Foreword	7
<i>F.M. Mazzolani</i>	
1	
Introduction to fire design	9
<i>F. Wald & I. Burgess</i>	
2	
Overview of fire design	17
<i>Y.C. Wang, J.M. Franssen, M. Heinisuo, F. Wald & I. Burgess</i>	
3	
Fire modelling – a structural engineering perspective	23
<i>M. Gillie</i>	
4	
Heat transfer analysis	31
<i>Y.C. Wang & F. Wald</i>	
5	
Mechanical properties of materials	39
<i>D. Pintea, R. Zaharia, M. Kaliske, G. Kaklauskas, D. Bacinskas, V. Gribniak, Á. Török & M. Hajpál</i>	
6	
Thermal properties of materials	47
<i>D. Pintea, R. Zaharia, M. Kaliske, G. Kaklauskas, D. Bacinskas, V. Gribniak, Á. Török & M. Hajpál</i>	
7	
Global modelling of structures in fire	53
<i>M. Gillie, I. Burgess, J.M. Franssen, L. Kwasniewski, Y. Wang</i>	
8	
Structural member behaviour and analysis in case of fire	61
<i>N. Lopes, P. Vila Real, B. Uppfeldt, M. Veljkovic, L. Simões da Silva, J.M. Franssen, H. Bouchaïr, J.-P. Muzeau, O. Vassart, D. Bacinskas, G. Kaklauskas, V. Gribniak, M. Cvetkovska, L. Lazarov, E. Nigro & G. Cefarelli</i>	

9		
	Structural member design in case of fire	69
	<i>N. Lopes, P. Vila Real & H. Bouchair</i>	
10		
	Behaviour of steel and composite joints in fire	77
	<i>I. Burgess, A. Santiago & F. Wald</i>	
11		
	Component-based approaches to steel and composite joints in fire	85
	<i>I. Burgess, A. Santiago & F. Wald</i>	
12		
	Design procedures for steel and composite joints in fire	93
	<i>I. Burgess, A. Santiago & F. Wald</i>	
13		
	Risk and management in case of fire after earthquake	101
	<i>B. Faggiano, M. Esposito, R. Zaharia & D. Pinteá</i>	
14		
	Structural analysis and design in case of fire after earthquake	109
	<i>B. Faggiano, M. Esposito, R. Zaharia & D. Pinteá</i>	
15		
	Robustness under fire	117
	<i>Y.C. Wang & F. Wald</i>	
16		
	Fire damaged structures	125
	<i>Y.C. Wang, F. Wald, Á. Török & M. Hajpál</i>	
17		
	Fire design in Europe	133
	<i>M. Heinisuo</i>	
	Subject index	141
