

Contents

1	Introduction: A Look at Fossil Resources and Bioeconomy Alternatives	1
1.1	The Future Is Open	1
	A Building Block for a Sustainable Future	2
	How This Book Came into Being	4
	A Desirable Material Turnaround	5
	Green Growth in a Finite World?	5
	Towards a More Sustainable Lifestyle	6
1.2	Welcome to the Anthropocene	6
	The World Is Not Enough	7
1.3	The Global Carbon Cycle	8
1.4	Life Out of Balance	9
	We Didn't Start the Fire?	10
1.5	The Downsides of Using Fossil Materials	11
	Keep it in the Ground	12
1.6	Bioeconomy: Using Renewable Carbon	12
	New Paradigms	13
	Ötzi and the Bioeconomy	14
1.7	Biomass: The Foundation of Bioeconomy	15
	Where Does the Biomass Come From?	16
	Modern Alchemy: Biorefining	16
1.8	Energy from Biomass	17
1.9	Bio-Based Plastics	18
	An Interrupted Development	19
	Bioplastics for Future?	20
1.10	Circular Economy: Time to Turn Things Around	20
	From Trash to Treasure	21
1.11	Limits of a Biobased Economy	22
	Less Is More	26
1.12	Into a New Era	27
	References	28

2	Algae	31
2.1	Green Climate Heroes	31
2.2	Fast Growing Biomass	32
2.3	Applications with Algae	33
2.4	Insulation from Neptune Grass	34
2.5	Packaging from Seaweed	36
2.6	Stamps from Algae Paper	37
2.7	Asphalt from Algae Residues	39
2.8	Air Filter from Microalgae	40
2.9	Colours from Living Algae	42
2.10	Carbon Fibres from Algae	43
2.11	Ski Slope Made with Algae	44
	References	45
3	Plants	47
3.1	What Are Plants Actually?	48
3.2	A Plant for Every Purpose	49
3.3	Bicycle Tyres from Dandelions	49
3.4	Furniture Textiles from Nettle	51
3.5	Packaging from Coconut Fibre	53
3.6	Household Cleaner from Beetroot	54
3.7	Mulch Film from Starch	56
3.8	Clothes from Hemp, Linen and Beechwood	58
3.9	Guitar from Hemp Fibres	60
3.10	Bricks Made from Hemp Hurds	62
3.11	Confetti from Flower Seeds	64
3.12	Architecture from Plants	65
3.13	Furniture Boards from Rattan	67
3.14	Surfaces from Alpine Meadows	70
3.15	Tableware from Palm Leaves	72
3.16	Hooks from Grass	74
3.17	Backpack from Banana Fibre	76
3.18	Building Block from Maize	77
3.19	Street Sign from Bamboo	79
3.20	Insulation Board from Reed	80
3.21	Vegan Fur from Typha	82
3.22	Car Body from Flax Fibre	84
3.23	Sailboat from Flax	86
3.24	Pavilion from Flax Fibre	88
	References	91
4	Wood	93
4.1	What Is Wood Actually?	94
	It Does Grow on Trees, Doesn't It?	94
	The Perfect Building Material	96

4.2	Cast from Wood Fibres	97
4.3	Furniture from Birch Bark	99
4.4	Credit Card from Modified Wood	100
4.5	Bicycle Helmet from Cellulose	101
4.6	Bed Linen from Eucalyptus	103
4.7	Underwear from Wood	105
4.8	Diapers from Wood Fibres	106
4.9	Seat Covers from Tree Bark	108
4.10	Wind Turbine Towers from Wood	110
4.11	Backpack from Paper	113
4.12	Chair from Bent Willow	114
4.13	“Glass” from Wood and Lemon	116
4.14	Urns from Branches	117
4.15	Minimal Shoes from Paper	118
4.16	Chewing Gum from Pine Resin	119
4.17	Bicycle Parts from Bentwood	120
4.18	Batteries from Organic Electrolytes	121
4.19	Insulating Material from Bark Extract	123
4.20	Textiles from Hardwood	125
4.21	Stool from Chestnut Rods	127
4.22	Skateboard from Cork	128
4.23	4D-Printing with Wood Fibre Filament	130
4.24	Tiny House from Cardboard	132
4.25	Cities from Wood	133
	References	136
5	Animals	137
5.1	The Meat Problem	138
5.2	Unused Potentials	138
5.3	Egg Cups from Eggs	139
5.4	Sneakers from Dog Hair	141
5.5	Carrier Bag from Human Hair	142
5.6	Composites from Sheep Wool	144
5.7	Functional Clothing from Sheep Wool	146
5.8	Dishes Made from Bovine Blood	148
5.9	Packing from Crab Shells	149
5.10	Plastic from Fish Waste	151
5.11	Tiles from Fish Scales	153
	References	156
6	Bacteria	157
6.1	Better Than Their Reputation	158
6.2	Innovative Uses	159
6.3	Running Shoe from Bacterial Silk	160
6.4	Design Classics from Biopolymers	161
6.5	Ballpoint Pen from PHA	163

6.6	Super Glue from Intestinal Bacteria	164
6.7	Textile Dyes from Bacteria	166
6.8	Purse from Bacterial Nanocellulose.	168
6.9	Proteins from Unicellular Organisms	170
	References.	172

7 Biogenic Residues

7.1	From Waste to Wealth—Rethinking Resources.	173
7.2	Too Good to Go	174
7.3	Lampshade from Grape Residues	175
7.4	Lounge Chair from Artichoke	177
7.5	Coffee Mug from Coffee Grounds.	178
7.6	Cosmetics from Coffee Residues.	179
7.7	Wine Cooler from Larch Bark	180
7.8	Dishes from Bran	182
7.9	Snack Box from Cocoa Shells	183
7.10	Make-Up Wipes from Green Waste	185
7.11	Lampshades from Old Christmas Trees.	186
7.12	Carpet from Cellulose	188
7.13	Paper from Kiwi Peel, Cherry Stones and Lavender Stems.	189
7.14	Furniture from Popcorn	191
7.15	Chair from Bark.	192
7.16	Surfaces from Maize Husks	194
7.17	Spoon from Oat Fibres.	197
7.18	Socks from CO ₂	198
7.19	Plant Pots from Sunflower Husks	200
7.20	Halter from Grape Skin	202
7.21	Paper from Elephant Dung.	203
7.22	Desk from Scrap Wood	205
7.23	Shipping Box from Straw	208
7.24	Handbag from Orange Peel	210
7.25	Lamp from Avocado Pits	211
7.26	Jacket from Pineapple Scraps	214
7.27	Tights from Chicory.	216
	References.	218

8 Fungi

8.1	Neither Animal Nor Plant	220
8.2	Fermentation Agents on a Microbial Mission	221
8.3	Innovation Drivers for the Bioeconomy.	222
8.4	Coffin from Mushroom Mycelium.	222
8.5	Packaging from Mushroom	223
8.6	Laminate Flooring from Mushroom and Organic Residues	225
8.7	Caps from Tinder Fungus.	227
8.8	“Bricks” from Mushrooms.	229
8.9	Architecture from Fungi	230
	References.	231
