comment	408
Notes	409
References	411
Appendix: Constructing a Reasoned Action Questionnaire	449
Part I: Formative Research	449
Defining the Behavior	449
Example: Physical Activity	449
Specifying the Research Population	449
Example: Major Heart Surgery Patients	449
Formulating Items for Direct Measures	449
Attitude: Instrumental and Experiential Aspects	450
Perceived Norm: Injunctive and Descriptive Aspects	450
Perceived Behavioral Control: Capacity and Autonomy Aspects	450
Intention	450
Past Behavior	451
Administering a Pilot Questionnaire	451
Eliciting Salient Beliefs	451
Behavioral Outcomes	451
Normative Referents	451
Control Factors	452
Constructing Sets of Modal Salient Beliefs	452
Formulating Direct Measures	452
Part II: Preparing a Standard Questionnaire	453
Behavioral Beliefs and Outcome Evaluations	453
Sample Outcome: Faster recovery from my surgery	453
Injunctive Normative Beliefs and Motivation to Comply	454

Sample Injunctive Normative Referent: My Doctor	454
Descriptive Normative Beliefs and Identification	
With the Referent	454
Sample Descriptive Normative Referent: My	
Friends	454
Control Beliefs and Power of Control Factors	455
Sample Control Factor: Physical Strength	455
Direct Measures	455
Other Measures	455
Behavior	455
Sample Standard Questionnaire	456
General Instructions	456
The Questionnaire	457
Subject Index	465
Author Index	509
