

CONTENTS

Opening Remarks	9
<i>Dr. Robert J. Luxmoore</i>	
Topic 1	
Interpretation of soil data at different scales in time and space	11
State-space approach to evaluate the relation between soil physical and chemical properties	
<i>L.C. Timm, K. Reichardt, J.C.M. Oliveira, F.A.M. Cassaro, T.T. Tominaga, O.O.S. Bacchi, D. Dourado-Neto and D.R. Nielsen</i>	
	13
Interpretation of soil variability on a reclaimed dumpsite	
<i>L. Borůvka and J. Kozák</i>	
	33
Development of scale-specific measurement techniques for vadose zone characterization	
<i>J.W. Hopmans, C.M. Vaz and K.L. Bristow</i>	
	43
The yield increase on agricultural soils in Lower Austria	
<i>O. Nestroy</i>	
	59
Soil interpretations for sustainable forest management in the Southeastern United States	
<i>J.A. Burger and D.A. Scott</i>	
	65
Forest soils as a source of CO ₂	
<i>J. Kulhavý and P. Formánek</i>	
	73
Long-term forest soil acidification and nutrient degradation - limitation to future forestry	
<i>J. Hruška, E. Cienciala, P. Moravčík and T. Navrátil</i>	
	83
The significance of the differences in selected soil properties over 63 years in mountain forest sites of Eastern Carpathian	
<i>J. Houška and K. Rejšek</i>	
	87
Nutrient management guidance for enhancing sustainable forest productivity	
<i>R.J. Luxmoore, P.S.J. Verburg, M.J. Ducey, R. Harrison, A.R. Sidell, D.W. Johnson, W.W. Hargrove, M.L. Tharp and F.M. Hoffman</i>	
	99
Degradation of forest soils using bulldozer site preparation in the Krušné hory (Ore) Mts. and possibilities of their restoration	
<i>V. Podrázský, I. Ulbrichová and W.K. Moser</i>	
	103
Soil erosion control in urbanized areas	
<i>P. Jambor</i>	
	109
The retrograde acidification processes in our soils as a consequence of non-adequate liming	
<i>K. Voplakal</i>	
	111

Topic 2**Soil geographic information systems**

119

The national cooperative soil survey in the United States: past, present and future

H. Smith and B.D. Hudson

121

The state and development of soil surveys and GIS in the Czech Republic

J. Kozák and J. Němeček

129

Mapping nutrient distributions using geospatial techniques

B.A. Needelman and G.W. Petersen

153

Using GIS to compare wetland delineation methods in the prairie pothole region

D.H. Rickerl, J.H. Gritzner, Y. Huang, A. Vautravers and P.K. Wieland

155

Soil information system for South Moravian alluvial plains as key to sustainable land management - a user's perspective

S. Tewari and J. Kulhavý

163

Using DRASTIC for spatial decision support as a tool of risk mapping

C. Lénárt, J. Tamás and T. Tomor

169

Woodland productivity determination for an Alabama, USA, National Preserve using adjacent old and recent soil surveys and GIS

B.F. Hajek and E.S. Lyle, Jr.

177

Criteria and areas of public interest in land-use management in the Czech Republic

Z. Vašků, J. Lhotský and D. Vetišková

181

Topic 3**Transport processes in soil with special reference to preferential flow**

187

Management strategies to prevent nitrogen losses: spatial and temporal processes

H.M. van Es and J.M. Sogbedji

189

Immiscible fluids flow in soils: numerical and experimental solution

L. Jendele, S. Matula and M. Kutílek

205

Preferential flow in sand, loam, clay, and peat soils

L.W. Dekker, C.J. Ritsema and K. Oostindie

225

Monitoring and modeling of preferential flow in water repellent sandy soils

C.J. Ritsema, J.C. van Dam, J.L. Nieber, L.W. Dekker, K. Oostindie and T.S. Steenhuis

231

Infiltration through crust topped soils: Henry's effect

M. Kutílek

237

Simulation of water transport in heterogeneous soils

V. Štekauerová

247

Reduce errors of approximated solutions due to the uncertainty of moisture transfer problem.	
<i>M. Boger</i>	255
Remarks to the physics of water movement and solute transport in swelling soils with cracks	
<i>F. Doležal</i>	265
Topic 4	
Heavy metals and organic pollutants in soils	275
Lead and zinc biogeochemistry in a hardwood forest	
<i>Ch.E. Johnson</i>	277
Contents, sources and possible assessment methods of heavy metals and organic pollutants in agricultural soils of the Czech Republic	
<i>M. Sáňka</i>	283
Heavy metals and microelements content of humus forms in different regions of the Czech Republic	
<i>V. Podrázský, W.K. Moser and A. Kapička</i>	291
Biological and chemical indices to evaluate (bio)availability or natural attenuation of metals in soils	
<i>D.C. Adriano</i>	299
Magnetic minerals as tracers of industrial pollution in soils	
<i>E. Petrovský, A. Kapička, N. Jordanova and H. Fialová</i>	301
Influence of hydroxamate ligands on Pb(II) desorption from Fe(III) oxides	
<i>E.L. Ander, W.E. Dubbin</i>	305
Effects of former polymetallic ore mining activities on soil chemical properties and chosen plant species	
<i>M. Bussinow and B. Šarapatka</i>	307
Spatial multi-objective decision making in phytoremediation of mining areas	
<i>E. Kovács and J. Tamás</i>	313
The supramolecular structure of humic substances	
<i>A. Piccolo</i>	323
Critical values of trace elements in soils for the transfer pathway soil-plant	
<i>E. Podlešáková, J. Němeček and R. Vácha</i>	355
Microbial response to persistent organic pollutants and heavy metals in alluvial soils	
<i>M. Tesařová, R. Kordiovský, J. Vakula, E. Šroubková, H. Fišerová, A. Sidibé and L. Dušek</i>	365
Cadmium availability in soils treated by different forms of potassium fertilizers and Cd accumulation in corn biomass	
<i>J. Balík, D. Pavlíková, P. Tlustoš and J. Száková</i>	371

Soil properties controlling heavy metal transfer to plants – a case study <i>L. Borůvka, O. Drábek and J. Kozák</i>	377
List of authors	381
