

Contents

<i>Preface to Second Edition</i>	ix
1 Water Pollution Problems and Solutions	1
1.1 The scale of water pollution	2
1.2 Metalliferous rivers	4
1.2.1 The Rivers East and West Allen	8
1.2.2 Physical and Chemical Survey	10
1.2.3 Biological Survey	12
1.2.4 Zinc Toxicity	14
1.2.5 Some Further Questions	17
1.3 Toxicity and the status of fisheries	20
2 Sources and Effects of Water Pollutants	29
2.1 The nature of effluents	29
2.2 The environmental requirements of aquatic organisms	32
2.3 Organic pollution	35
2.4 Nutrient pollution	41
2.5 Eutrophication	42
2.6 Thermal pollution	45
2.7 Toxic pollution	52
2.7.1 Heavy Metals	53
2.7.2 Ammonia, Cyanides and Phenols	55
2.7.3 Pesticides	56
2.8 Suspended solids	57
2.9 Extreme pH and acidification	59
2.10 Detergents	63
2.11 Oil and petroleum products	65

Contents

3	Biological Monitoring of Water Quality	
3.1	The conceptual basis of biological monitoring	
3.2	Indicator organisms	
3.3	Sampling methods	
3.3.1	Evaluating Sampling Techniques	
3.4	Data analysis and interpretation	
3.4.1	Pollution Indices	
3.4.2	Diversity Indices	
3.4.3	Biotic Indices	
3.4.4	Similarity Indices	
3.4.5	Other Multivariate Techniques	104
3.4.6	RIVPACS	105
3.4.7	Some General Comments about Data Analysis and Interpretation	109
4	The Toxicity of Pollutants to Aquatic Organisms	113
4.1	Lethal toxicity and its measurement	115
4.1.1	The Experimental Conditions	115
4.1.2	Data Collection and Analysis	116
4.1.3	Probit Lines	119
4.1.4	Toxicity Curves	122
4.1.5	Alternative Methods for Measuring Lethal Toxicity	127
4.2	Factors influencing toxicity	128
4.2.1	The Toxic Properties of the Pollutant	128
4.2.2	The Effects of Environmental Conditions	130
4.2.3	Combinations of Poisons	134
4.2.4	Fluctuating Concentrations	138
4.2.5	Biotic Factors Influencing Toxicity	139
4.2.6	Intraspecific Variation	141
4.3	Applications of lethal toxicity measurements	142
4.4	Sublethal toxicity	145
4.4.1	Single-species Toxicity Tests	146
4.4.2	Experimental Ecosystems	153
4.4.3	Bioaccumulation	156
4.5	Evaluating toxicological data	159
4.6	Quantitative structure–activity relationships (QSARs)	161
5	Water Pollution and Public Health	165
5.1	Water pollution and pathogens	166
5.1.1	Bacterial Pathogens	166
5.1.2	Viral Pathogens	170
5.1.3	Parasitic Infections	172
5.1.4	Pathogens in the Aquatic Environment and in Waste Water Treatment Processes	175
5.2	Monitoring pathogens in water	176

5.2.1	Monitoring for Coliforms	177
5.2.2	Monitoring for Viruses	180
5.2.3	Monitoring for Parasites	181
5.3	Water pollution and water supply	182
5.3.1	Potable Water Supply	182
5.3.2	Agricultural Water Supply	183
5.3.3	Industrial Water Supply	184
6	Water Pollution Control	187
6.1	Biological treatment of waste water	188
6.1.1	Primary Treatment	189
6.1.2	Secondary Treatment	190
6.1.3	Tertiary Treatment	195
6.1.4	Sludge Disposal	196
6.1.5	Biological Treatment of Industrial Waste Water	198
6.2	The legislative and administrative framework of water pollution control	199
6.2.1	The 'Polluter Pays' Principle	201
6.2.2	Receiving Water Quality Standards	203
6.2.3	Emission Standards	207
6.2.4	Water Quality Objectives	209
6.3	Water pollution law in practice	214
6.3.1	Water Pollution Law in Britain	216
6.3.2	European Water Pollution Law	218
6.3.3	Water Pollution Law in the USA	221
7	Estuarine and Marine Pollution	225
7.1	Pollution of estuaries	226
7.2	Pollution of the seas	230
7.2.1	Oil Pollution	231
7.2.2	Sewage and Domestic Wastes	234
7.2.3	Toxic Pollutants	236
7.3	Marine biological monitoring	241
7.3.1	Indicator Organisms	241
7.3.2	Sampling Methodology	245
7.3.3	Data Analysis	247
7.4	International co-operation on marine pollution	248
