

Contents

1	Water Activity	1
1.1	Water Activity	1
1.2	Solid Boundary Surfaces	7
1.3	Adsorption Equilibrium	11
1.4	Porous Surfaces	14
1.5	Sorption Isotherms	18
1.6	Moisture Content	23
1.7	Hygroscopicity	27
1.8	BET Equation for Foods	29
1.9	GAB Equation for Food	32
1.10	Sorption Enthalpy	34
1.11	Other Models	39
1.12	Shelf Life of Food Related to Water Activity	41
1.13	Laboratory Determination of Sorption Isotherms	48
1.14	Standard for Sorption Isotherms	51
	References	53
2	Mass Density	59
2.1	Weighing and Mass	59
2.2	Laboratory Methods for Determining Density	77
	References	99
3	Disperse Systems: Particle Characterization	101
3.1	Particle Size Distributions	103
3.2	Measurement of Particle Size Distributions	131
	References	142
4	Rheological Properties	145
4.1	Elastic Properties	145
4.1.1	Stress, Pressure, Uniaxial Tension, Young's Modulus	146
4.1.2	Three-Dimensional Stress, Bulk Compression	151
4.1.3	Shear, Shear Modulus	152
4.1.4	Transverse Strain, Poisson's Ratio	154
	References	164

4.2	Rheological Models	155
4.3	Viscous Behavior, Flow	157
4.3.1	Shear Rate	159
4.3.2	Newtonian Flow Behavior	164
4.3.3	Non-Newtonian Flow Behavior	166
4.3.4	Comparison: Newtonian and Non-Newtonian Fluids	167
4.3.5	Pseudoplastic Flow Behavior	168
4.3.6	Thixotropic Flow Behavior	169
4.3.7	Dilatant Flow Behavior	169
4.3.8	Rheopectic Flow Behavior	170
4.3.9	Plastic Flow Behavior	170
4.3.10	Overview: Non-Newtonian Flow Behavior	173
4.3.11	Model Functions	175
4.3.12	Ostwald–de Waele Law	177
4.3.13	Model Functions for Plastic Fluids	180
4.4	Temperature Dependency of Viscosity	183
4.5	Viscosity of Solutions	186
4.6	Viscoelasticity	187
4.7	Rheological Measurement	193
4.7.1	Rotational Rheometers	193
4.7.2	Oscillation Test	208
4.7.3	Further Measurement Systems	213
	References	219
5	Texture	223
5.1	Measurement	224
5.2	Test Options	230
5.3	Stress Relaxation	234
5.4	Creep Test	236
5.5	Deborah's Number	239
5.6	Oscillating Load	240
5.7	Fracture Tests	242
5.8	Texture Profile Analysis	244
	References	245
6	Interfaces	247
6.1	Interfacial Tension	248
6.1.1	Curved (Convex/Concave) Interfaces	250
6.1.2	Temperature Dependence of Interfacial Tension	256
6.1.3	Concentration Dependence of Interfacial Tension	260
6.1.4	Emulsions	263
6.1.5	Liquid–Liquid–Gas Interface	265
6.1.6	Solid–Liquid–Gas Interface	269
6.2	Kinetic Phenomena at Interfaces	271
6.3	Measurement	272
	References	281
