

CONTENTS

PREFACE	vi
PART I	Prologue
	1 Basic Properties of Numbers 3
	2 Numbers of Various Sorts 21
PART II	Foundations
	3 Functions 39
	<i>Appendix. Ordered Pairs</i> 54
	4 Graphs 56
	<i>Appendix 1. Vectors</i> 75
	<i>Appendix 2. The Conic Sections</i> 80
	<i>Appendix 3. Polar Coordinates</i> 84
	5 Limits 90
	6 Continuous Functions 115
	7 Three Hard Theorems 122
	8 Least Upper Bounds 133
	<i>Appendix. Uniform Continuity</i> 144
PART III	Derivatives and Integrals
	9 Derivatives 149
	10 Differentiation 168
	11 Significance of the Derivative 188
	<i>Appendix. Convexity and Concavity</i> 219
	12 Inverse Functions 230
	<i>Appendix. Parametric Representation of Curves</i> 244
	13 Integrals 253
	<i>Appendix. Riemann Sums</i> 282
	14 The Fundamental Theorem of Calculus 285

- 15 The Trigonometric Functions 303
- *16 π is Irrational 324
- *17 Planetary Motion 330
- 18 The Logarithm and Exponential Functions 339
- 19 Integration in Elementary Terms 363
- Appendix. The Cosmopolitan Integral* 402

PART IV Infinite Sequences and Infinite Series

- 20 Approximation by Polynomial Functions 411
- *21 e is Transcendental 442
- 22 Infinite Sequences 452
- 23 Infinite Series 471
- 24 Uniform Convergence and Power Series 499
- 25 Complex Numbers 526
- 26 Complex Functions 541
- 27 Complex Power Series 555

PART V Epilogue

- 28 Fields 581
- 29 Construction of the Real Numbers 588
- 30 Uniqueness of the Real Numbers 601

- Suggested Reading* 609
- Answers (to selected problems)* 619
- Glossary of Symbols* 665
- Index* 669
