## **CHAPTER 1 Multifactorial stress combination, plant microbiome recruitment, and reactive oxygen species/antioxidant feedbacks for plant stress alleviation..... 1**

*Miguel J. Beltrán-García, América Martínez-Rodríguez, Celia Beltran-García, Jorge Vicente Miranda-Rivera, Benjamín Valdez-Salas, Paolo Di Mascio and James F. White*

1.1 Introduction .....	1
1.2 Plant responses to multifactorial stress combination .....	2
1.3 Plant stress and abscisic acid crosstalk.....	4
1.4 Abscisic acid signaling and reactive oxygen species connection to cope with plant stress.....	7
1.5 Plant microbiome: the invisible life that helps plants against stress.....	9
1.6 Endophyte recruitment (cry for help strategy) under stress: from transitory altered state to plant resilience.....	11
1.7 Reactive oxygen species/antioxidants feedback for microbiome modulation, symbiosis, plant stress mitigation, and more: many questions that need further studies.....	17
1.8 Conclusions .....	21
Acknowledgments .....	22
References.....	22

## **CHAPTER 2 Impact of COVID-19 on global agriculture and food sector ..... 33**

*Rahul Nitnavare, Joorie Bhattacharya, Sirikanjana Thongmee and Sougata Ghosh*

2.1 Introduction .....	33
2.2 Background.....	34
2.3 Control measures.....	36
2.3.1 Travel restriction.....	36
2.3.2 Border closure .....	37
2.3.3 Social distancing .....	37
2.4 Immediate impacts .....	38
2.4.1 Food production .....	38

2.4.2	Food processing .....	40
2.4.3	Connectivity: transport and distribution.....	42
2.4.4	Labor availability .....	44
2.4.5	Impairment of farm systems.....	47
2.4.6	Market and retailer.....	48
2.4.7	Consumer .....	50
<b>2.5</b>	<b>Conclusions and future perspectives.....</b>	<b>51</b>
	Acknowledgment.....	52
	References.....	53
<b>CHAPTER 3</b>	<b>State of the soil health before maize intercropped with <i>Eucalyptus grandis</i> under agroforestry environment in Limpopo Province, South Africa .....</b>	<b>57</b>
	<i>Thabo Nkuna, C. Madakadze, P. Maponya and Z. Dube</i>	
<b>3.1</b>	<b>Introduction .....</b>	<b>57</b>
<b>3.2</b>	<b>Materials and methods .....</b>	<b>59</b>
3.2.1	Nitrogen determination .....	59
3.2.2	Determination of functional diversity .....	59
3.2.3	Determination of soil microbial enzymatic activity.....	60
3.2.4	Statistical analyses .....	60
<b>3.3</b>	<b>Results and discussion.....</b>	<b>60</b>
3.3.1	Carbon source utilization profiles .....	61
3.3.2	Soil microbial enzymatic activity, viz. microbial activity .....	64
<b>3.4</b>	<b>Conclusions .....</b>	<b>68</b>
	References.....	68
<b>CHAPTER 4</b>	<b>Arbuscular mycorrhizal fungi in sustainable agriculture .....</b>	<b>71</b>
	<i>Semra Demir, Younes Rezaee Danesh, Emre Demirer Durak, Solmaz Najafi and Gökhan Boyno</i>	
<b>4.1</b>	<b>Introduction .....</b>	<b>71</b>
<b>4.2</b>	<b>Arbuscular mycorrhizal fungal symbiosis .....</b>	<b>72</b>
<b>4.3</b>	<b>Arbuscular mycorrhizal fungi and sustainable agriculture .....</b>	<b>73</b>
4.3.1	Functions of arbuscular mycorrhizal fungi in mineral nutrients acquisition.....	74
4.3.2	Functions and management of arbuscular mycorrhizal fungi against abiotic stresses.....	76
4.3.3	Functions and management of arbuscular mycorrhizal fungi against biotic stresses .....	78

4.3.4	Functions of arbuscular mycorrhizal fungi in soil structure and quality.....	81
4.3.5	Functions of arbuscular mycorrhizal fungi in contaminated soils bioremediation.....	82
<b>4.4</b>	<b>Commercial application of arbuscular mycorrhizal fungi.....</b>	<b>83</b>
4.4.1	Broadcasting method .....	83
4.4.2	In-furrow application method .....	83
4.4.3	Seed dressing method .....	84
4.4.4	Root dipping method .....	84
4.4.5	Seedling inoculation method .....	85
<b>4.5</b>	<b>Future perspectives and challenges.....</b>	<b>85</b>
	References.....	86

## **CHAPTER 5 Biodiversity and biotechnological applications of host-specific endophytic fungi for sustainable agriculture and allied sector..... 101**

*Jignesh Prajapati, Riya Sheth, Riddhi Bhatt, Karan Chavda, Zalak Solanki, Rakesh Rawal and Dweipayan Goswami*

<b>5.1</b>	<b>Introduction .....</b>	<b>101</b>
<b>5.2</b>	<b>Biological characteristics .....</b>	<b>102</b>
<b>5.3</b>	<b>Biodiversity and distribution.....</b>	<b>103</b>
<b>5.4</b>	<b>Ecology and ecological role.....</b>	<b>104</b>
<b>5.5</b>	<b>Sheltering of endophytic fungi .....</b>	<b>104</b>
<b>5.6</b>	<b>Association between endophytic fungi and host plants .....</b>	<b>105</b>
<b>5.7</b>	<b>Relevance of endophytic fungi for sustainable agriculture.....</b>	<b>105</b>
<b>5.8</b>	<b>Applications of endophytic fungi .....</b>	<b>106</b>
<b>5.9</b>	<b>Direct benefits .....</b>	<b>107</b>
5.9.1	Nutrient acquisition and plant growth.....	107
5.9.2	Production of plant hormones.....	107
<b>5.10</b>	<b>Indirect benefits.....</b>	<b>108</b>
5.10.1	Production of siderophore.....	108
5.10.2	Abiotic stress tolerance.....	109
5.10.3	Biotic stress tolerance .....	110
5.10.4	Activation of systemic resistance .....	111
<b>5.11</b>	<b>Endophytic fungi as biofertilizer .....</b>	<b>112</b>
<b>5.12</b>	<b>Evaluation of endophytic diversity for sustainable agriculture: technical aspects .....</b>	<b>112</b>
<b>5.13</b>	<b>Precautions about utilizing endophytic fungi in the field of agriculture.....</b>	<b>113</b>

5.14	Role of endophytic fungi in agriculture allied sectors.....	113
5.14.1	Application in environmental remediation.....	113
5.14.2	Biosynthesis of biocatalysts.....	114
5.14.3	Biosynthesis of biofuel .....	115
5.15	Commercialization of endophytic fungi .....	116
5.16	Conclusion and future perspectives .....	117
	References.....	118
<b>CHAPTER 6</b>	<b>Plant growth-promoting bacteria: sustainable use in abiotic stress management .....</b>	<b>125</b>
	<i>Amanda Lys dos Santos Silva and Ana Maria Queijeiro López</i>	
6.1	Introduction .....	125
6.2	Rhizosphere .....	126
6.3	Plant growth-promoting bacteria .....	128
6.4	Stress factors .....	129
6.4.1	Temperature .....	130
6.4.2	Water .....	132
6.4.3	Salinity .....	133
6.4.4	Heavy metals.....	135
6.5	Challenges of plant growth-promoting bacteria application .....	137
6.6	Conclusion .....	139
	References.....	140
<b>CHAPTER 7</b>	<b>Plant growth—promoting rhizobacteria: their potential as biological control agents in sustainable agriculture .....</b>	<b>145</b>
	<i>Younes Rezaee Danesh, Marika Pellegrini, Ahmet Akköprü, Beatrice Farda, Gökhan Boyno and Rihab Djebaili</i>	
7.1	Introduction .....	145
7.2	Definition of plant growth—promoting rhizobacteria .....	146
7.3	Plant growth—promoting rhizobacteria in biocontrol of plant diseases and their mechanisms.....	147
7.3.1	Competition and antibiosis .....	148
7.3.2	Siderophores' production.....	150
7.3.3	Lytic enzymes' production .....	150
7.3.4	Volatile compounds' production .....	150
7.3.5	Induced systemic resistance.....	151
7.4	Future perspectives and conclusions.....	151
	References.....	153

<b>CHAPTER 8</b>	<b>Bioprospecting of bacterial endophytes from the tuber of <i>Dioscorea bulbifera</i></b> .....	<b>161</b>
	<i>Sougata Ghosh, Vikas Ghattargi, Komal E. Kaware, Shivani P. Kulkarni and Sirikanjana Thongmee</i>	
<b>8.1</b>	Introduction .....	161
<b>8.2</b>	Isolation and identification of bacterial endophytes .....	162
<b>8.3</b>	Enzyme activity .....	165
<b>8.4</b>	Bioemulsifier production.....	167
<b>8.5</b>	Stress tolerance.....	170
<b>8.6</b>	Plant growth promotion .....	175
<b>8.7</b>	Conclusion and future perspectives .....	176
	Acknowledgment .....	177
	References.....	177
<b>CHAPTER 9</b>	<b>Green synthesis of nanomaterials and their applications in sustainable agriculture</b> .....	<b>185</b>
	<i>Beatriz Montañó-Leyva, Jonathan M. Sanchez-Silva, Luis G. Hernández-Montiel, Paloma P. Casas-Junco, Tomás Rivas-García, Jesús E. Reyna-Ochoa, Francisco J. Blancas-Benitez, Cristina Moreno-Hernández, Ulises M. López-García, Ana Y. Flores-Ramírez and Ramsés R. González-Estrada</i>	
<b>9.1</b>	Introduction .....	185
<b>9.2</b>	Impact of fruit and vegetable consumption.....	186
<b>9.3</b>	Impact of agrochemicals' use on food production .....	187
<b>9.4</b>	Nanotechnology in food production .....	189
<b>9.5</b>	Green synthesis of nanomaterials .....	191
<b>9.6</b>	Properties of nanomaterials used in food production.....	193
<b>9.7</b>	Application of green nanomaterials in fruit and vegetable production .....	196
<b>9.8</b>	Conclusions and future perspectives.....	200
	References.....	200
<b>CHAPTER 10</b>	<b>Cyanobacterial biodiversity and their potential application in sustainable agriculture</b> .....	<b>209</b>
	<i>Savita Singh, Shivani Singh, Rahul Prasad Singh and Ajay Kumar</i>	
<b>10.1</b>	Introduction .....	209
<b>10.2</b>	Cyanobacterial biodiversity across the globe .....	211

<b>10.3</b>	<b>Sustainable agriculture and cyanobacteria.....</b>	<b>212</b>
10.3.1	Unique nitrogen fixation and phosphate uptake ability.....	213
10.3.2	Plant growth promoting activity.....	214
10.3.3	Biodegradation of pesticides and insecticides.....	214
10.3.4	Biocontrol agents.....	215
10.3.5	Restoration of soil fertility.....	216
<b>10.4</b>	<b>Conclusion and future prospects.....</b>	<b>216</b>
	References.....	217
<b>CHAPTER 11</b>	<b>Nanotechnology in the agricultural sector.....</b>	<b>223</b>
	<i>Syeda Summiya</i>	
<b>11.1</b>	<b>Introduction.....</b>	<b>223</b>
<b>11.2</b>	<b>Characteristics of nanoparticles.....</b>	<b>224</b>
<b>11.3</b>	<b>Application of nanotechnology in agriculture.....</b>	<b>226</b>
11.3.1	Crop improvement and crop production by nanotechnology.....	226
11.3.2	Pest control weeds management by nanotechnology.....	228
11.3.3	Agricultural diagnosis by nanosensors.....	232
11.3.4	Soil water remediation by nanotechnology.....	236
11.3.5	Pollution monitoring by nanotechnology.....	238
11.3.6	Food processing of agricultural products and heir shelf life by nanotechnology.....	241
<b>11.4</b>	<b>Solution to combat climate change by nanotechnology.....</b>	<b>244</b>
<b>11.5</b>	<b>Future perspective.....</b>	<b>246</b>
<b>11.6</b>	<b>Conclusion.....</b>	<b>249</b>
	References.....	249
<b>CHAPTER 12</b>	<b>Microbial consortia application in the sustainable agricultural practices.....</b>	<b>263</b>
	<i>Minakshi Rajput, Sudhanshu Mishra, Akanksha Pandey, Neha Basera, Vibhuti Rana and Monika Singh</i>	
<b>12.1</b>	<b>Introduction.....</b>	<b>263</b>
<b>12.2</b>	<b>Role of synthetic or artificial microbial consortia in plant growth and crop production.....</b>	<b>265</b>
<b>12.3</b>	<b>Construction of synthetic microbial consortia.....</b>	<b>267</b>
<b>12.4</b>	<b>Future prospective.....</b>	<b>272</b>
	References.....	272

<b>CHAPTER 13 Cyanobacterial mats and their application in sustainable agriculture</b> .....	<b>277</b>
<i>Jalaluddin and Kapil Deo Pandey</i>	
13.1 Introduction .....	277
13.2 Cyanobacteria .....	278
13.3 Benthic cyanobacteria .....	279
13.4 Cyanobacterial mats .....	279
13.4.1 Benthic cyanobacterial mats .....	279
13.4.2 Arctic and Antarctic cyanobacterial mats .....	282
13.4.3 Hot water springs mats .....	284
13.4.4 Cyanobacterial mats in rice field.....	285
13.5 Application of cyanobacterial mats in sustainable agriculture.....	286
13.6 Conclusion .....	287
Acknowledgements.....	287
References.....	288
<b>CHAPTER 14 Beneficial soil microorganisms and their role in sustainable agriculture</b> .....	<b>293</b>
<i>Rostislav A. Streletskii, Angelika A. Astaykina, Andrey A. Belov, Vladimir S. Cheptsov and Anna A. Vetrova</i>	
14.1 Introduction and definition of concepts.....	293
14.2 Change in soil microbial communities as a result of agricultural use.....	294
14.3 Plant growth—promoting rhizobacteria .....	297
14.4 Nitrogen-fixing bacteria .....	302
14.5 Microorganisms from water-deficient soils.....	304
14.6 Biologically active substances released by soil microorganisms .....	306
14.7 Microbial growth regulators in sustainable agriculture and biological pesticides (biocontrol agent) based on microorganisms isolated from the soil .....	310
14.8 Funding.....	315
References.....	315
<b>CHAPTER 15 Evaluating chemical and physical properties of soil for maize production under agroforestry environments in South Africa</b> .....	<b>335</b>
<i>Thabo Nkuna, P. Maponya, C. Madakadze and Z. Dube</i>	
15.1 Introduction .....	335

<b>15.2</b>	<b>Material and methods.....</b>	<b>337</b>
15.2.1	Study location .....	337
15.2.2	Experimental procedure .....	338
<b>15.3</b>	<b>Results and discussion.....</b>	<b>338</b>
<b>15.4</b>	<b>Conclusion and recommendations .....</b>	<b>341</b>
	Acknowledgments .....	341
	References.....	342
<b>CHAPTER 16</b>	<b>Cytological observations of intracellular microbes in plants, their roles in sustainable crop production, and effects of elevated carbon dioxide on rhizophagy in roots .....</b>	<b>345</b>
	<i>April Micci, Kathryn Kingsley, Fernando Velazquez, Xiaoqian Chang, Ajay Kumar and James F. White</i>	
<b>16.1</b>	<b>Introduction .....</b>	<b>345</b>
16.1.1	Roles of soil/plant bacteria in reducing disease caused by soil-borne fungal pathogens .....	349
16.1.2	Roles of soil microbes in delivery of nutrients to plants via increased solubilization in soils.....	350
<b>16.2</b>	<b>Microbial hormone production and modulation of development of plants .....</b>	<b>351</b>
<b>16.3</b>	<b>Mechanism of entry of bacteria into plant cells.....</b>	<b>353</b>
<b>16.4</b>	<b>Plant cell cytoplasmic entry by bacteria.....</b>	<b>357</b>
16.4.1	Roles of microbes in the rhizophagy cycle to deliver soil nutrients to plants .....	360
<b>16.5</b>	<b>Nutrient absorption via rhizophagy cycle.....</b>	<b>361</b>
16.5.1	Suppression of superoxide and nutrient extraction from bacteria in roots using elevated atmospheric carbon dioxide.....	366
<b>16.6</b>	<b>The crisis of elevated carbon dioxide in earth's atmosphere.....</b>	<b>368</b>
<b>16.7</b>	<b>Conclusions .....</b>	<b>370</b>
	References.....	370
<b>CHAPTER 17</b>	<b>Endophytic fungi: diversity and their relevance in sustainable agriculture .....</b>	<b>375</b>
	<i>Sunil Kumar, Yashoda Nandan Tripathi, Vaishali Shukla, Rahul Prasad Singh, Ajay Kumar and Ram Sanmukh Upadhyay</i>	
<b>17.1</b>	<b>Introduction .....</b>	<b>375</b>
<b>17.2</b>	<b>Biodiversity and ecology of fungal endophytes .....</b>	<b>376</b>
<b>17.3</b>	<b>Biological classification of fungal endophytes.....</b>	<b>377</b>

<b>17.4</b>	Endophytic fungi in sustainable agriculture .....	378
<b>17.5</b>	Role of phytohormones in agriculture .....	380
<b>17.6</b>	Phosphate solubilization.....	381
<b>17.7</b>	Siderophore production .....	383
<b>17.8</b>	Production of extracellular enzymes .....	383
<b>17.9</b>	Protective efforts of endophytic fungi against plant diseases.....	384
17.9.1	Biocontrol properties of endophytes.....	384
17.9.2	Competing with pathogens for space and nutrients .....	384
17.9.3	Mycoparasitism .....	385
<b>17.10</b>	Alleviation of abiotic stress on agricultural crops via fungal endophytes .....	386
17.10.1	Drought stress .....	387
17.10.2	Salinity stress .....	388
17.10.3	Heavy metal toxicity.....	388
<b>17.11</b>	Conclusion.....	389
	Acknowledgments .....	390
	References.....	390
