INFORMATICS

| | |
|--|-----------|
| 1. From Compatibility Troubleshooting in Windows 7 to Virtualization | 14 |
|--|-----------|

| | |
|---|----|
| 1.1. Introduction | 14 |
| 1.2. The issue of compatibility | 15 |
| 1.3. Solution searching in knowledge database | 17 |
| 1.4. Compatibility mode..... | 18 |
| 1.5. Windows XP MODE | 21 |
| 1.6. 64bit version of the Windows system | 24 |
| 1.7. Virtualization on operating system level..... | 24 |
| 1.8. Conclusion | 25 |

| | |
|--|-----------|
| 2. Optimization of Highly Available Computer Network Environment | 27 |
|--|-----------|

| | |
|---|----|
| 2.1. Introduction | 27 |
| 2.2. Issue of the link layer | 28 |
| 2.2.1. Switching off links | 28 |
| 2.2.2. Aggregating links | 30 |
| 2.2.3. Corellated accesses..... | 31 |
| 2.3. Debugging link layer protocol behavior | 32 |
| 2.3.1. STP Timers | 32 |
| 2.3.2. Traffic division between links in LACP | 33 |
| 2.3.3. Broadcast domain..... | 34 |
| 2.4. Routed environment | 34 |
| 2.4.1. EIGRP | 36 |
| 2.4.2. OSPF | 38 |
| 2.4.3. Convergence acceleration | 41 |
| 2.5. Redundancy of a default gateway | 42 |
| 2.5.1. HSRP and VRRP | 43 |
| 2.5.2. GLBP | 45 |
| 2.6. Conclusion | 46 |

| | |
|---|-----------|
| 3. Modelling of the Thread Synchronisation in the Operating System | |
| Using Coloured Petri Nets | 49 |
| 3.1. Introduction | 49 |
| 3.2. Description of the issue | 50 |
| 3.2.1. Simple blocking | 50 |
| 3.2.2. Method Join | 51 |
| 3.2.3. <i>Method Sleep</i> | 52 |
| 3.2.4. <i>Locking</i> | 52 |
| 3.2.5. <i>Signalisation</i> | 53 |
| 3.2.6. <i>Synchronisation models</i> | 54 |
| 3.2.7. Model of the method Join | 55 |
| 3.2.8. Model of the method Sleep | 56 |
| 3.2.9. Model of the signalisation logic | 56 |
| 3.2.10. Model of the locking logic | 57 |
| 3.3. Verification of models | 58 |
| 3.4. Discussion | 59 |
| 3.5. Conclusion | 59 |
| _Toc404073350 | |
| | |
| 4. Agent-based Model of Spatial Dispersion of Celtic Settlements | 62 |
| 4.1. Introduction | 62 |
| 4.2. Conceptual Model | 64 |
| 4.2.1. Implementation in NetLogo | 65 |
| 4.3. Experiments | 70 |
| 4.4. Conclusions | 73 |
| | |
| 5. Models of Artificial Life Based on Fuzzy Cognitive Maps | 75 |
| 5.1. Introduction | 75 |
| 5.2. Fuzzy cognitive maps | 75 |
| 5.3. Implementation of artificial life model | 77 |
| 5.4. Experiments | 82 |
| 5.5. Discussion | 85 |
| 5.6. Conclusion | 85 |
| | |
| 6. Analysis and Testing of Antivirus Software | 88 |
| 6.1. Introduction | 88 |
| 6.2. Malicious software and its division | 88 |
| 6.3. Antivirus software | 90 |

| | |
|--|------------|
| 6.3.1. Division of antivirus programs | 90 |
| 6.3.2. Antivirus scanners | 91 |
| 6.4. Methods of detection | 91 |
| 6.4.1. Scanning | 92 |
| 6.4.2. Code emulation | 92 |
| Heuristic analysis | 92 |
| 6.4.3. Generic detection | 93 |
| 6.4.4. Data integrity control | 93 |
| 6.4.5. Suspicious behavior monitrs | 93 |
| 6.5. Methods of disinfection | 94 |
| Algorithmic disinfection | 94 |
| Graphic disinfection | 94 |
| Sandbox | 94 |
| Quarantine | 95 |
| 6.6. Methodology of testing | 95 |
| 6.7. Conclusion | 100 |
| | |
| 7. Analysis of Features Required from Software Applications for Visualisation in Automation | 103 |
| 7.1. Introduction | 103 |
| 7.2. Methodology | 105 |
| 7.3. Results | 106 |
| 7.3.1. Measured Values of Installations | 106 |
| 7.3.2. Tags | 107 |
| 7.3.3. Graphic Development | 108 |
| 7.3.4. <i>System of the Screens</i> | 110 |
| 7.3.5. Trends | 111 |
| 7.3.6. Alarms | 112 |
| 7.3.7. Scripts | 113 |
| 7.3.8. Cross Reference | 114 |
| 7.3.9. Security | 115 |
| 7.4. Discussion and Conclusions | 115 |
| | |
| 8. Useability of E-commerce | 122 |
| 8.1. Introduction | 122 |
| 8.2. Usability | 123 |
| 8.2.1 Basic prerequisites of correct application | 123 |
| 8.2.2. Functionality | 124 |

| | |
|---|------------|
| 8.2.3. Components of a user-friendly e-shop | 124 |
| 8.3. Questionnaire survey – Highlights..... | 128 |
| 8.4. Conclusion | 132 |
| 9. Research in Web Design | 134 |
| 9.1. Introduction..... | 134 |
| 9.2. User preferences..... | 135 |
| 9.2.1. Influence on user preferences..... | 135 |
| 9.2.2. Classical and expressive design | 136 |
| 9.2.3. Usability and aesthetics..... | 137 |
| 9.2.4. Shortcomings of the current research..... | 138 |
| 9.3. Usability of the website..... | 140 |
| 9.3.1. Content organization | 140 |
| 9.3.2. Navigation | 140 |
| 9.3.3. Research directions | 140 |
| 9.4. Aesthetics of the website..... | 141 |
| 9.4.1. Classical and expressive aesthetics | 141 |
| 9.4.2. Colours and contrast..... | 141 |
| 9.4.3. Other visual elements..... | 142 |
| 9.4.4. Research directions | 142 |
| 9.5. Conclusion | 143 |

INFORMATION AND KNOWLEDGE MANAGEMENT

10. The Use of Lean Methods in Information and Knowledge

| | |
|--|------------|
| Management | 148 |
| 10.1. Introduction..... | 148 |
| 10.2. Lean enterprise methods | 148 |
| 10.2.1. Seven types of waste | 149 |
| 10.2.2. PULL and PUSH principle in the information flow | 150 |
| 10.2.3. 5S | 151 |
| 10.2.4. Ergonomics of the work | 153 |
| 10.2.5. Time analysis | 154 |
| 10.2.6. Value flow mapping..... | 155 |
| 10.3. Use of the lean enterprise methods in the design of a user interface..... | 156 |
| 10.4. Options of the application in a real environment..... | 157 |

| | |
|--|------------|
| 11. The Social Media Use within the Customer Knowledge Management | 160 |
| 11.1. Introduction | 160 |
| 11.2. Problem formulation | 161 |
| 11.3. Customer Relationship management | 161 |
| 11.4. Knowledge Management | 162 |
| 11.4.1. Customer Knowledge Management | 163 |
| 11.5. Social media | 164 |
| 11.6. Methods | 165 |
| 11.6.1. Problem analysis | 165 |
| 11.6.2. Official microblogs and blogs | 167 |
| 11.6.3. Social media use | 167 |
| 11.6.4. Mobile apps | 169 |
| 11.6.5. Discuss forums | 169 |
| 11.7. Discussion | 169 |
| 11.8. Conclusion | 171 |
| 12. Dissemination of Warning Messages Using Encryption | 175 |
| 12.1. Introduction | 175 |
| 12.2. System requirements and model situations | 177 |
| 12.2.1. System requirements | 177 |
| 12.2.2. Introducing Radio-Help system | 178 |
| 12.2.3. Model situations | 179 |
| 12.3. Technical attributes of positional based broadcasting | 182 |
| 12.4. Model of the message transmitting procedure | 185 |
| 12.5. Conclusion | 187 |
| 13. Concept of an Early Warning in Traffic and Its Implications | 190 |
| 13.1. Introduction | 190 |
| 13.2. Currently used telematic methods | 191 |
| 13.3. Short range planned method (eCall) | 191 |
| 13.4. System for Automated Forewarning of Vehicle Crashes | 193 |
| 13.5. WAZE method | 193 |
| 13.6. Comparing separate segments of each method | 195 |
| 13.7. Research | 197 |
| 13.8. Evaluation | 198 |
| 13.9. Conclusion | 201 |

| | |
|---|------------|
| 14. Resource Constrained Multi-Project Scheduling Problem: New Constraints for Project Activities and Production Resources and Alternative Fitness Functions | 205 |
| 14.1. Introduction | 205 |
| 14.2. Formulation of the problem | 206 |
| 14.2.1. Projects | 206 |
| 14.2.2. Project activities | 206 |
| 14.2.3. Resources | 207 |
| 14.3. Methods | 208 |
| 14.4. Description of the proposed solution | 210 |
| 14.4.1. Representation | 210 |
| 14.4.2. Fitness functions | 211 |
| 14.5. Conclusion | 216 |

ADMINISTRATION

| | |
|--|------------|
| 15. Further Education of Employees in the Textile and Glass Industry in the Liberec Region | 220 |
| 15.1. Introduction | 220 |
| 15.2. Theoretical research background | 222 |
| 15.2.1. Methods of employees training | 223 |
| 15.2.2. Education and training of employees in textile industry in leading countries (EU, USA, ASIA) | 226 |
| 15.3. Methodology and data collection | 227 |
| 15.3.1. Current state of the industry and selection of the sample | 227 |
| 15.4. Results of the survey | 230 |
| 15.5. Conclusion | 233 |

| | |
|--|------------|
| 16. Impact of Information Technology and Temperament on Motivation for Self-education | 236 |
| 16.1. Introduction | 237 |
| 16.2. Methodology | 238 |
| 16.3. Results | 241 |
| 16.4. Conclusion | 247 |
| References | 248 |
| Contact address | 250 |

| | |
|---|------------|
| 17. The Efficiency of a Managerial Training Programme in a Franchise Company | 251 |
| 17.1. Introduction | 251 |
| 17.2. Issues formulation | 252 |
| 17.2.1. Literature review | 252 |
| 17.2.2. Knowledge management models | 253 |
| 17.2.3. Learning organization | 254 |
| 17.2.1. Problems and promises of knowledge management | 255 |
| 17.3. Methods | 256 |
| 17.3.1. Analysis of the problem | 256 |
| 17.4. Statistical methods | 257 |
| 17.4.1. Factor analysis | 257 |
| 17.4.2. Cluster analysis | 258 |
| 17.5. Conclusion | 261 |
| | |
| 18. Ecological Innovations Treated from the Perspective of a Medium Sized Enterprise | 263 |
| 18.1 Introduction | 263 |
| 18.2. Problem formulation | 264 |
| 18.2.1. Environmental programs and support for SMEs | 265 |
| 18.3. Methods | 267 |
| 18.4. Analysis of the problem | 268 |
| 18.4.1. Characteristics of waste production and its use of ecoinnovation in the enterprise Pilana- Knives, Ltd. | 269 |
| 18.4.2. Analysis of the Hempel-Oppenheim model of eco-innovation in the company Pilana-Knives, Ltd. | 270 |
| 18.5. Discussion | 271 |
| 18.5.1. Recommendations for further development | 272 |
| 18.6. Conclusion | 272 |
| | |
| 19. The Level of Implementation and the Effectiveness of Use of Internet Communication Tools in the Marketing Area by Accommodation Facilities in the North Bohemia Region | 276 |
| 19.1. Introduction | 276 |
| 19.2. Theoretical background | 277 |
| 19.2.1. Information and the communicational process | 278 |
| 19.2.2. Current status of Internet implementation in the Czech Republic | 279 |

| | |
|---|-----|
| 19.2.3. Implementation of online information technologies | 281 |
| 19.3. Sample case study | 284 |
| 19.4. Methodology and data collection | 286 |
| 19.5. Results of the survey | 287 |
| 19.6. Discussion | 293 |
| 19.7. Conclusion | 294 |
| List of tables | 298 |
| List of figures | 299 |
